Portugal at the Crossroads

By HOWARD LA FAY

Photographs by VOLKMAR WENTZEL

Both National Geographic Staff

AT DUSK, Lisbon's principal square, the Rossio, explodes into a rainbow of neon; shoppers eddy past glittering store windows; eager patrons press into overcrowded cafes and restaurants; music halls rock with song and merriment. Beneath gay mosaic sidewalks, trains

of a new subway system slam from end to end of the Portuguese capital.

But beyond the lights and laughter and movement lie a city and a nation in crisis. For Portugal—earliest and once the greatest of Europe's modern imperial powers—has chosen to resist the tide of anticolonialism engulfing

453

◀ Sons of the sea, the Portuguese became Europe's greatest navigators. Today's fishermen, such as these on a beach near Porto, still dare the oceans in frail vessels.

City of the ages, Lisbon meets the 20th century more than halfway. But ultramodern apartments of Portugal's capital show only one face of this hard-pressed little nation, scarcely larger than the State of Maine. In the 1400's Portugal became one of the world's chief maritime powers when her seafarers set sail into the Age of Discovery. Today she struggles to maintain the remnants of a once-global empire.

Tradition ascribes Lisbon's founding to the Greek wanderer Ulysses. Originally named Olisipo, the city stands, like Rome, on a series of hills. One in every 11 Portuguese lives here, many in apartments like these on Avenida dos Estados Unidos da América—a reminder of Portugal's long friendship with the U.S.A.

Lisbon's *carrinas*, or fishwives, trudge cobble streets of the Tagus riverfront, wearing shoes unwillingly but as the law requires. They carry headloads of seafood fresh from boats, chanting through the city for customers.

Africa: At tremendous cost, the Portuguese army is battling guerrillas in Angola, Mozambique, and Guinea.

I found the crisis reflected in the special sales tax—15 percent on some items—that helps finance the faraway wars. I found it, too, in the myriad signs that sprinkle Lisbon: "Mozambique and Angola, Portuguese for Five Centuries" *... "Portugal Is Not for Sale." I saw it in patriotic demonstrations where out-of-step delegations—firemen with glinting axes on shoulders, women from

RENDERINGS BY NATIONAL ASSOCIATION OF PROFESSIONAL HIGHWAY DESIGNERS, INC. FOR THE FEDERAL ROAD BOARD. LEFT AND TOP: JAMES DE WARD

religious societies, farmers from the provinces—marched with banners proclaiming *Lataremos Sempre*—"We Shall Fight Forever." And once again, in Africa, Portuguese are dying in their nation's 800-year struggle for identity, survival, empire.

Rebel Vassal Led Way to Independence

Forged from a petty duchy on the western strand of the Iberian Peninsula by Afonso Henriques, a rebellious vassal of the Spanish kingdom of León, Portugal gained independence in 1143. The tiny new state lay between the Minho and Mondego Rivers, but Afonso—who became Portugal's first king—fought

his way south, annexing lands held by the Moors since the eighth century.

Intensely Christian from its very inception, Portugal wears on its coat of arms five blue shields, each with five bezants representing the five wounds of Christ. Traditionally, Portuguese monarchs wore no crown—it belonged to the Blessed Virgin.

In 1147, with the help of Crusaders bound for the Holy Land, Afonso captured the great port of Lisbon from the Moslems. His successors continued the southward advance and, with the final conquest of the Moorish kingdom of the Algarve in 1249, Portugal established borders that have remained virtually

unchanged to the present day (map, page 459). This land of more than nine million people is the oldest intact state in Europe.

Insulated from the rest of the continent by a powerful and oftentimes hostile neighbor (Spain invaded Portugal repeatedly over the centuries, and once, from 1580 to 1640, even absorbed her), the Portuguese turned to the sea. The 15th-century caravels of Prince Henry the Navigator blazed the way into unknown oceans, and Portuguese mariners opened vast areas of the world to European exploration.* At its brilliant zenith, the empire won by the Portuguese stretched from the China Sea to

"For the Portuguese," he laughed bitterly, "imperialism in the past has been a huge illusion. Do you know what it has brought us? The lowest per capita income in Western Europe and the highest rate of illiteracy."

"Today we face a crucial moment of our history. And no matter what happens—whether we hold the overseas territories or lose them—Portugal is rejoining Europe."

I knew what he meant. Although the Portuguese have left their mark around the globe, almost 500 years of overseas involvements all but exhausted the tiny nation's resources. Chronic misfortune abroad, climaxed by the

Monument to valor, the Monastery of Santa Maria da Vitória soars in Gothic splendor near Aljubarrota, where the Portuguese routed invading Castilians in 1385. Portuguese know it simply as Batalha—Battle. In the Royal Cloister of King João I, the monastery's donor, monks once washed at this gently splashing fountain.

Portugal's voyager-poet Luis de Camões rests in stone atop his tomb in Lisbon's Jerónimos Church, next to the tomb of Vasco da Gama. Camões's epic *Os Lusíadas* ("The Portuguese"), completed some 70 years after da Gama found the sea route to India in 1498, immortalizes the nation's great period of discovery and colonization.

Brazil, from North Africa to the southwest Pacific. Soldiers, missionaries, administrators, settlers poured into the new lands.

"In the 450 years since the discoveries," a Portuguese historian pointed out to me, "our principal export has been men—so much so that far more people of Portuguese descent live outside the country than in it. We literally turned our backs on Europe."

"After Vasco da Gama found the sea route to India in 1498, Portuguese ships monopolized the spice trade. But most of the profits—and most of our manpower—went into guarding the 15,000 miles of sea lanes between Goa and Lisbon. Even so, in one year alone we lost 300 ships to pirates."

"At home, farms and industries decayed. The government was forced to buy food and other necessities abroad. In the end, after mortgaging the country to the hilt, we flooded the spice market and prices plummeted.

loss of Goa in 1961, has now refocused Portuguese energies upon the underdeveloped homeland. Shaking off the economic stagnation of centuries, Portugal has embarked upon a belated industrial revolution.

On the upper Rabaço River, a dam erected at a cost of \$49,000,000 this year began feeding 90 million watts of electric power to the nation. Just outside Lisbon, one of the world's largest rotary kilns produces 1,800 tons of cement daily to support a massive building program. In the capital itself, workers scale steel towers 625 dizzy feet above the Tagus to build Europe's longest and most expensive suspension bridge (page 458).

Historically, the Tagus—flowing out of the heart of Spain to empty into the Atlantic—has sliced Portugal neatly in half. Ferryboats have provided a tenuous link between Lisbon

APRIL 1966 BY PETER H. JOHNSON © N.A.S.

Swooping cables to support a 7,426-foot suspension bridge, longest in Europe, span the Tagus River estuary at Lisbon (background). Towers soar 623 feet; each cable contains 11,248 steel strands. Scheduled for completion in late 1966, the \$75,000,000 four-lane highway bridge, eventually to carry rail traffic also, will provide Lisbon's first direct link with southern Portugal, opening the region to industry and tourism.

PORTUGAL

WESTERMOST NATION OF continental Europe, Portugal found her destiny in the sea. Five centuries ago, caravels bearing Portugal's scarlet Cross of Christ rounded the oceans, exploring and opening two-thirds of the then-unknown world. Now, from Brazil

to Timor, 100 million people use the tongue of Europe's oldest intact nation.

Tiny Portugal is a world in miniature: Within hours one may ski in the pine north-central Serra da Estrela and swim on the sunny beaches of the Algarve.

GOVERNMENT: Constitutionally a republic; same prime minister since 1931. **AREA:** 11,510 square miles (including Azores and Madeira Islands); 808,370 square miles in overseas territories of Angola, Cape Verde Islands, Macao, Mozambique, Portuguese Guinea, Portuguese Timor, São Tomé and Príncipe. **POPULATION:** 9,150,000 (with Azores and Madeira Islands); 13,544,000 in overseas territories. Celtic influences in northern Portugal; Arab and Iberian in the south. **LANGUAGE:** Portuguese. **RELIGION:** Mainly Roman Catholic. **ECONOMY:** 40 percent based on agriculture. One of the world's chief producers of olive oil, wine, and sardines. Leading producer of cork, exporting half the world's supply. Manufactures include textiles, pottery, chemicals, ships. **MAJOR CITIES:** Lisbon (population 818,000), capital port; Porto (population 306,000), wine center, port. **CLIMATE:** Mild and temperate. Rains winter and warm summer interior and south, drier and hotter.

Overseas territories 23 times the size of the homeland fly the Portuguese flag today, from islands in the Atlantic and lands in Africa to Macao and Timor in far-off Asia.

and the undeveloped southern regions of the country, as have several bridges far upriver. But the new Tagus road-and-rail span promises to revolutionize the Portuguese economy.

It was raining when Engineer José de Camo Moniz, General Inspector of Public Works and Director of the Bridge Authority, received me in his office overlooking the river. Outside, I could see swarms of workers half obscured by driving rain, laboring to sink the world's deepest pier—a concrete footing that would extend 260 feet below the river's surface.

Bridge Will Unite a Sundered Land

"Studies on this bridge began in 1876," Engineer Moniz told me, "and its importance to Portugal's future cannot be overstated.

"For one thing, some nine percent of our population now lives in Lisbon proper, causing an acute housing shortage. By opening up the Tagus's southern shore, we can absorb some of this population in satellite towns.

"Furthermore," his finger stabbed a map, "heavy industry will be able to locate on the peninsula between Lisbon and Setúbal. These are our two busiest ports.

"Finally, the bridge will open the entire south to tourism. The Algarve, with its fine beaches and subtropical climate, will be only a four-hour drive from Lisbon."

Later I boarded a boat and bounced across the rain-lashed Tagus. Just above a temporary dock, workers were pouring concrete for the bridge's southern anchorage—a mammoth block designed to withstand some 28,000 tons of pull from the suspension cables.

A scene from the Apocalypse met my eyes. Workers, knee-deep in mud, slopped through the drenching rain, while machinery under stress clanked and groaned in wild cacophony. Trucks loaded with concrete skidded down a road gouged in the naked earth; they fed their cargo into the buckets of giant cranes that swooped overhead to dump ton after ton into the great cavity that would hold the anchorage. In shifting, swirling mist loomed the colossal statue of Christ the King that guards the river's southern bank. Almost filling the leaden sky, it stretched arms protectively above work and workers.

Despite the hectic industrialization of its outskirts, Lisbon remains a calm and classic capital. The present-day city is a monument to the Marquês de Pombal. On All Saints Day in 1755 a calamitous earthquake wrenched Lisbon, destroying two-thirds of the city.

Subsequent seismic sea waves and widespread fires completed the carnage. Some 40,000 corpses lay in the ruins of the capital that Spanish poet Tirso de Molina had described as "the eighth wonder of the world."

Alone in the government, Pombal—who later assumed dictatorial power—kept his head. He issued the terse order, "Bury the dead and feed the living." Out of the rubble he built today's Lisbon of broad avenues and sweeping squares.

Pombal's statue now stands in the center of the city (pages 468-9), looking down the tree-lined length of Avenida da Liberdade—almost 400 yards wide and bounded by strips of garden where grave swans glide in ponds.

Lisbon, I found, is a city for idle strolling. Turn into the Rua da Madalena and enter the cool, aromatic herb shop Ervataria Rosil, where an expert will prescribe and mix infusions of medicinal herbs to combat rheumatism or laryngitis, obesity or eczema. Drop into the locked Royal Coach Museum, where the faded plush and peeling gilt of the finest surviving collection of horse-drawn coaches recalls regal splendors and dead monarchs.

Or pass from the sun-drenched street into the vast gloom of the Jerónimos Church. Started by King Manuel the Fortunate in 1496, on the eve of Vasco da Gama's journey to the Indies, Jerónimos incorporates the full exuberance of the Age of Discovery. Here, frozen forever in stone, is the blazing noon-tide of empire. Stylized hawyers writhe in the arches. Shells and coral and fish entwine on every column. Sanctuary lamps glow red above carved African lions.

Those Who Dared All for Christendom

In a timeless dusk of flickering candles sleep the kings and queens who reaped the wealth of the East. Their stone catafalques rest on the backs of marble elephants. The tomb of Vasco da Gama, first to sail to India, lies next to that of Luís de Camões, Portugal's national poet, who himself voyaged to the Orient (page 456). "This small nation of Portugal," sang Camões, "does not lack those who will dare all for Christendom . . ."

At the dawn of that brilliant epoch, Portugal was indeed a small, poor land, with a population of barely a million and a half. And discovery exacted a fearful human toll. Of da Gama's men, a third never returned. When Alvares Cabral sailed to India in 1500, he lost 6 of his 13 ships. But the Portuguese

jam-packed cable car clacks over steep cobble streets, bringing Lisbon's downtown from Bairro Alto, the High Quarter. Its multistoried 17th-century buildings were once the city's tallest.

Explosion of colored paper festoons Lisbon's Alfama quarter for the Feast of St. Anthony, favorite saint of the city. Artful duck lamp will brighten the Moorish quarter at dusk.

"Street of My Jealousies," sings a comely *fadista*, Valentina Felix, lamenting unrequited loves and lost lovers. Melancholy strains of the *fado*, Portugal's best-known song form, resound in late-at-night cabarets like this club in the fashionable seaside resort of Estoril, near Lisbon.

Person in green shirt

Mass over 1000

White Volkswagen Beetle

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in the management of the organization's resources.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the survey process, the selection of participants, and the use of statistical tools to interpret the results.

3. The third part of the document provides a comprehensive overview of the findings from the study. It highlights the key trends and patterns observed in the data, as well as the implications of these findings for the organization's future operations.

4. The final part of the document offers a series of recommendations and suggestions for improving the organization's performance. It includes a list of specific actions that should be taken, along with a timeline for their implementation.

5. The document concludes with a summary of the main points and a statement of the author's appreciation for the support and assistance provided by the organization's staff and management.

6. The document is signed by the author, who is a member of the organization's senior management team. It is dated and includes the author's contact information for further inquiries.

7. The document is accompanied by a series of appendices and supporting documents, which provide additional details and data related to the study.

8. The document is stored in the organization's central database, where it can be accessed by all relevant personnel.

Predict **No** **The Preserves Department will**

1. The first part of the document is a list of the names of the people who were present at the meeting. The names are listed in alphabetical order. The names are: John Doe, Jane Smith, and Bob Johnson. The names are listed in the first column of the table.

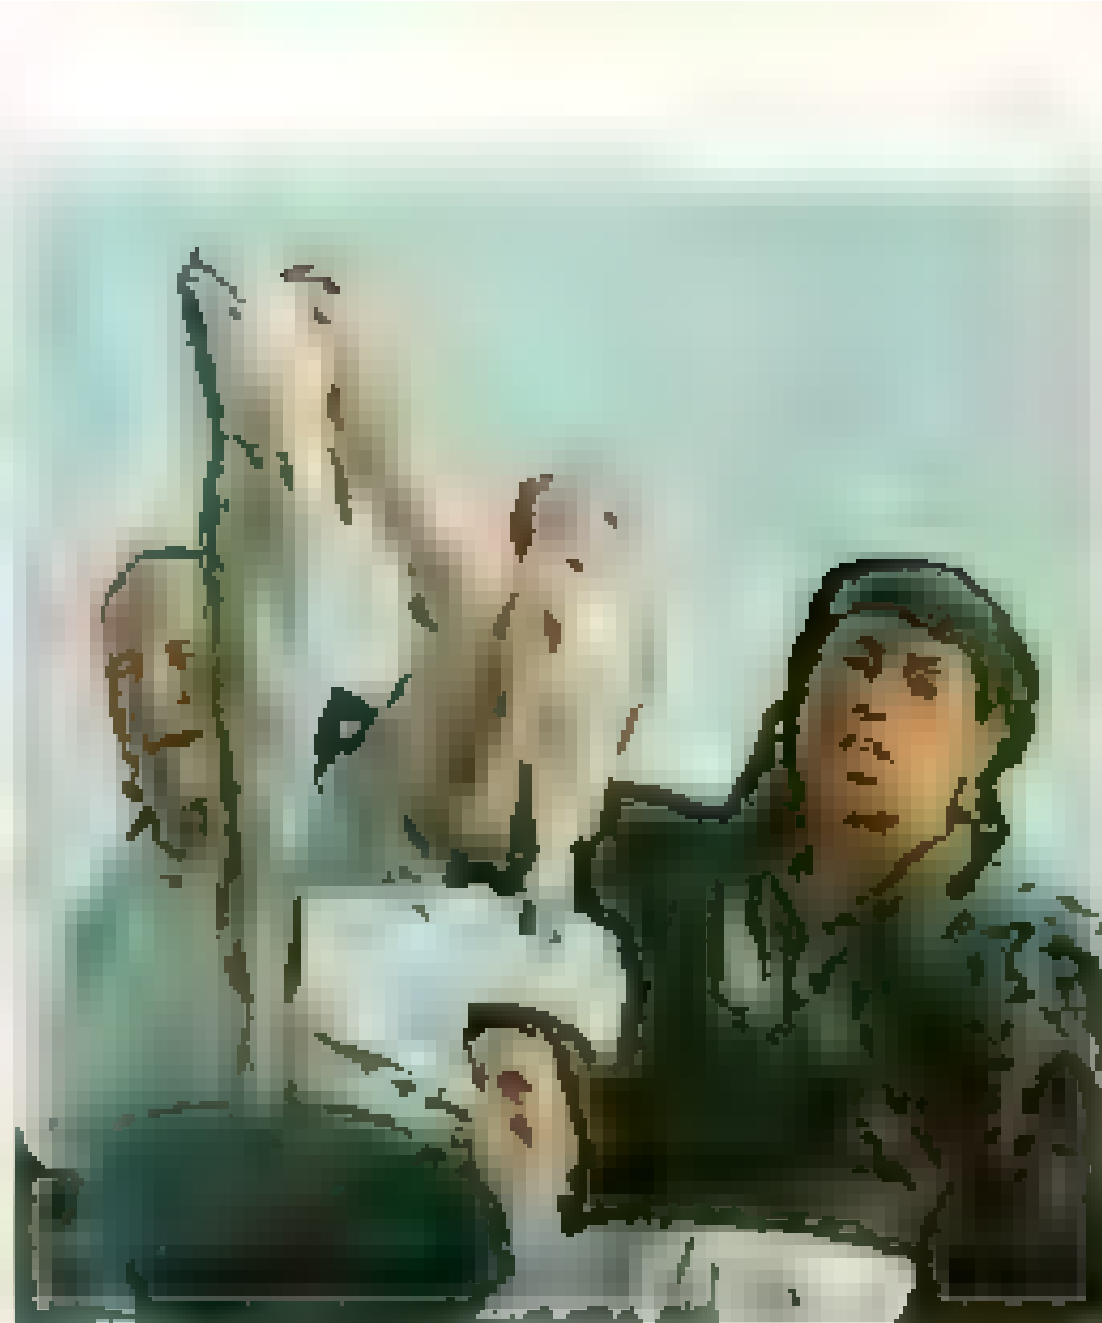

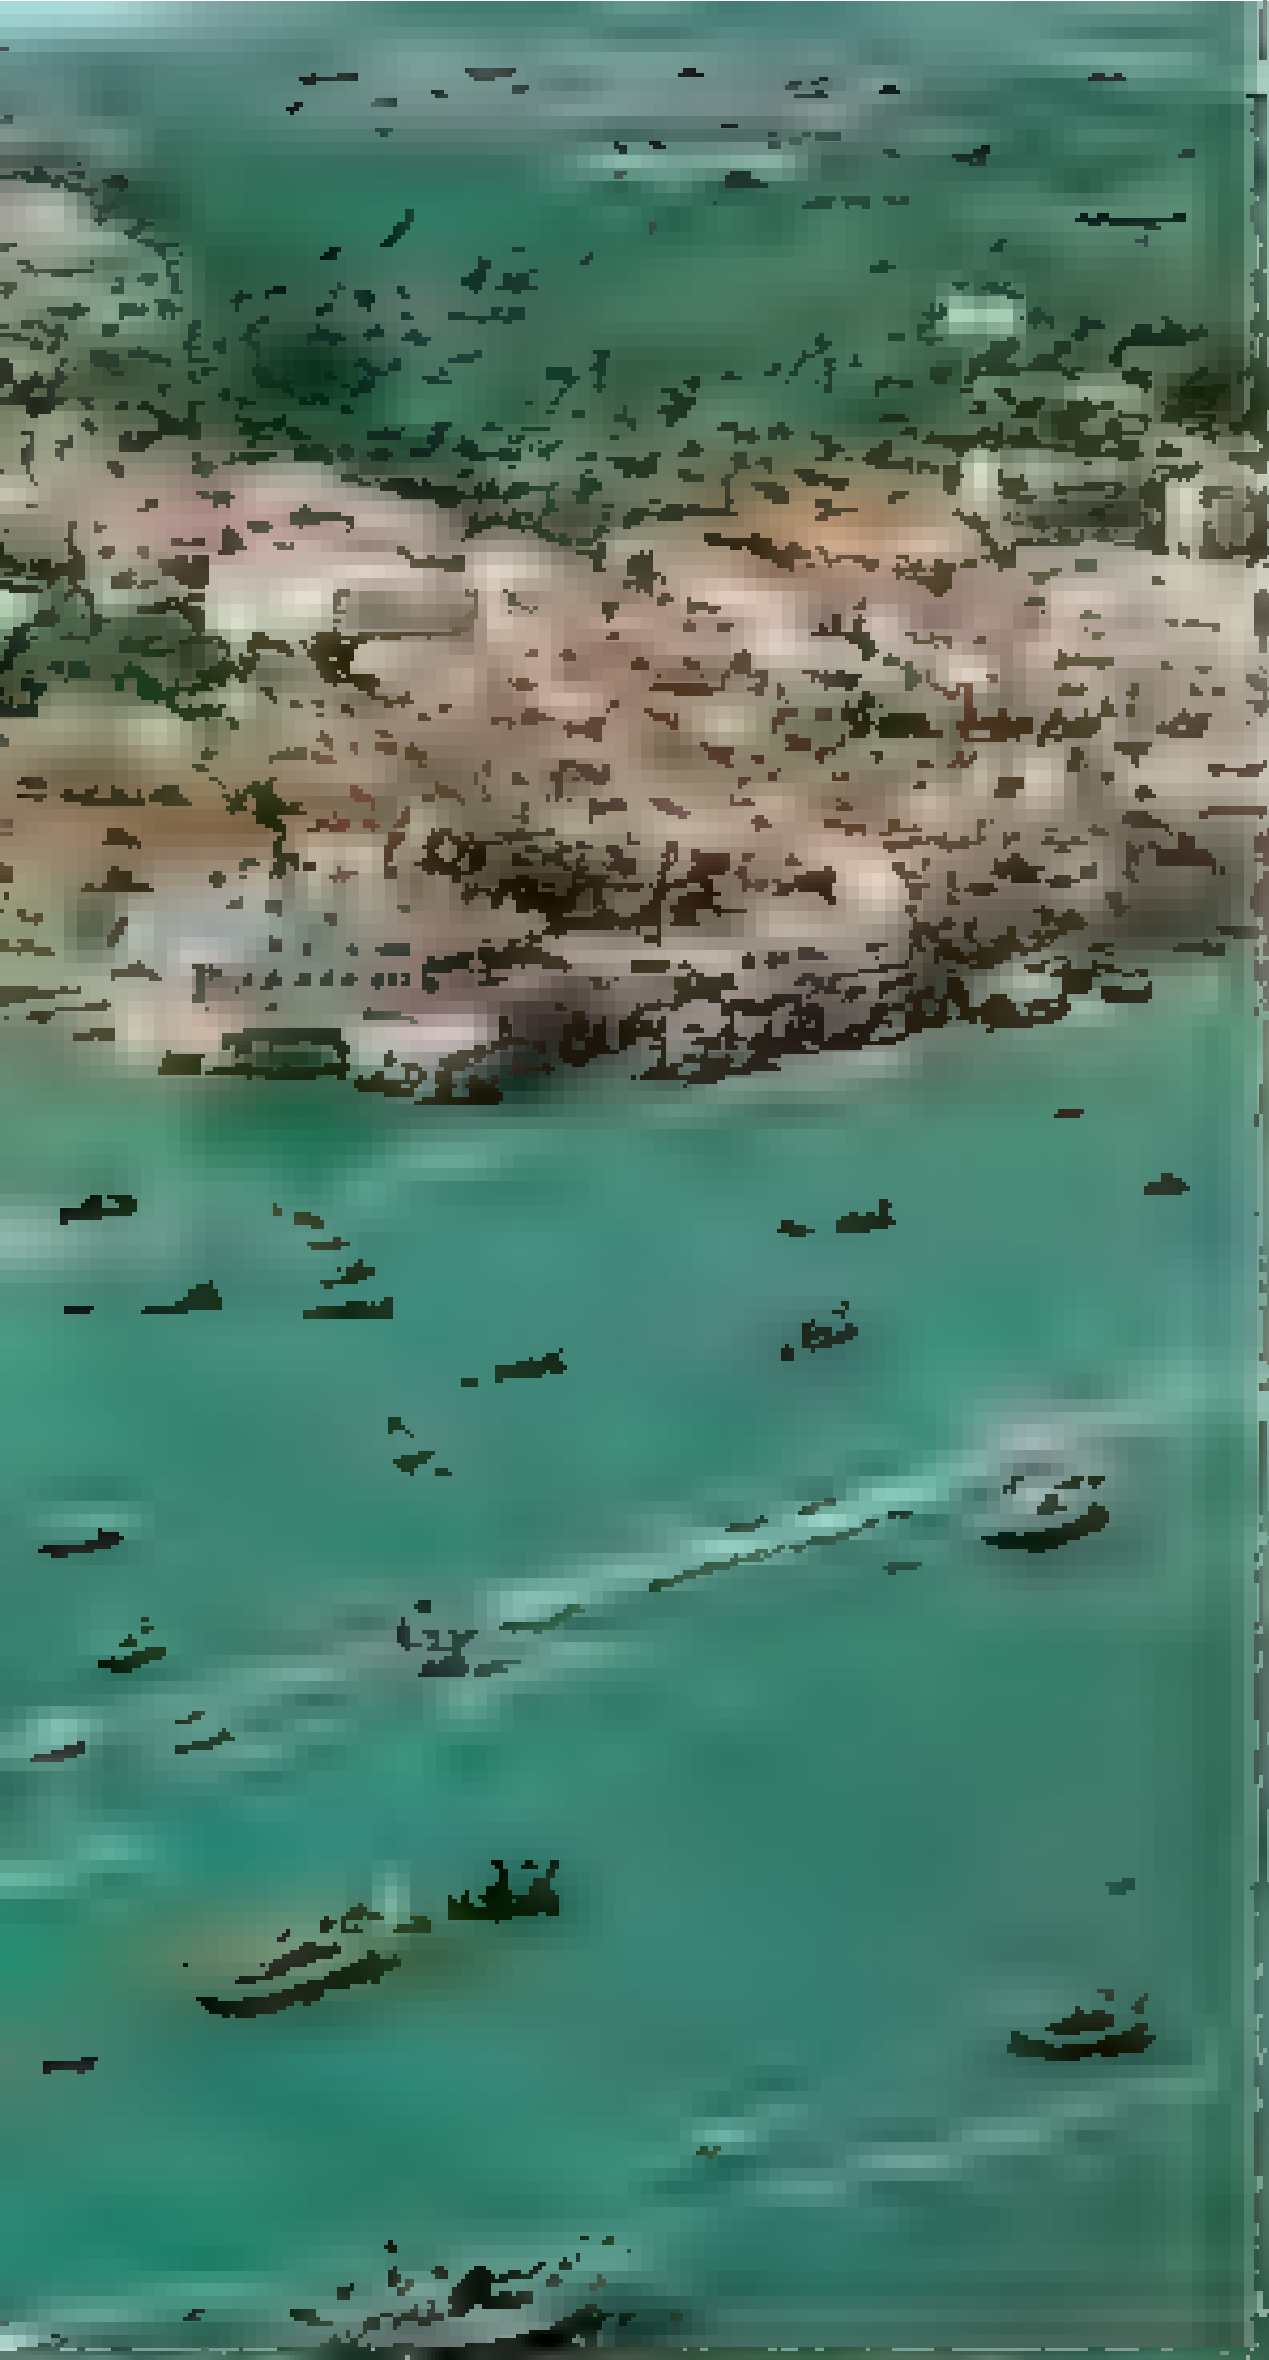

2. The second part of the document is a list of the topics that were discussed at the meeting. The topics are listed in alphabetical order. The topics are: the current state of the company, the future of the company, and the role of the board of directors. The topics are listed in the second column of the table.

3. The third part of the document is a list of the actions that were taken at the meeting. The actions are listed in alphabetical order. The actions are: the board of directors approved the budget for the next year, the board of directors approved the new policy on employee conduct, and the board of directors approved the new policy on environmental sustainability. The actions are listed in the third column of the table.

4. The fourth part of the document is a list of the conclusions that were reached at the meeting. The conclusions are listed in alphabetical order. The conclusions are: the company is in good financial health, the company has a bright future, and the board of directors is committed to the company's success. The conclusions are listed in the fourth column of the table.

5. The fifth part of the document is a list of the recommendations that were made at the meeting. The recommendations are listed in alphabetical order. The recommendations are: the company should continue to invest in research and development, the company should continue to improve its customer service, and the company should continue to focus on environmental sustainability. The recommendations are listed in the fifth column of the table.

The first thing I noticed when I stepped
 out of the boat was the cool, damp air.
 It felt like a warm blanket after a long
 journey. The water was a deep, vibrant
 blue, and the rocks were a mix of dark
 and light colors. I took a deep breath
 and felt a sense of peace wash over me.
 The sun was shining brightly, and the
 water was sparkling. I looked up at the
 sky and saw a few birds flying in the
 distance. It was a beautiful sight, and I
 felt like I had found a new world.

The next day, I went for a walk along
 the shore. The path was made of small
 stones and was very quiet. I saw many
 different types of plants and animals.
 Some were very small, and some were
 very large. I was fascinated by everything
 I saw. The water was still, and the
 rocks were smooth. I took a lot of
 pictures and felt like I was in a
 dream. The sun was setting, and the
 sky was a beautiful orange color. I
 felt like I was in a magical place, and I
 wanted to stay there forever.

The third day, I went to a small
 beach. The sand was very soft, and the
 water was very shallow. I saw many
 different types of shells and stones.
 Some were very small, and some were
 very large. I was fascinated by everything
 I saw. The sun was shining brightly, and
 the water was sparkling. I took a lot of
 pictures and felt like I was in a dream.

The fourth day, I went to a small
 beach. The sand was very soft, and the
 water was very shallow. I saw many
 different types of shells and stones.
 Some were very small, and some were
 very large. I was fascinated by everything
 I saw. The sun was shining brightly, and
 the water was sparkling. I took a lot of
 pictures and felt like I was in a dream.

The fifth day, I went to a small
 beach. The sand was very soft, and the
 water was very shallow. I saw many
 different types of shells and stones.
 Some were very small, and some were
 very large. I was fascinated by everything
 I saw. The sun was shining brightly, and
 the water was sparkling. I took a lot of
 pictures and felt like I was in a dream.

1. \mathcal{H} is a Hilbert space.
 2. \mathcal{H} is a separable Hilbert space.
 3. \mathcal{H} is a reflexive Banach space.
 4. \mathcal{H} is a Banach space.
 5. \mathcal{H} is a normed space.
 6. \mathcal{H} is a linear space.
 7. \mathcal{H} is a vector space.

Went to the new

11/11/11 11:11 AM

1. The first part of the document discusses the importance of maintaining accurate records of all transactions, including sales, purchases, and expenses. It emphasizes the need for consistency and transparency in financial reporting.

2. The second part of the document outlines the various methods used to collect and analyze data, including surveys, interviews, and focus groups. It highlights the importance of selecting appropriate samples and ensuring the reliability of the data collected.

3. The third part of the document describes the process of interpreting the results of the data analysis, including identifying trends, patterns, and anomalies. It stresses the importance of providing clear and concise explanations of the findings.

4. The fourth part of the document discusses the implications of the research findings for policy-making and practice. It provides recommendations for how the results can be used to inform decision-making and improve outcomes.

5. The fifth part of the document concludes the report by summarizing the key findings and reiterating the importance of ongoing research and evaluation in this field.

Abstract The purpose of this study was to determine whether there were differences in the prevalence of risk factors for coronary artery disease between two groups of men who had been exposed to asbestos during their working lives. One group consisted of 60 men who had worked in asbestos-related occupations and the other group consisted of 60 men who had never worked in such occupations. The prevalence of risk factors for coronary artery disease was determined by means of a questionnaire. The results showed that the prevalence of risk factors for coronary artery disease was significantly higher in the group of men who had worked in asbestos-related occupations than in the group of men who had never worked in such occupations.

100

The first of these is the
 fact that the number of
 men employed in the
 industry has increased
 from 10,000 in 1910 to
 15,000 in 1920. This
 increase is due to the
 fact that the industry
 has expanded its
 operations and has
 been able to employ
 more men. The second
 fact is that the number
 of men employed in the
 industry has increased
 from 10,000 in 1910 to
 15,000 in 1920. This
 increase is due to the
 fact that the industry
 has expanded its
 operations and has
 been able to employ
 more men.

The third fact is that
 the number of men
 employed in the
 industry has increased
 from 10,000 in 1910
 to 15,000 in 1920.
 This increase is due
 to the fact that the
 industry has expanded
 its operations and has
 been able to employ
 more men.

Our New Hospital Here to See Ago

The new hospital here
 is a fine building
 and is a great
 improvement on the
 old one. It is a
 fine building and is
 a great improvement
 on the old one. It is
 a fine building and is
 a great improvement
 on the old one.

And the first thing I noticed when I stepped
out onto the beach was the sand. It was
so soft, so warm, and so different from the
cold, hard ground of the city. I had heard
that the beach was beautiful, but I didn't
know how beautiful it could be. The sun
was shining brightly, and the waves were
crashing against the shore. I had never
before, and I was feeling a sense of peace
that I had never felt before. The beach was
just what I needed. I had been so stressed
and so busy, and now I was here, in this
beautiful place, feeling like I had found a
new world.

The Mimos Are on the Coast

The Mimos are a small, friendly people who
live on the coast. They are known for their
kindness and their love of the sea. They
are a peaceful people, and they are always
happy to help anyone who is in need. They
are a people who live in harmony with
nature, and they are always looking for
ways to improve their lives. They are a
people who are proud of their culture and
their traditions, and they are always looking
for ways to share them with the world.

Improving the evening, a William & Mary student, a teacher, her son, Eugene W.

[illegible][illegible]

waiting for a boat that would never return (pages 476-77).

A scant seven miles from Nazaré, in the town of Alcobaça, stands the grandiose Monastery of Santa Maria. But few people enter the austere church to pray. They go rather to savor a strange and terrible love story.

Save for a plain altar, the church contains only two caskets, each carved from a single block of white stone. To the right of the altar lies Dom Pedro I, King of Portugal from 1357 to 1367; to the left, his Spanish mistress Inês de Castro. On her head is a crown. And here begins the story.

Inês had borne Pedro—then the crown prince—several children. Because she was Spanish and because the children complicated the royal succession, certain counselors of Pedro's aging father, King Alfonso IV, urged that she be killed. On a winter day in 1380, Alfonso visited Inês. He made a final demand that the cruelly foreigner abandon his son; she refused. Before the day ended, his executioners murdered her and interred her body in Coimbra.

Sorrowing King Crowns a Dead Queen

At the news of her death, the raging Pedro—who later swore that he and Inês had been secretly married by the Bishop of Braga—rose in revolt against his father. In 1387, he mounted the throne. The guilty counselors fled, but Pedro managed to have two of them executed from Coimbra.

In his cruel and pitiless rage," recounts a chronicler, "he put them to the question himself." He ended by tearing out their living hearts—one from the front, one from the back. Then, the story goes, Pedro exhumed Inês and had her body crowned in a solemn ceremony, then borne in torchlit procession to the tomb at Alcobaça. A few years later the king joined her in death.

Now, in their immortality of white stone, he orders the first to last so that when they rise on Judgment Day, the first sight for each will be the other. In the tomb of the king, the first line on Pedro's sepulcher are the words: *o fim do mundo*—"Until the end of the world."

Almost directly east of the somber resting place of Pedro and Inês, the town of Tomar nestles in the green valley of Rio Nabão. The town above the houses, among pines and cypresses, sprawls the Convent of Christ—a summary in stone of Portuguese history.

In 1160, the Knights Templar erected a fortress church on this spot, then the border between Christendom and Islam. When the

papacy suppressed the Templars in 1314, the Portuguese Order of Christ absorbed the knights' immense local holdings.

The battle-memented church still stands. From its octagonal sanctuary, a muted echo of the Templar church, a narrow passage passed into a refectory room. Here, on austere wooden chairs, the Knights of Christ laid plans for their campaigns. In a square cloister, where Gothic arches framed orange trees, a thousand feet trod numbered slabs, each the remains of a knight, friar, monk, knight warrior who had wielded his sword for God and the defense of a kingdom.

I envy the Navigator, Grand Master of the Order of Christ from 1418 to 1460, diverted his wealth and manpower into his voyages of discovery, and the knights' red cross blazed on the sails of every caravel. Later, as treasure from the Orient poured into Portugal, he gave Manuel the Fortunate what hand Jeronimus added a nave to the convent, and nave so elaborately carved that "the stone sings."

But, in the end, it is the stark simplicity of the Templar church that haunts the imagination. As I left, I noticed a blurred Latin

I Sailed With Portugal's Captain Columbus." William Yellens, National Geographic, May 2005

A black and white photograph of a large, multi-story building with a prominent central tower and many windows, likely a government or institutional building.

2014年12月15日

Synchrotron terahertz

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial matters.

2. The second part outlines the various methods and tools used to collect and analyze data. This includes the use of surveys, interviews, and statistical software to ensure that the information gathered is reliable and valid.

3. The third part focuses on the ethical considerations surrounding data collection and analysis. It highlights the need to protect individual privacy and to use data responsibly, ensuring that it is not misused or shared without proper authorization.

4. The fourth part discusses the challenges faced in the process of data collection and analysis. These challenges include issues related to data quality, sample size, and the potential for bias, which must be carefully managed to ensure the integrity of the research.

5. The fifth part provides a summary of the findings and conclusions drawn from the study. It reiterates the importance of rigorous data collection and analysis practices and offers recommendations for future research and practice.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and financial management.

2. The second part of the document outlines the various methods and tools used to collect, store, and analyze data. It highlights the need for standardized procedures and the use of modern technology to ensure the reliability and integrity of the information collected.

3. The third part of the document focuses on the analysis and interpretation of the collected data. It discusses the importance of identifying trends, patterns, and anomalies, and how these insights can be used to inform decision-making and policy development.

4. The fourth part of the document addresses the challenges and limitations of data collection and analysis. It acknowledges that while technology has advanced significantly, there are still many obstacles to overcome, such as data quality issues, privacy concerns, and the need for skilled personnel to manage and interpret the data.

5. The fifth part of the document provides a summary of the key findings and conclusions. It reiterates the importance of a systematic and transparent approach to data collection and analysis, and offers recommendations for improving the process and ensuring the highest standards of accuracy and reliability.

Easter's Barely Taste, Never Swallow

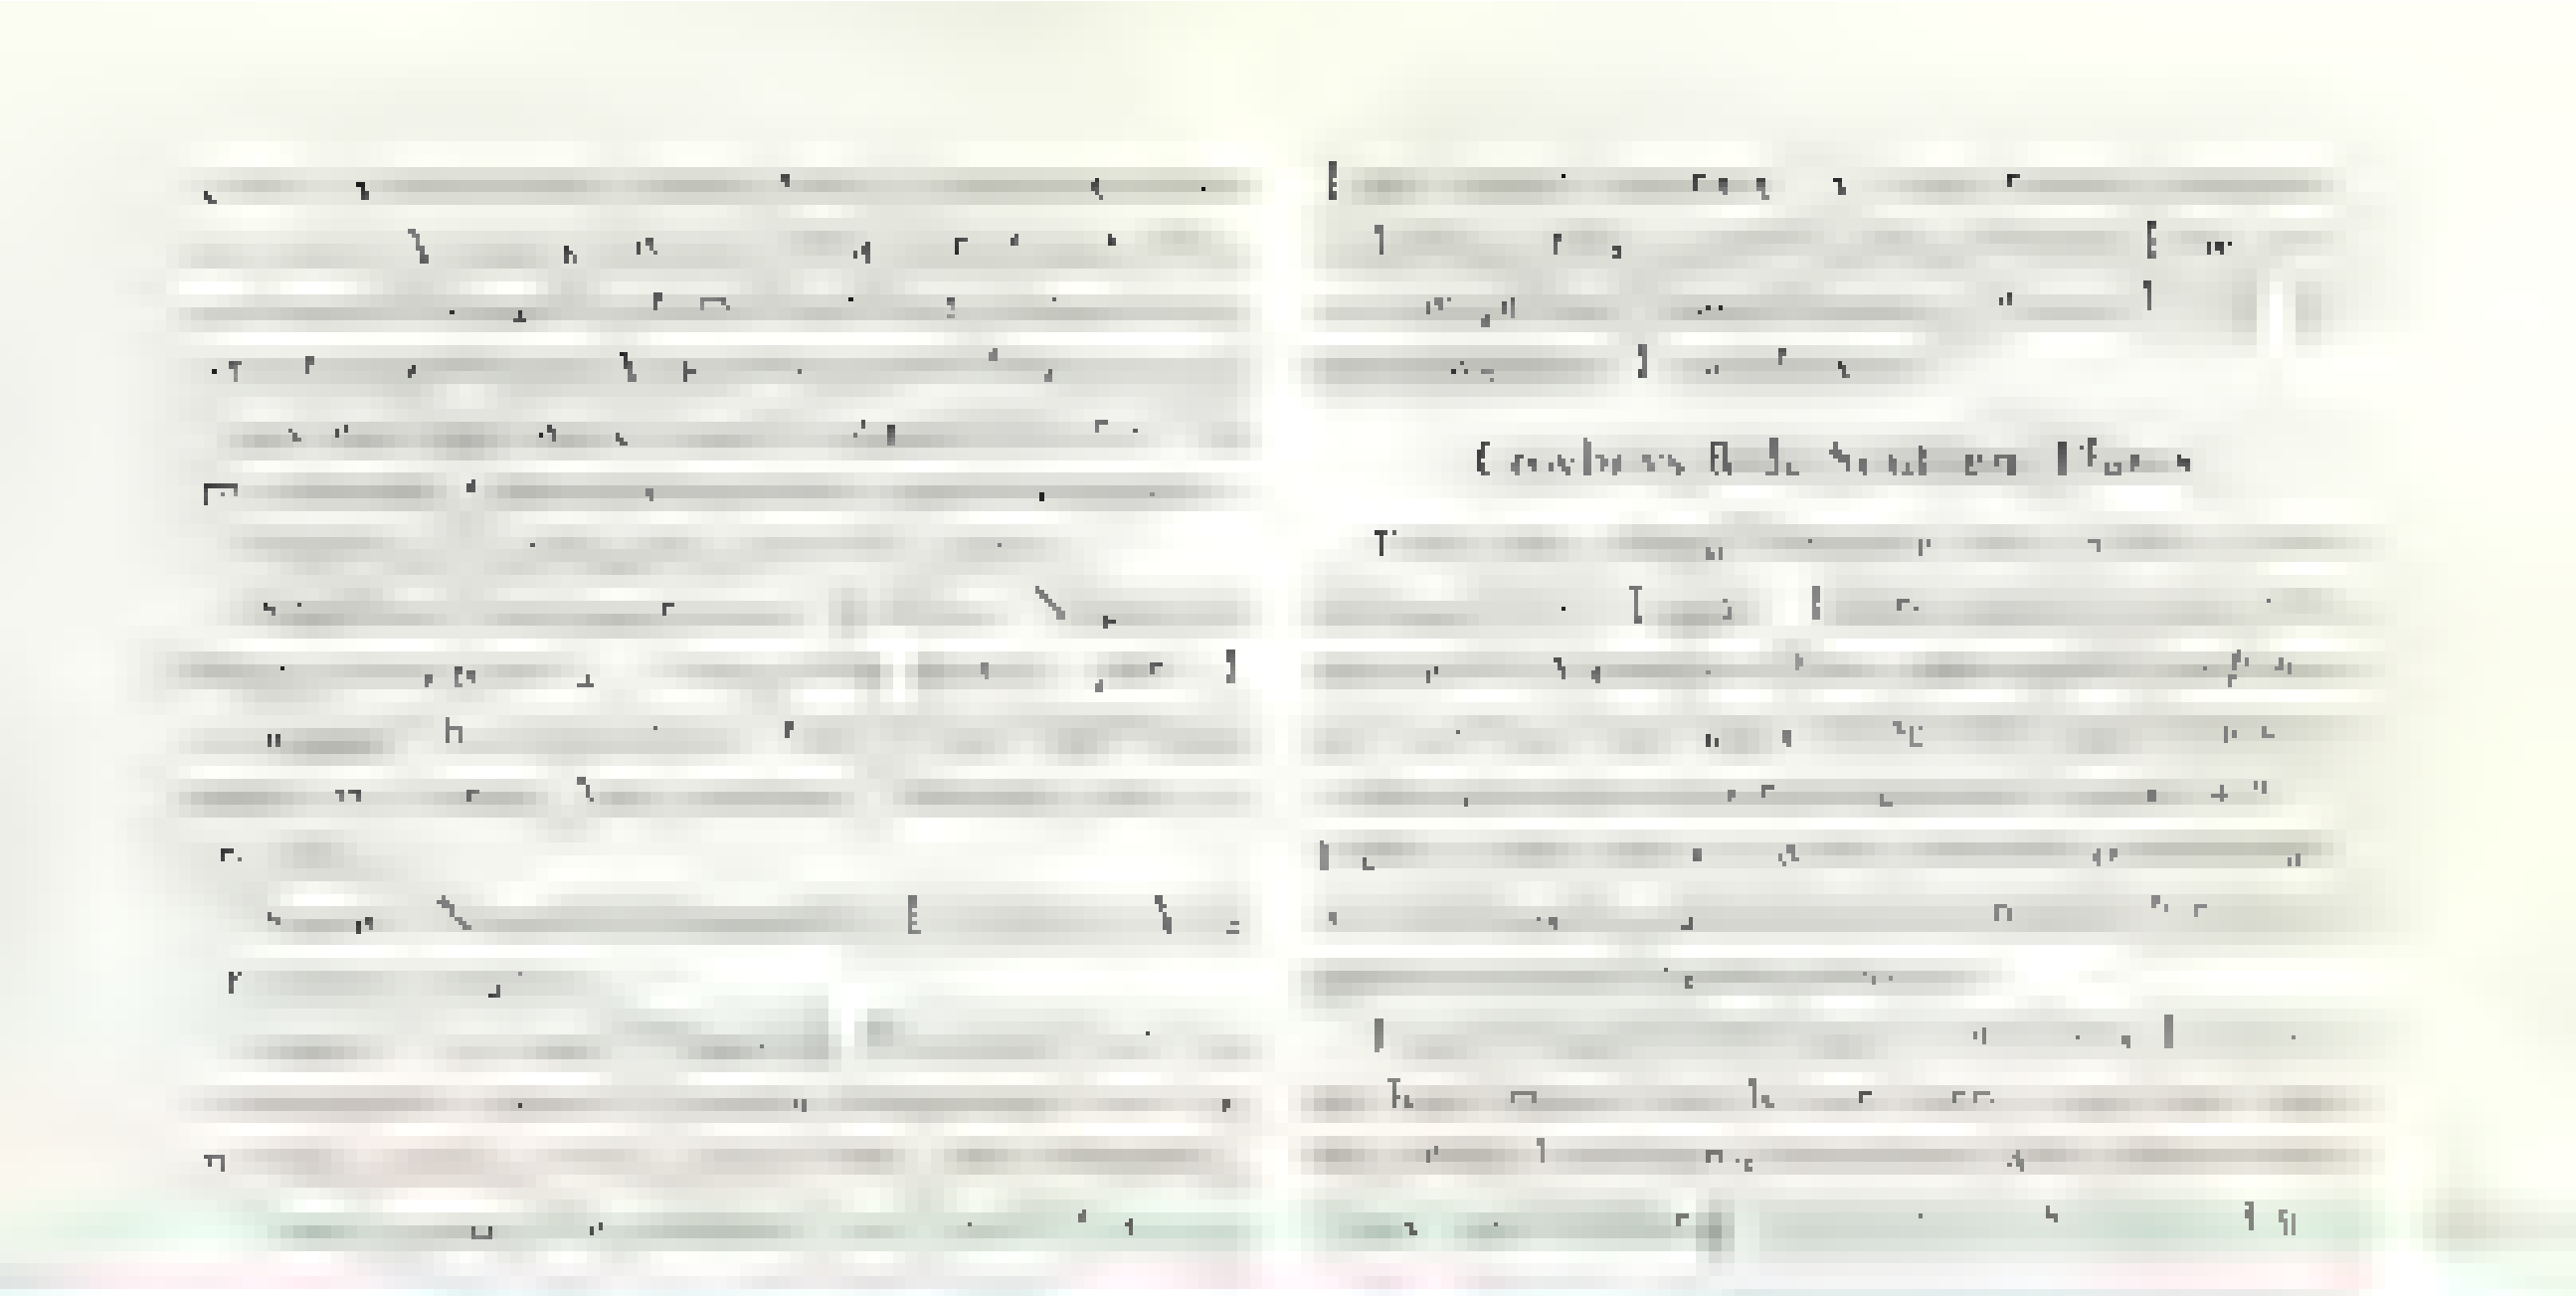

by Instituto do Vinho do

KING OF THE

European Palace of Nations, near Vila Rica

Portrait of a woman in a white headscarf and a patterned vest over a white blouse.

A large, multi-story building with a prominent metal structure, possibly a bridge or a large staircase, extending from the side.

A group of people sitting on the ground in front of a large, ornate structure, possibly a monument or a large doorway.

The image shows a group of people sitting on the ground in front of a large, ornate structure, possibly a monument or a large doorway. The structure has a dark, arched opening and is surrounded by a fence.

Reindeer at a reindeer farm in northern Norway

1. The elves are said to be very small and to live in the mountains and forests.

The first of the three is the most common and is found in all parts of the country. It is a small, mischievous creature who likes to play tricks on people. The second is a more powerful being who can control the elements and is often found in the mountains. The third is the most powerful and is said to be the ruler of all the other spirits. It is a large, fearsome creature who lives in the deepest parts of the forest and is said to be the cause of many of the strange things that happen in the woods.

Horses drawn in a misty, wooded landscape, by a student of the artist.

The first of the horses, a white one, is
 standing in the foreground, facing the
 viewer. It is the only horse in the
 group that is not facing the same
 direction. The other horses are in
 various poses, some facing forward, some
 in profile. The background is a dense
 forest of tall, slender trees, with a
 thick layer of mist or fog. The overall
 tone is soft and atmospheric, with
 muted colors.

16. The first of these is the
fact that the
population of the
country is increasing
very rapidly.

The second of these is the
fact that the
country is becoming
more and more
industrialized.

The third of these is the
fact that the
country is becoming
more and more
urbanized.

perched in a shadowy subterranean galleries that by mysterious ways penetrated far beyond the castle walls into the cellars of the town. Here, a thousand years ago, Moorish kings had stored food for their garrisons.

Ascending to the battlements, I gazed out over the rich fields surrounding Silves. The old man I'd seen earlier had led toward me and batted his arthritic hands clasping the hilt of a cane. "Senhor," he said, "what do you think of our castle?"

"It is very old," I answered, "and beautiful."

"Yes," he said. "The Moors built well. For instance, that great cistern you suspected—Cisterna da Moura Encantada—still supplies water to Silves. I am a man of this town—a Portuguese and a Christian, proud of my ancestry who took Silves from the infidel. But each year I see it decay a little more. And, forgive me, I feel a certain nostalgia for the magnificence of the past. So I come here every day."

Love Opens a Gateway to Treason

I nodded. My hand, I thought, the crest of an army, clutched the massive wall.

"Yes, senhor," said the old man. "The castle is very thick. The Moors thought them impregnable. No army of that time could have taken this castle by storm. And none did."

"How, then, did it fall?"

He pointed to a narrow opening in the north wall. "That is the *Porta da Traição*, the Gate of Treason. You see, the Moorish King, Aben Afar, had a daughter who fell in love with one of the Christian knights besieging the castle. They exchanged notes, and he persuaded her to meet him one night at the gate. When she opened it, the Christians swarmed in and massacred the garrison."

"What happened to the princess?"

He shrugged. "Who knows? Tradition holds that every year she appears at midnight at midnight on the Feast of St. John to sing a sad Arabic song. That's why we call her the Cisterna of the Enchanter Moor. Perhaps." He smiled, "see how I am regretting."

Algarve—land of legends and of dreams. I strongly encourage, I ended my trip at Porta

de Sagres. Here at the bleak and wintry southern tip of Portugal, Prince Henry the Navigator had revolutionized the art of seafaring. In an age when ships never willingly ventured out of coastal waters and knowledge of the sea ended at the horizon, Henry had decided to plunge into the gray unknown stretching west and south of Sagres.

He recruited sailors, scholars, and scientists from all Europe and brought them together near this lovely bend and. Patiently, he shared their lore; quietly, he labored among charts and astrolabes. In time, he showed his countrymen—condemned by the cruel realities of geography to a marginal existence on the edge of a continent—the sea path to greatness. And they followed it.

The sea does not smile at Sagres. Even on the sunniest day it claws and smooches at the base of the high dolomite cliffs. From their edge I gazed out into a sullen infinity of ocean. Five centuries ago Henry had stood there. The soot-stained awning had bowed beyond the peeling waves, and a vision of far lands had dazzled his eyes.

The prince died in 1460, before the greatest of the discoveries, before Dias and da Gama and Cabral and Magalhães—known to the world as Magellan. Had his was the moment, for the spirit that guided those voyages as surely as if he had plotted their courses with his own hand.

So I stood there at Sagres, on the flat headland ravaged by salt winds, where Henry had given the Portuguese their empire. A business had lost it at Ksar el Kebir, João IV had wrested some of it back from Spain in 1640. But the 17th century saw the loss of Brazil and central Africa. In 1961, Goa, Damão, and Diu—Portuguese for 400 years—passed to India. And now violence mutters the distant thunder in the last of the African territories.

I looked at the hostile ocean, and I wondered if our own age would finally answer the question that has haunted Portuguese history since the time of Henry: Portugal has followed a cross and a flag beyond the seas—to what destiny?

THE END

Scarlet Cross of Christ still roves the seas. Along a calm Atlantic, the Portuguese schoolship *Sagres* and Spain's *Juan Sebastian de Pantoja* leave La Coruña at the start of the 19th century. In the 15th century, the first of the 15th-century caravels—cruisers—sails bear the cross of the Order of Christ. She carries the name of the headland whence Prince Henry the Navigator watched his ships set sail for the ends of the world.

Bizarre World of the Fungi

Article and photographs by
PAUL A. ZAHLE, Ph.D.
Assistant Professor, Southern State
University, Norfolk, Virginia

On a recent trip to the mountains of North Carolina, I was struck by the variety of fungi that I encountered. In the forest, I found many different types of mushrooms, some of which were quite rare. I was particularly interested in the ones that had bright colors, such as red, orange, and yellow. These were often found growing on decaying wood or on the forest floor. I was also interested in the ones that had a more unusual shape, such as the ones that looked like small, white, fluffy balls. These were often found growing on the forest floor, and I was curious to know what they were. I decided to take some of these fungi home with me, and I was determined to find out what they were. I took them to a local mycologist, and he told me that they were all different types of fungi. Some of them were very rare, and he said that I had found a new species. I was very excited, and I decided to write about my experience. I hope that this article will help you to learn more about the world of fungi, and that it will inspire you to go out and explore it for yourself.

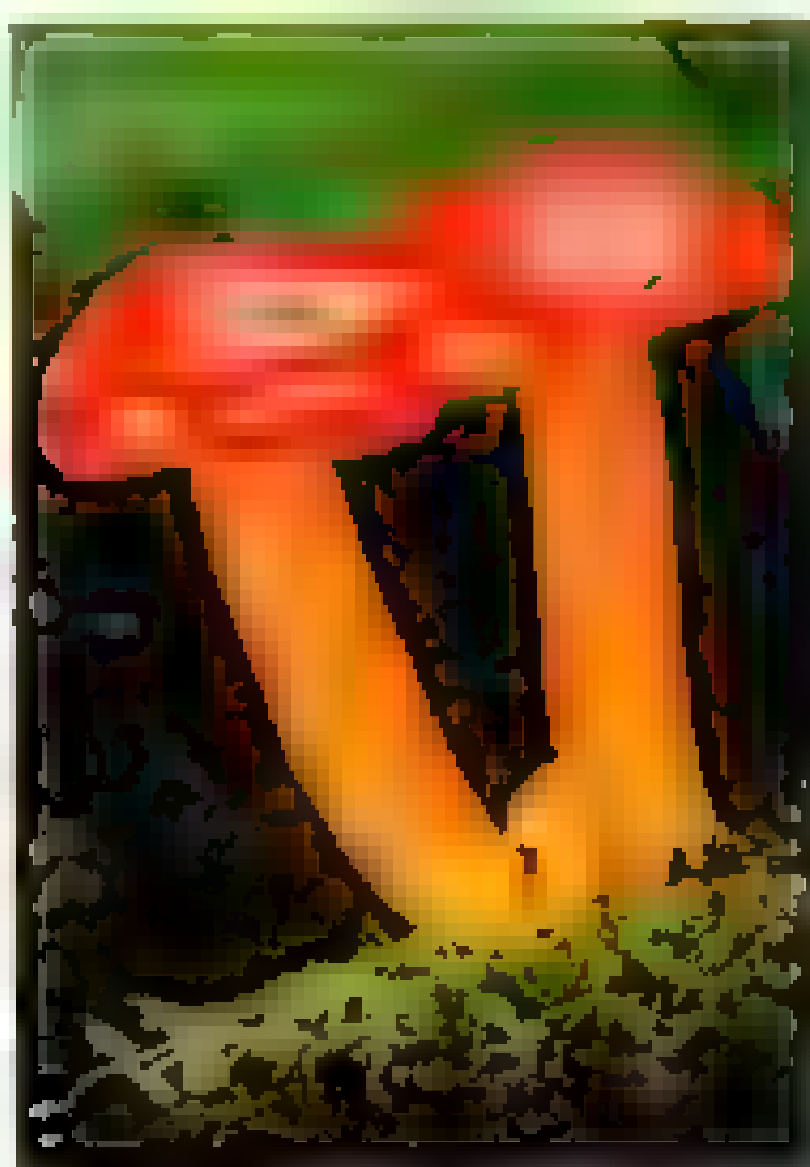

Forest As a Microbiome

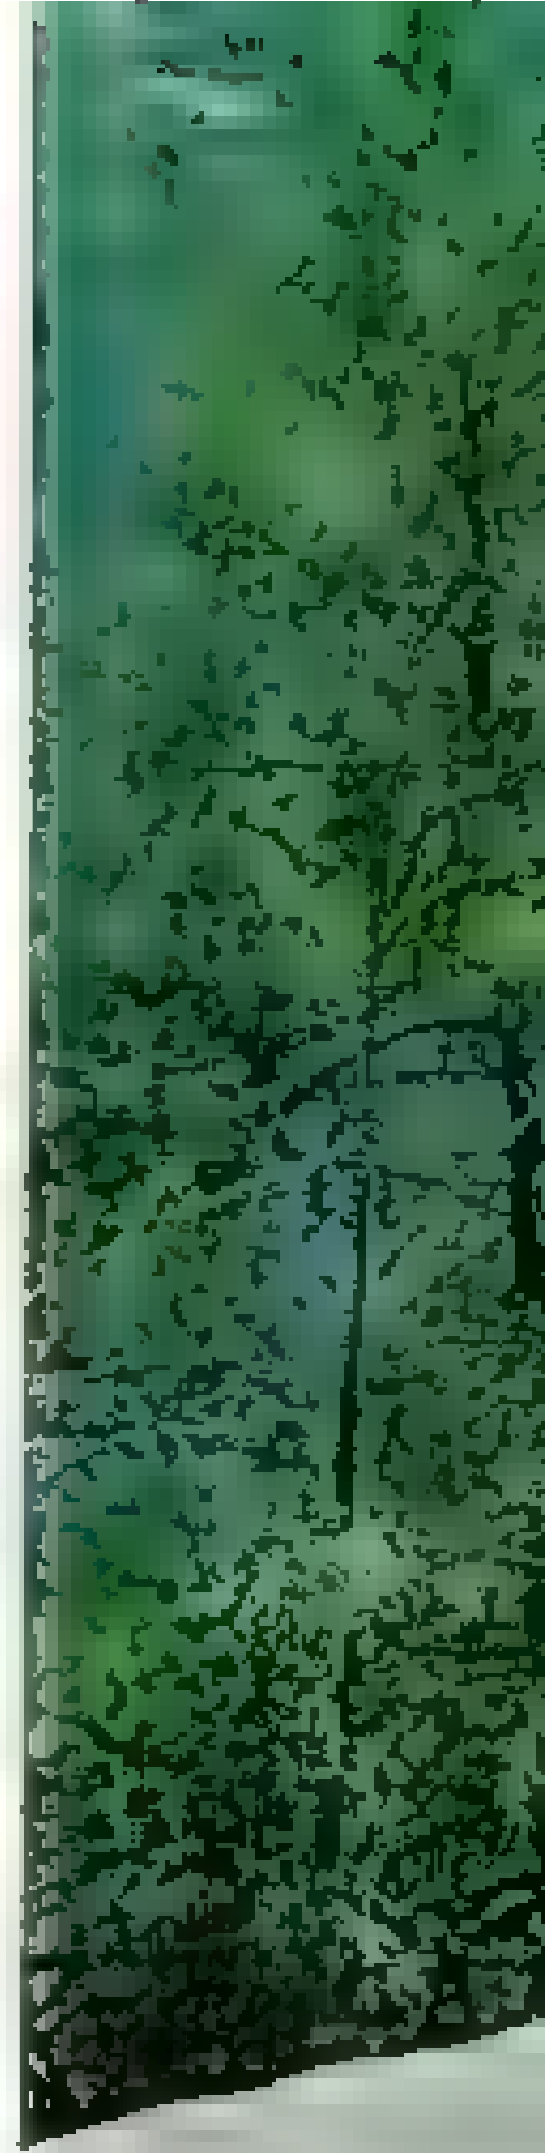

The forest is a complex and diverse ecosystem, and it is home to a wide variety of fungi. These fungi play a vital role in the forest ecosystem, and they are responsible for many of the processes that keep the forest healthy. For example, they help to break down dead organic matter, and they provide a source of food for many other organisms. They also help to regulate the pH of the soil, and they can protect plants from disease. In addition, they can form symbiotic relationships with plants, and they can help to improve the growth of certain types of plants. The forest is a truly amazing place, and it is a testament to the power of fungi. I hope that this article will help you to appreciate the world of fungi, and that it will inspire you to go out and explore it for yourself.

Wood heart of a mushroom

[illegible]

A handwritten musical score for the song "The Rose Tree". The score is written on ten staves. The first staff begins with a treble clef, a key signature of one sharp (F#), and a 2/4 time signature. The melody is written in a simple, folk-like style. The lyrics "The Rose Tree" are written below the first staff. The score continues with several more staves, each with its own line of lyrics. The handwriting is in ink and appears to be from a 19th-century manuscript. The paper is aged and slightly discolored.

[illegible]

Key to common lethal fungi (shown on facing page)

1. The first part of the document is a title page. It contains the title "THE HISTORY OF THE UNITED STATES OF AMERICA" and the author "BY JAMES M. SMITH".

2. The second part of the document is a table of contents. It lists the chapters and their corresponding page numbers.

3. The third part of the document is the first chapter, titled "THE DISCOVERY OF AMERICA". It describes the early exploration of the continent by Christopher Columbus and other European navigators.

4. The fourth part of the document is the second chapter, titled "THE SETTLEMENT OF AMERICA". It discusses the early colonial settlements and the challenges faced by the settlers.

5. The fifth part of the document is the third chapter, titled "THE REVOLUTIONARY WAR". It covers the events leading up to the war and the battle of independence.

6. The sixth part of the document is the fourth chapter, titled "THE CONSTITUTION". It explains the formation of the United States Constitution and the principles of federalism.

7. The seventh part of the document is the fifth chapter, titled "THE WESTERN EXPANSION". It describes the westward movement of settlers and the impact on Native American populations.

8. The eighth part of the document is the sixth chapter, titled "THE CIVIL WAR". It details the conflict between the Union and the Confederacy and its consequences.

9. The ninth part of the document is the seventh chapter, titled "THE RECONSTRUCTION". It discusses the efforts to rebuild the South and the challenges of integrating African Americans into society.

10. The tenth part of the document is the eighth chapter, titled "THE MODERN UNITED STATES". It covers the period from the end of the Civil War to the present day, including the Progressive Era, the Great Depression, and World War II.

lanceful hunters for I knew that even harmful mushrooms may play a useful role. Underground filaments of certain fungi entwine and invade the roots of particular trees and other plants to their mutual advantage. Collectors have noted that *Boletus edulis* prefers to grow near pines, *Boletus apothecarius* near larch. *Boletus* is also found near spruce, fir, and aspen, birch, larch and

Benefits Flow in Two Directions

With their filaments, the fungi have a superior capacity for absorbing nutrients; these essences they carry to the tree. The tree, in turn, manufactures carbohydrates through photosynthesis and transports these to its roots, where the fungus utilizes them as nourishment.

Plant Issues 353 on page 3 are old revealing the presence of root-dwelling fungi. Over the eons, some plants have come to depend

fully on this association for their growth and sustenance, an association known as mycorrhiza. The Indian pipe (page 524), for example, dwells in deep forest. Unable to make its own food by photosynthesis, it depends for sustenance on a fungus which acts as a pipeline between it and an open world.

Over the long recorded effort of a French forest seed and a French horticulturist, a culture of fungal filaments revealed

the role of much knowledge gained in recent years. Many details of these relationships are still unclear to botanists.

For some New Jersey countryside revealed another curiosity of fungus life. In a field of rush grass, I came upon a nearly perfect mushroom fairy ring about 20 feet across (above). In such circles, hundreds of old-timers and the "wee folk" came to dance at night.

Some species cause a withering of grass or even a ring, suggesting the wear and tear of

Task 10.2

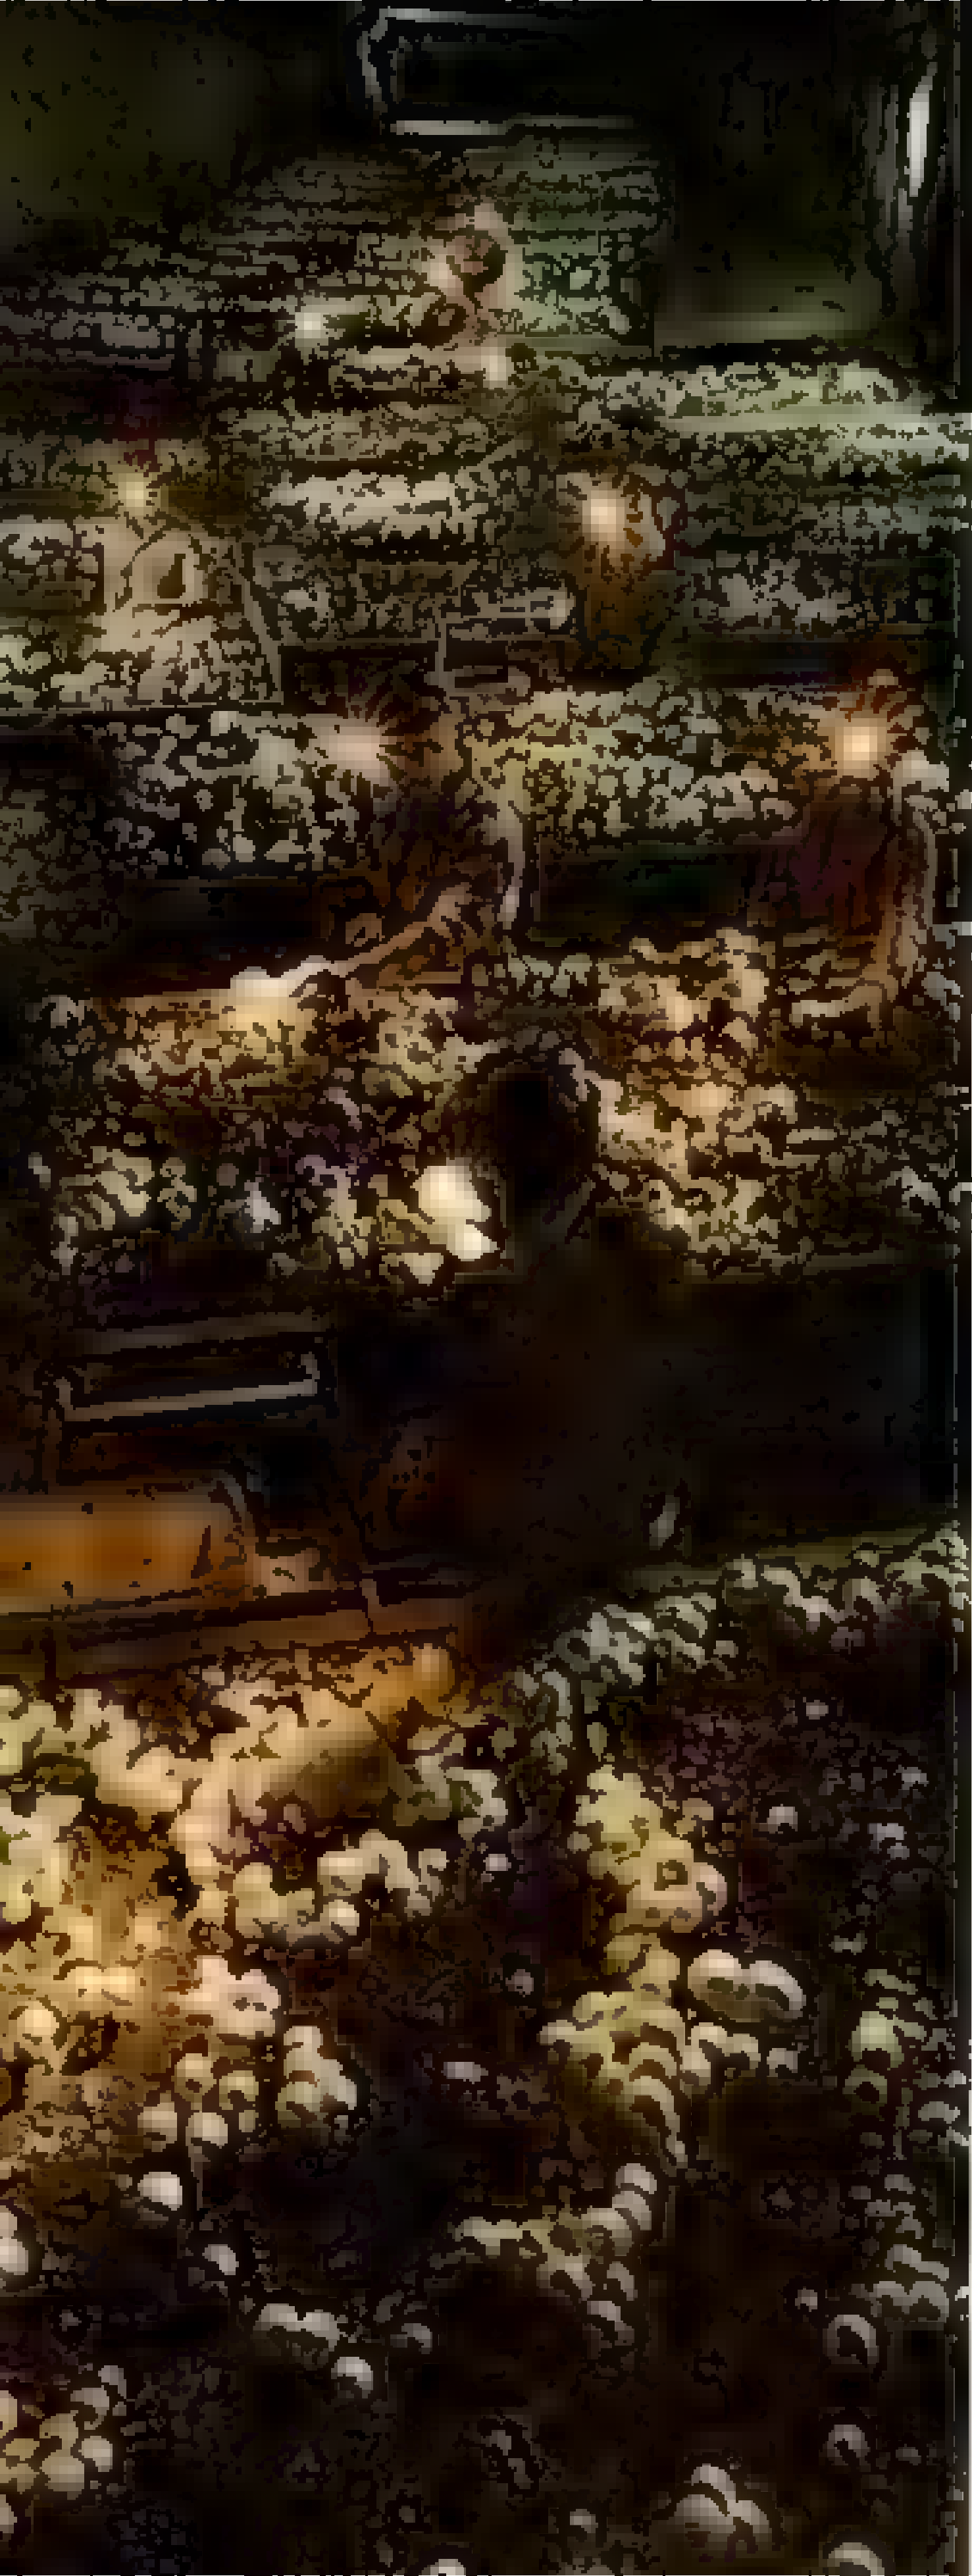

1. The first part of the text describes the situation in the park. The children are playing in the park and have found some small, round objects. They are curious about what they are and decide to investigate.

2. The second part of the text describes the children's investigation. They use a magnifying glass to look at the objects and find out that they are seeds. They also find out that the seeds are from a tree that is in the park.

commonly grown are the nutcracker truffle (*Cantharellus cibarius*), the oyster mushroom (*Pleurotus ostreatus*), the porcini mushroom (*Boletus edulis*), the beefsteak fungus, *Hydnum hepaticum*, the giant puffball, *Cauloboletus giganteus*, the saffron milk cap, *Lepista nuda*, and the morels (*Morels*). The truffle is a delicacy and is highly prized.

Mushroom Pickers Wear Miners' Hats

In the Better County Mushroom Farm, the trays are allowed for the spawn to penetrate the compost. Then a top layer of rich soil is added, and the trays are stacked in the room's humidity. Three weeks later, when tiny white spheres begin to appear on the surface of the soil, in 60 hours they may attain a football size. When the mushrooms are picked up, they are then harvested for the market.

—The Truffle Hunter

transport by refrigerated vans to canning and produce centers as far away as Milwaukee and New York.

In the farm's spore and seed laboratory, I

was told that the mushrooms are grown on a scale by a number of farmers.

"Certainly," he said. "There are scores of small mushroom growers all over the country. In France it has become a big industry. However, we regard cultivation as a hobby, not a business."

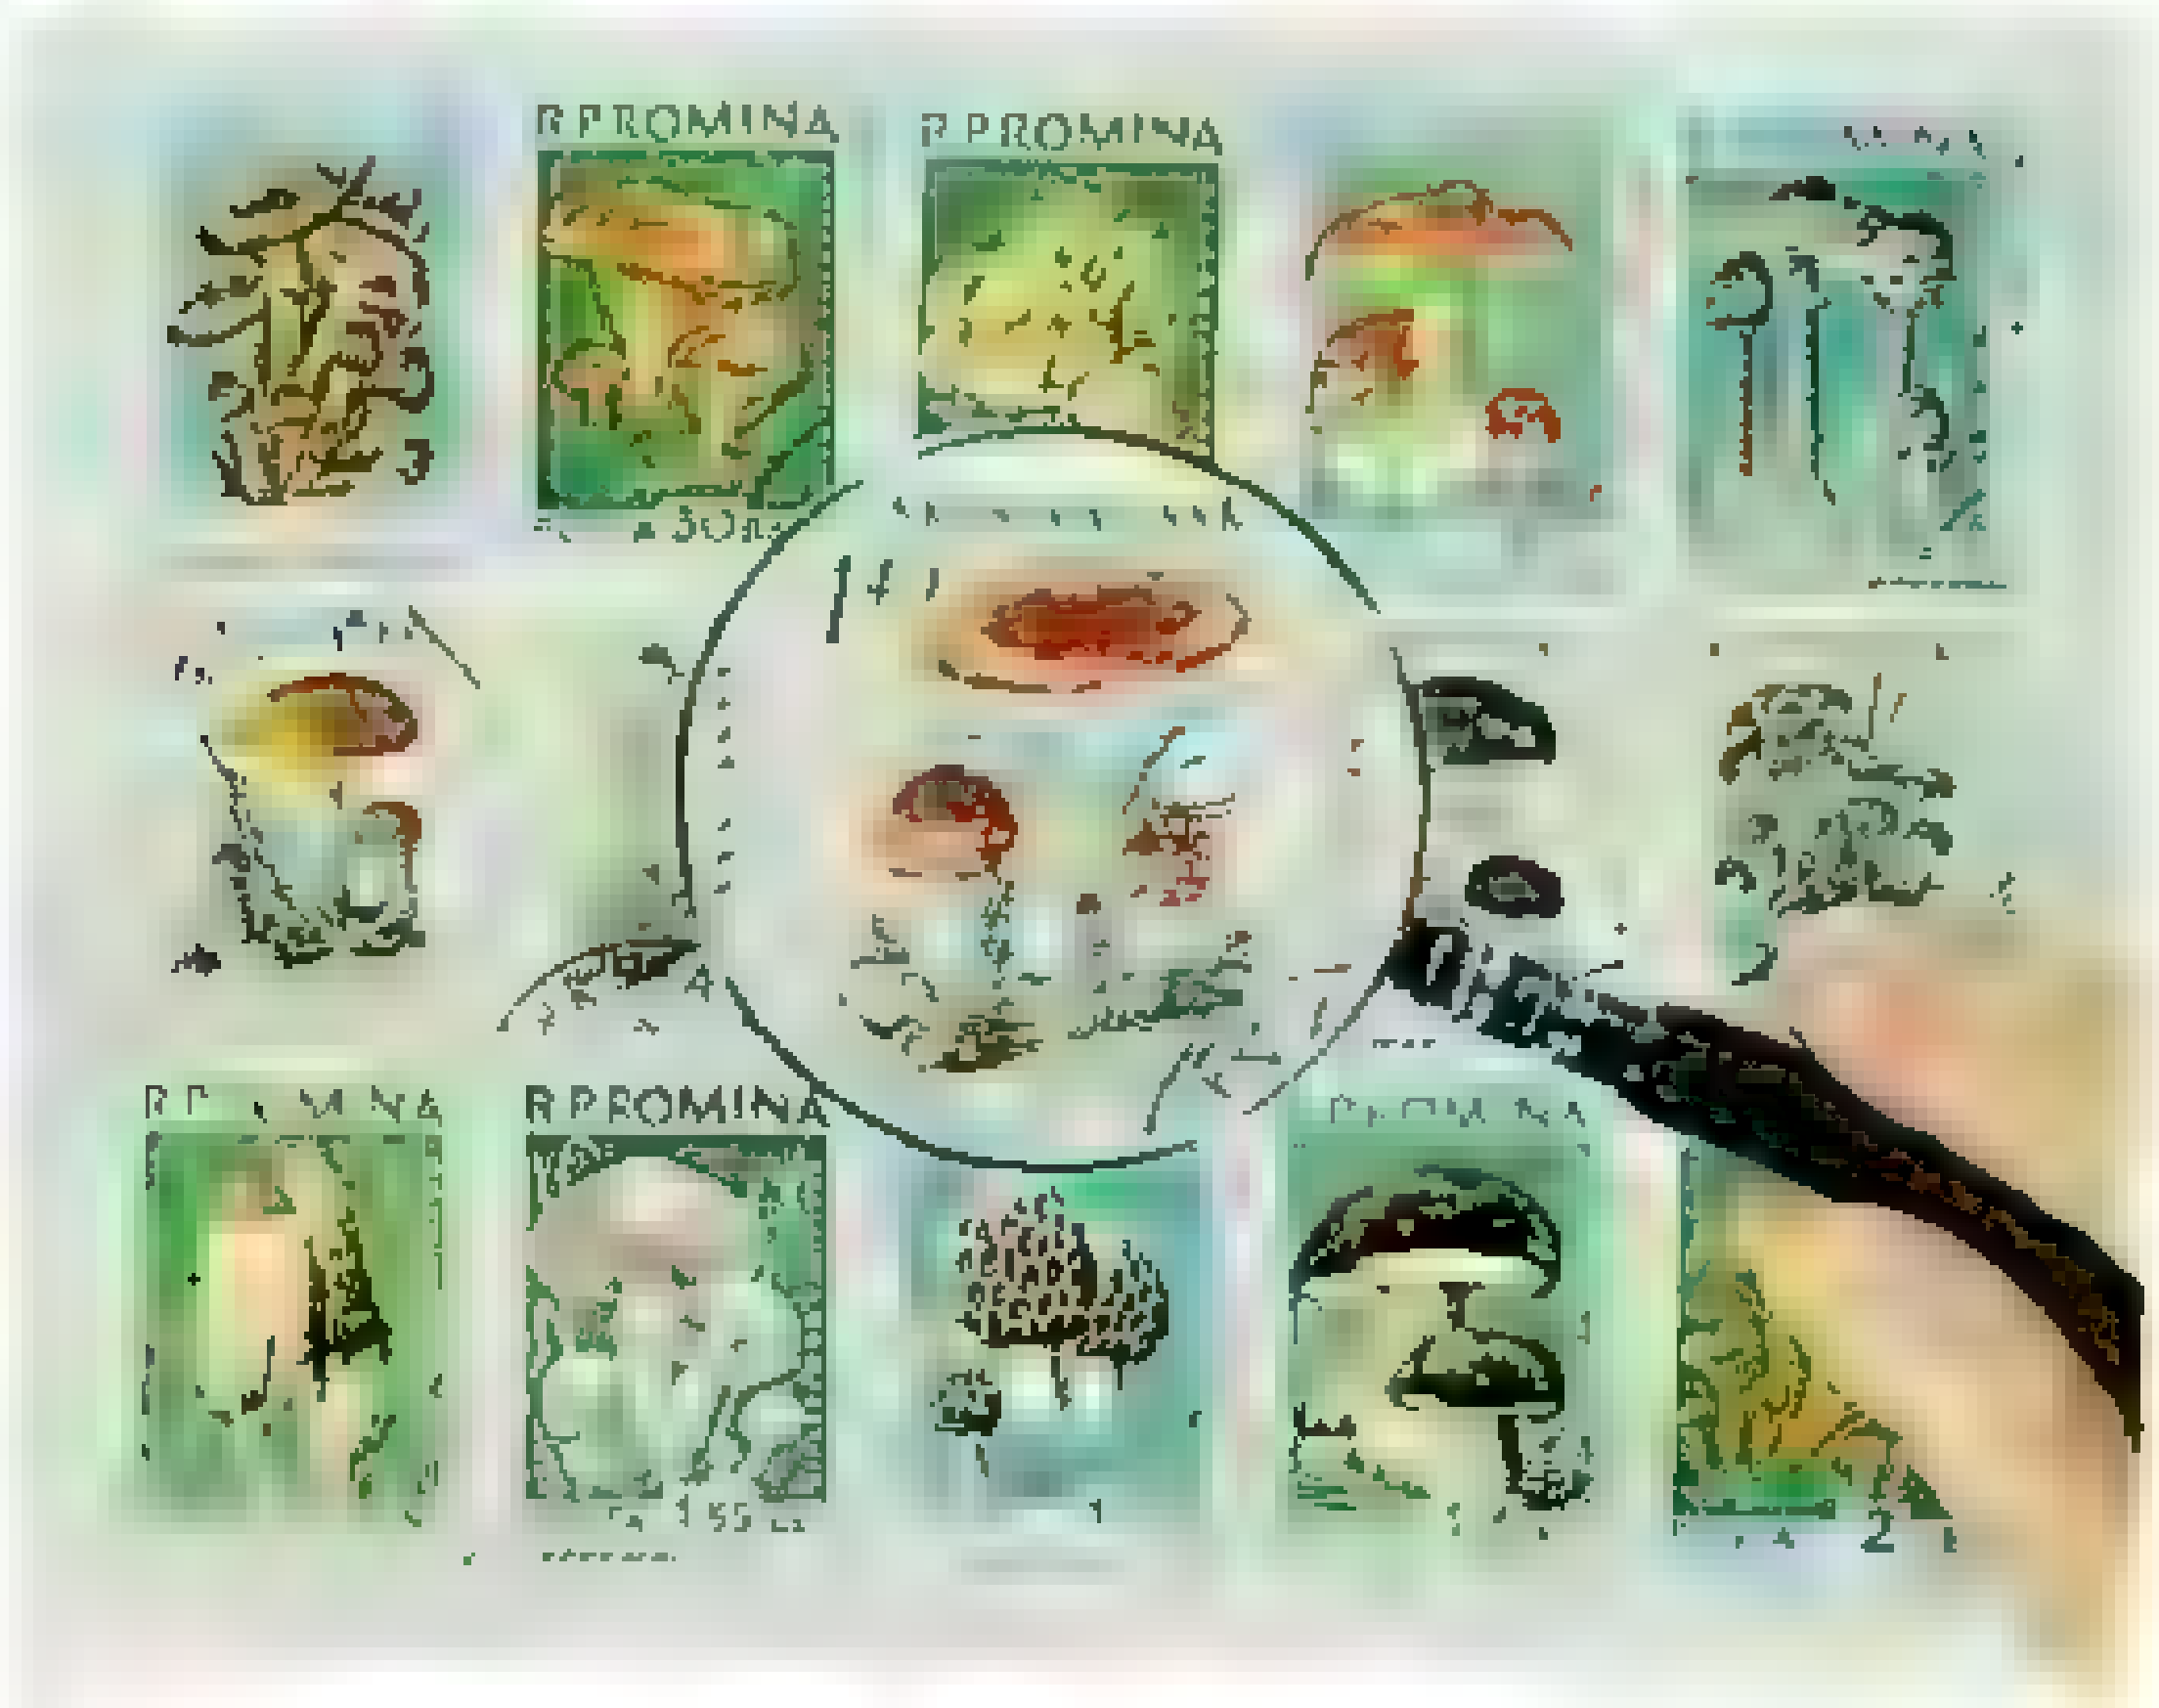

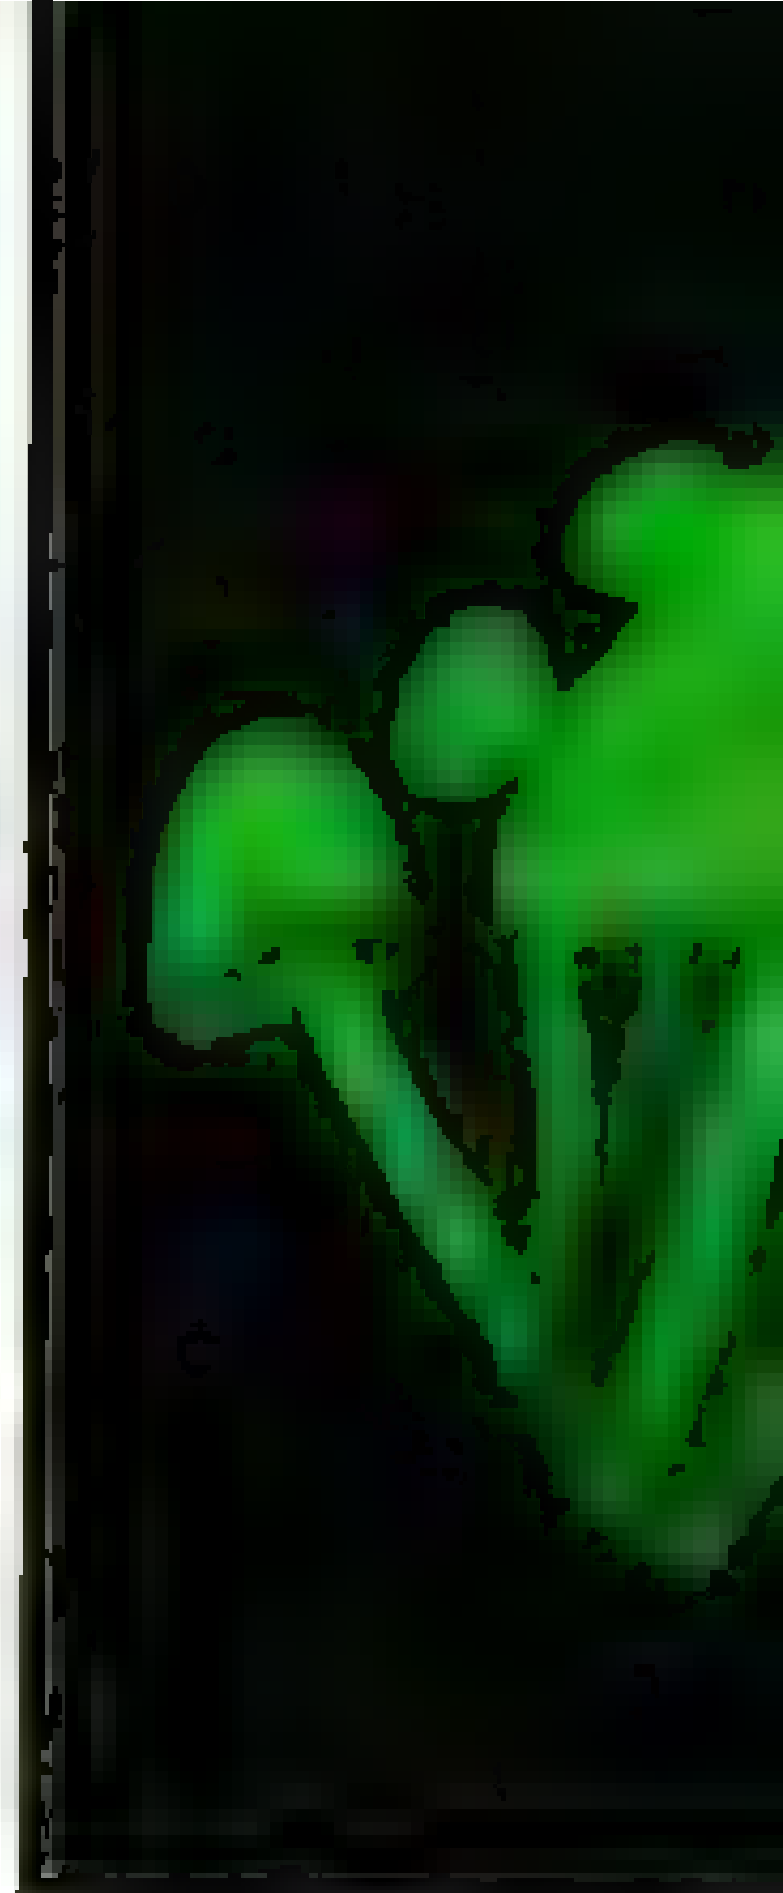

Mushrooms, he added, are a good source of food, but they are also a source of many diseases. Raising them so calls for careful attention to temperature, humidity, and soil condition.

The fungus group of which mushrooms are a part has four major divisions. One of these divisions has over 1,000 species, of which the common mushroom, *Pleurotus*, is the most common. The other three divisions are the truffles, the mushrooms, and the mushrooms.

Photograph of the object

Measurements of the object

They are not as large as the ones I have seen in the past. They are not as large as the ones I have seen in the past.

Count Montana pulled out a white, round object about the size of a golf ball. Its diameter in the days before matches the one I served as timber for the La Borne from.

Spores escape through openings in the *Phallops* and *maculae*, two life-size, flat, round, lace insects that scatter the

This image shows a blank, aged, cream-colored page, likely an endpaper or flyleaf of a book. The paper has a slightly textured appearance with some minor creases and discoloration, characteristic of old paper. A dark, textured object, possibly a binding or a piece of fabric, is visible along the left edge. The page is set against a dark background.

By MELVILLE BELL GOSWELDER, LL.D., & D.
President and Editor Southern Geographic Society

After the first day of the conference, the delegates were divided into groups to discuss the various topics. The first group, consisting of the delegates from the United States, Canada, and Mexico, discussed the current state of the North American Free Trade Agreement (NAFTA). The second group, consisting of the delegates from the European Union, discussed the challenges facing the EU in the wake of the Brexit vote. The third group, consisting of the delegates from the African Union, discussed the impact of climate change on the continent. The fourth group, consisting of the delegates from the Asian Pacific Economic Cooperation (APEC) forum, discussed the challenges facing the region in the wake of the trade tensions between the United States and China. The fifth group, consisting of the delegates from the Organization for Economic Cooperation and Development (OECD), discussed the challenges facing the organization in the wake of the global financial crisis. The sixth group, consisting of the delegates from the World Health Organization (WHO), discussed the challenges facing the organization in the wake of the Ebola outbreak. The seventh group, consisting of the delegates from the United Nations (UN), discussed the challenges facing the organization in the wake of the Syrian conflict. The eighth group, consisting of the delegates from the International Monetary Fund (IMF), discussed the challenges facing the organization in the wake of the global financial crisis. The ninth group, consisting of the delegates from the World Bank, discussed the challenges facing the organization in the wake of the global financial crisis. The tenth group, consisting of the delegates from the International Labour Organization (ILO), discussed the challenges facing the organization in the wake of the global financial crisis. The eleventh group, consisting of the delegates from the United Nations Development Programme (UNDP), discussed the challenges facing the organization in the wake of the global financial crisis. The twelfth group, consisting of the delegates from the United Nations Children's Fund (UNICEF), discussed the challenges facing the organization in the wake of the global financial crisis. The thirteenth group, consisting of the delegates from the United Nations Women's Fund (UNWOMEN), discussed the challenges facing the organization in the wake of the global financial crisis. The fourteenth group, consisting of the delegates from the United Nations Population Fund (UNFPA), discussed the challenges facing the organization in the wake of the global financial crisis. The fifteenth group, consisting of the delegates from the United Nations High Commissioner for Human Rights (UNHCR), discussed the challenges facing the organization in the wake of the global financial crisis. The sixteenth group, consisting of the delegates from the United Nations Office for the Coordination of Humanitarian Affairs (OCHA), discussed the challenges facing the organization in the wake of the global financial crisis. The seventeenth group, consisting of the delegates from the United Nations Office of the High Commissioner for Human Rights (OHCHR), discussed the challenges facing the organization in the wake of the global financial crisis. The eighteenth group, consisting of the delegates from the United Nations Office of the High Commissioner for Human Rights (OHCHR), discussed the challenges facing the organization in the wake of the global financial crisis. The nineteenth group, consisting of the delegates from the United Nations Office of the High Commissioner for Human Rights (OHCHR), discussed the challenges facing the organization in the wake of the global financial crisis. The twentieth group, consisting of the delegates from the United Nations Office of the High Commissioner for Human Rights (OHCHR), discussed the challenges facing the organization in the wake of the global financial crisis.

1. *What is the main purpose of the study?*

Tidbit entices a purple gallinule within kissing distance of naturalist-photographer Fredrick Kent Truslow. A peanut in his teeth attracts the Florida marsh bird, supplementing skill with endless patience. Mr. Truslow includes birds as they can be seen only in their native haunts. His cameras captured many of the 480 photographs reproduced in *Water Fowl, and Game Birds of North America*. Included are these remarkable pictures of the common egret (opposite and below) and the extremely rare California condor. The volume presents comprehensive biographies of 349 species with brilliant color illustrations, anecdote, and scientific detail. It completes the Society's work on *North American Birds*.

magination of the National Geographic Society's latest "singing bird book"—*Water Fowl and Game Birds of North America*.

With the delightfully illustrated *Water Fowl and Game Birds of North America* comes a long-playing record album that brings the wild, haunting voices of nature into the reader's living room.

Together, they make up a timely and appropriate companion to your home's first singing book, *Song and Garden Birds of North America*, published last year. The two volumes cover all the 650 major species of birds big and little to be found in the United States and Canada.

Members who responded at our meeting are into the sound will be pleased with the new *Water Fowl and Game Birds of North America*. I hope of listening to voices even more varied than the melodies of the songsters.

With the proof of the book before me and recordings sounding from my record player I can see again the parkery I knew in my youth. And how else? I remember one personal experience with a great blue heron.

It was a young bird that had tumbled from the nest. Unable to fly, it floundered about clumsily on the ground.

"Can we take it home?" we asked eagerly.

Father weighed the question. "All right," he said finally. "If you promise to catch the fish to feed it."

This seemed wise to ask, and we agreed. We built a wire cage, then set about establishing a supply of perch, caught it from the family pet.

The first two days the heron rejected our offerings, obstinately clamping its big beak. Not hearing the bird would starve to death, we tried opening its mouth and dropping bits of worm into the heron's gape.

Captive Birds Eating Is Fun

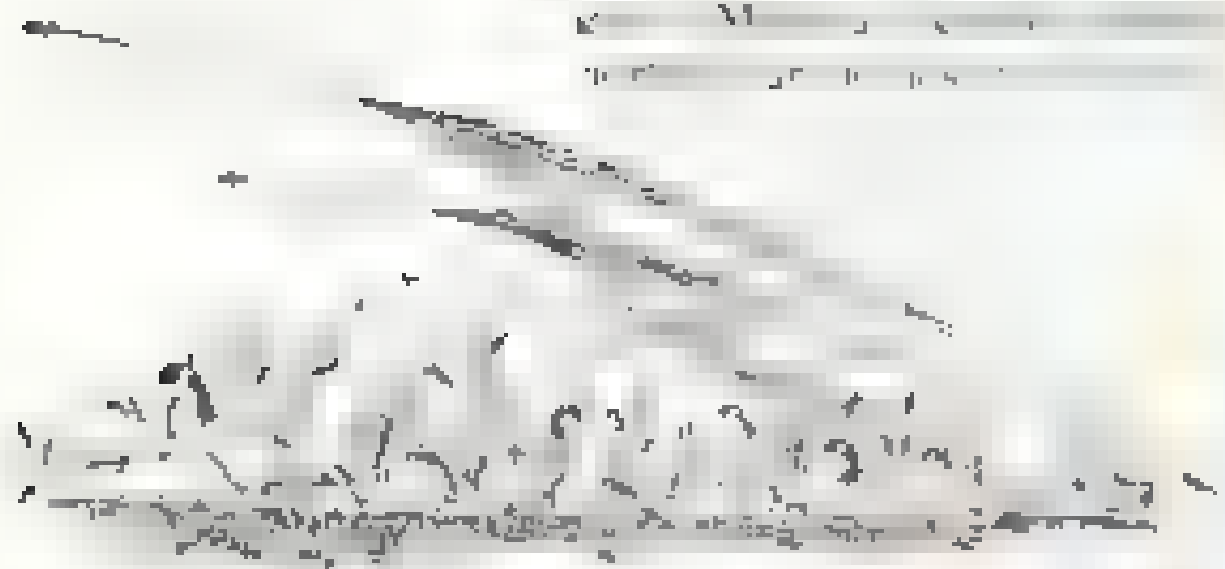

With this first taste our friend came it on to the pleasures of eating. He gobbled eight or ten large perch daily and squawked for more. So soon as we were fishing so much that we had little time left for other activities. After two summers I felt I never wanted to see another hawk and fish.

Our heron grew so big in size, strength and especially in appetite. But as he grew his disposition grew worse. We learned to approach him with some time we had fish and to avoid the vicious jabblings of his raptorial beak.

Weeks later came a day when we realized the captive no longer needed our help. If then he was really a bird, he had reached that wretched, in a luckless state.

1. The first part of the text discusses the importance of understanding the local context and the needs of the community. It emphasizes that any intervention should be based on a thorough assessment of the situation and the resources available. The text also highlights the role of the community in the process, suggesting that they should be actively involved in the planning and implementation of the project.

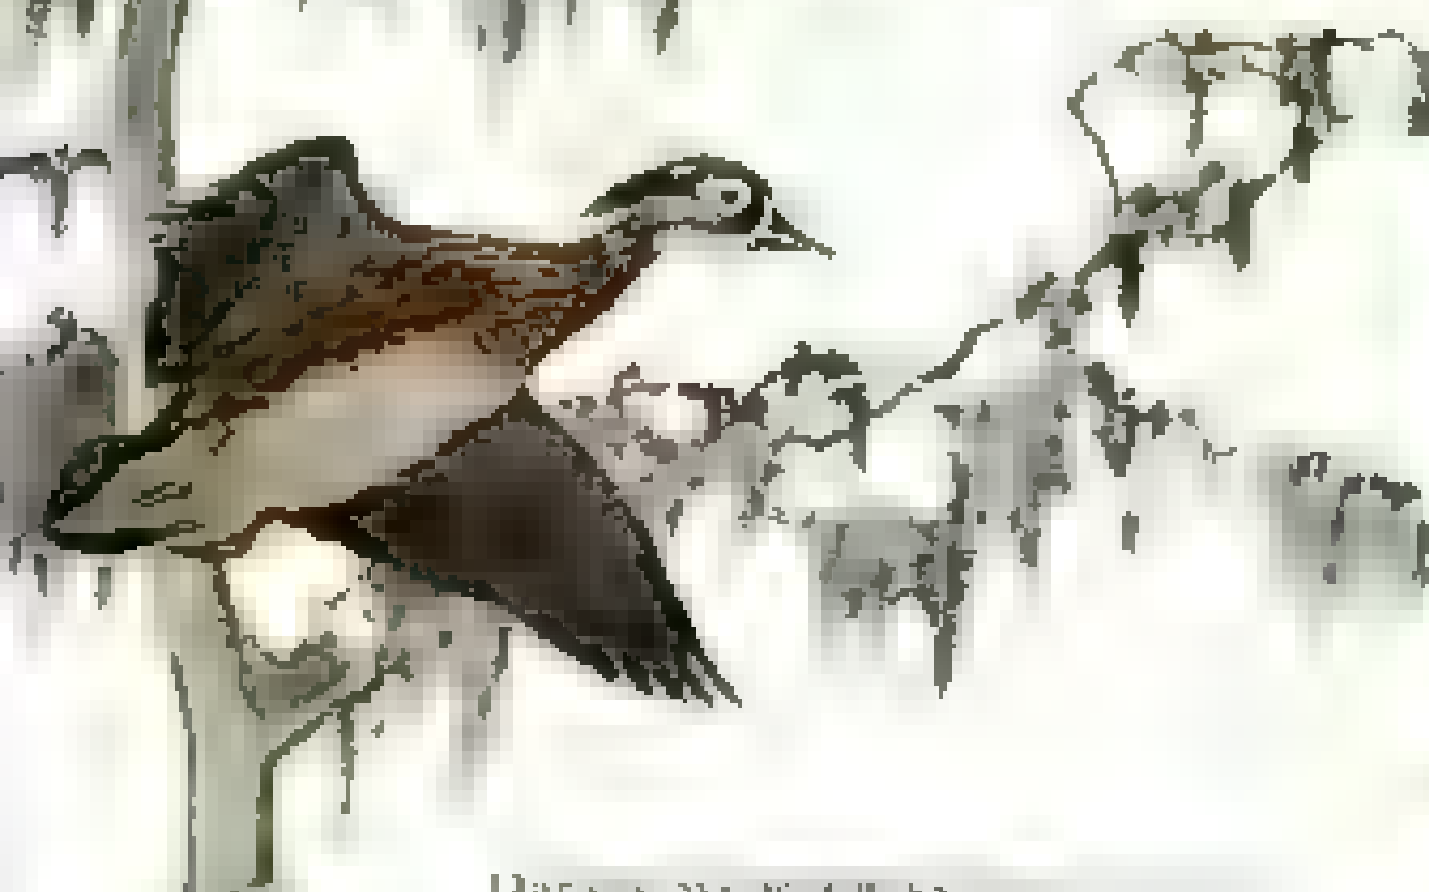

2. The second part of the text focuses on the challenges faced by the community and the potential solutions. It identifies the main barriers to development and discusses the strategies that can be used to overcome them. The text also mentions the importance of building capacity and providing training to the community members, as this is essential for the long-term success of the project.

3. The third part of the text describes the implementation of the project and the results achieved. It provides a detailed account of the activities carried out and the impact of the intervention. The text also includes a list of the resources used and the personnel involved in the project. The results show that the project has been successful in addressing the needs of the community and improving their living conditions.

4. The fourth part of the text discusses the sustainability of the project and the future prospects. It outlines the plans for the continuation of the project and the role of the community in maintaining the results. The text also mentions the importance of monitoring and evaluation, as this is necessary to ensure that the project is on track and achieving its objectives. The final conclusion states that the project has been a success and that the community is now better equipped to face the challenges of the future.

WATER, FISH, AND GAME RESOURCES
OF NORTH AMERICA

μ

1. H_2O is a polar molecule. The oxygen atom is more electronegative than the hydrogen atoms, so the oxygen atom has a partial negative charge (δ^-) and the hydrogen atoms have a partial positive charge (δ^+). This creates a dipole moment.

2. H_2O has a bent molecular geometry. The oxygen atom is bonded to two hydrogen atoms and has two lone pairs of electrons. The bond angle is approximately 104.5° .

3. H_2O has a high boiling point relative to other molecules of similar size. This is due to the strong hydrogen bonding between water molecules.

4. H_2O is a good solvent for many ionic and polar substances. This is due to its polarity and ability to form hydrogen bonds.

5. H_2O has a high specific heat capacity. This means it can absorb a lot of heat without a large increase in temperature.

6. H_2O has a high surface tension. This is due to the strong hydrogen bonding between water molecules at the surface.

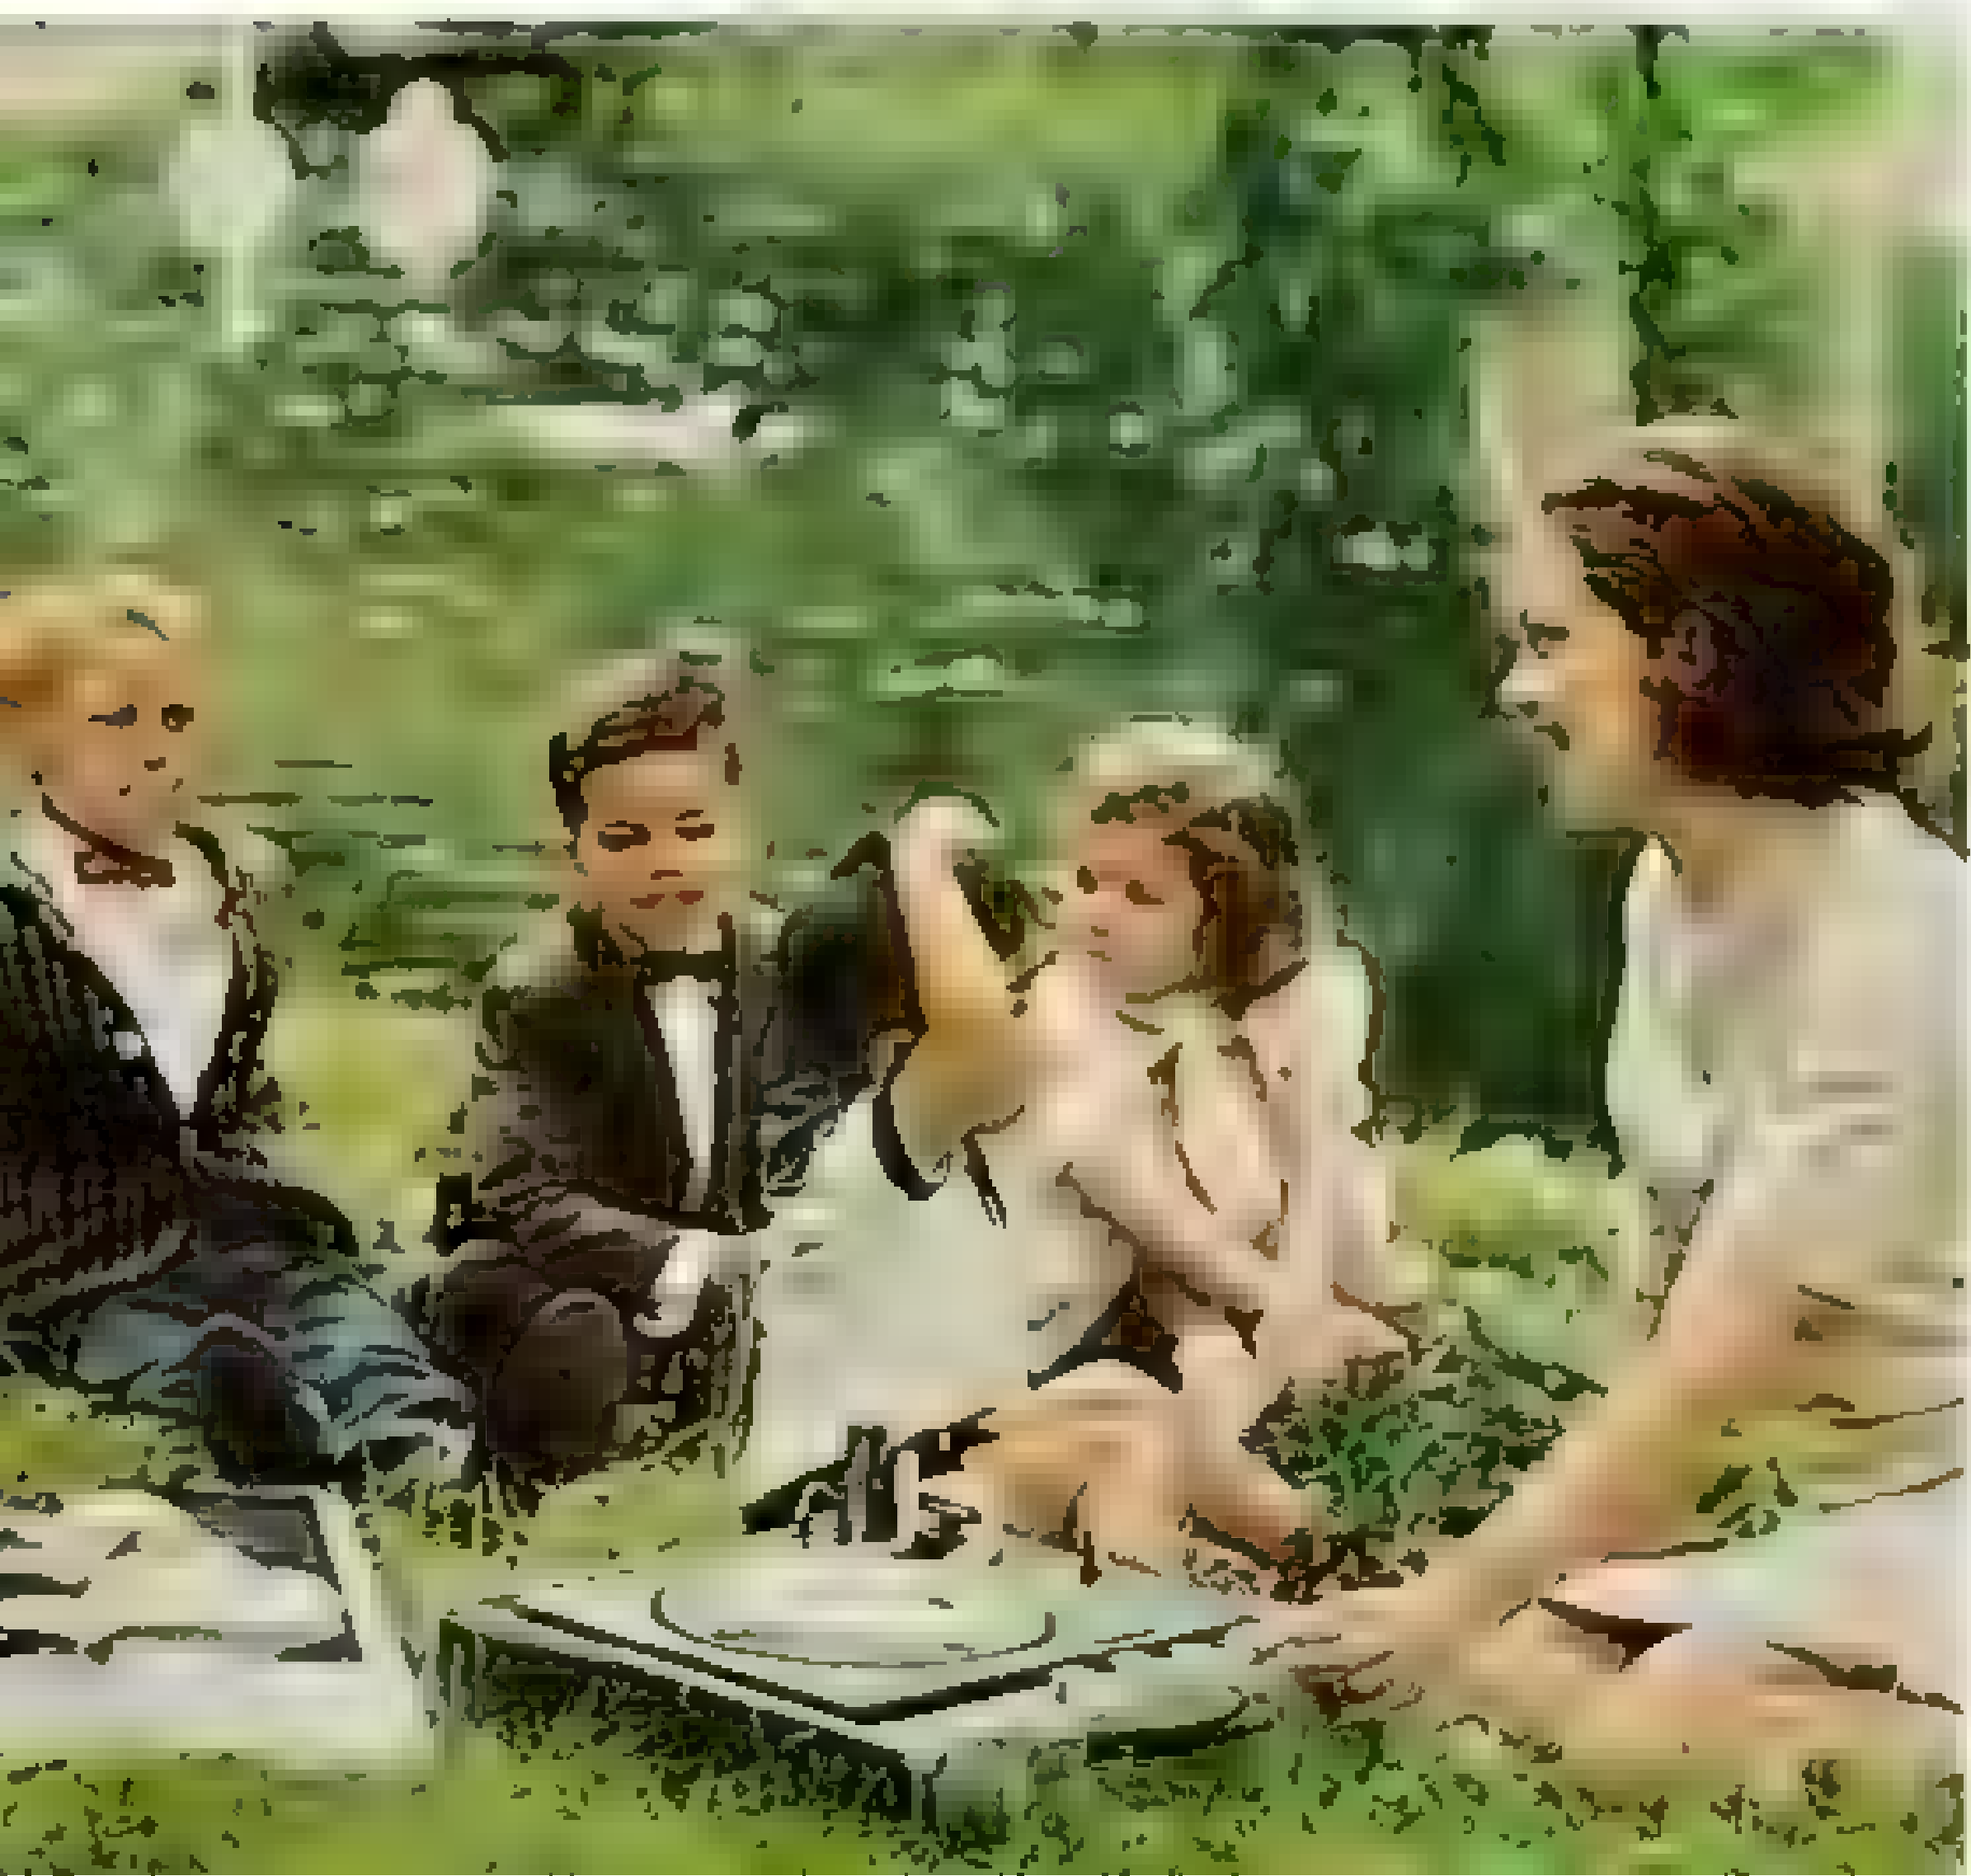

7. H_2O is essential for life. It is a major component of cells and is involved in many biological processes.

8. H_2O is a major component of the Earth's atmosphere. It is involved in the water cycle and climate regulation.

9. H_2O is a major component of the Earth's crust. It is involved in the formation of minerals and rocks.

10. H_2O is a major component of the Earth's oceans. It is the primary constituent of the hydrosphere.

The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1.1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1.1) are bounded and tend to zero as $t \rightarrow \infty$. The second part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1.1) as $t \rightarrow 0$. It is shown that the solutions of the system (1.1) are bounded and tend to zero as $t \rightarrow 0$.

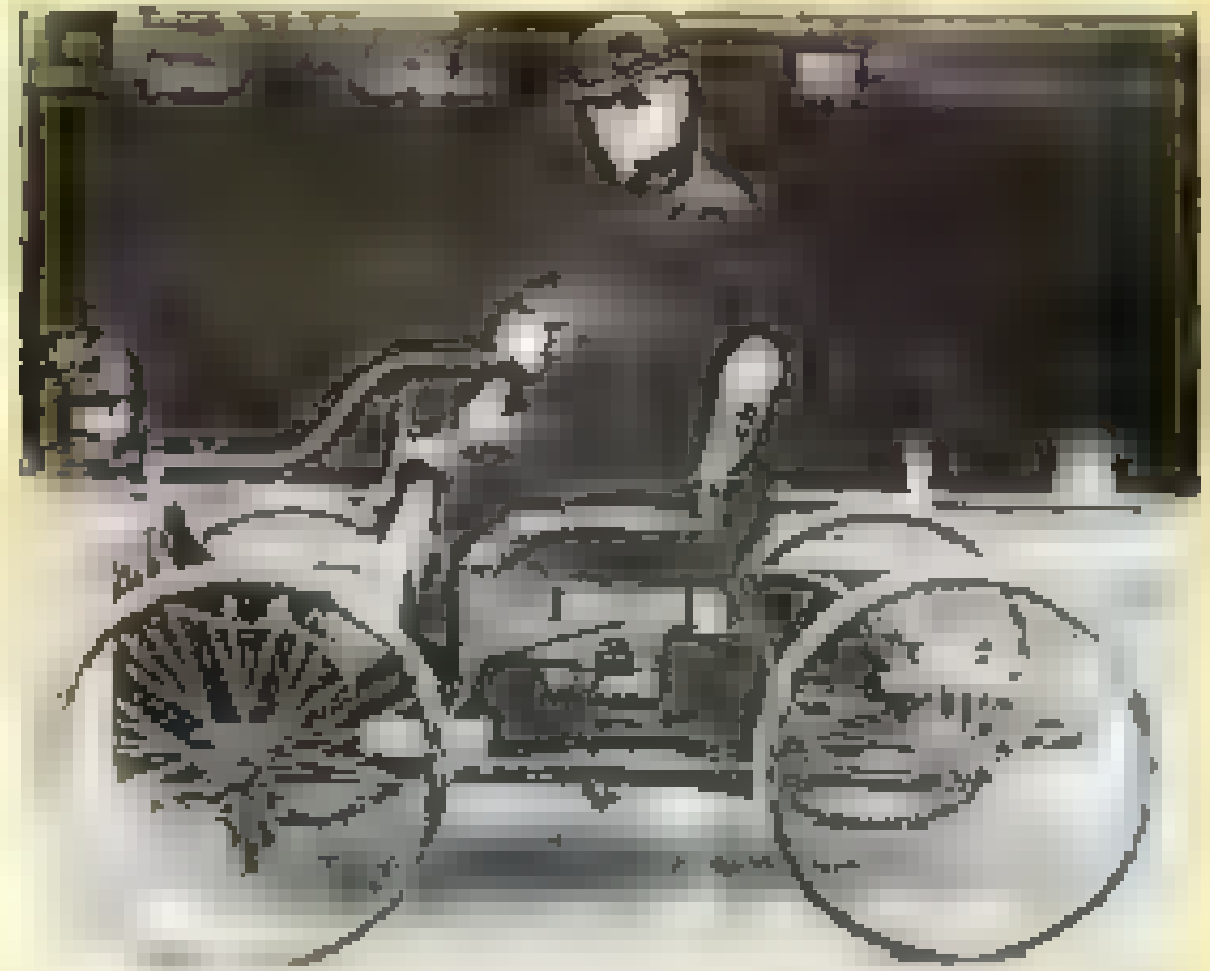

Child at work changes cotton spindles. In south and textile mills one-third of the workers were under 16. Children sometimes labored 12 hours a day for only a few cents. Photographer Lewis Hine's portrayal led to laws regulating such conditions. The first Federal child labor law passed during Wilson's Presidency (page 8).

The man and the car: Henry Ford, sponsor of mass production, was in his first model of 1899 when he built the Model T that put America on wheels.

First flying machine lifts off for a momentous second trip above the clouds at Kill Devil Hill on North Carolina's Outer Banks. During Theodore Roosevelt's Administration, Orville Wright—prone at the controls—made man's first powered flight in a heavier-than-air craft. His brother Wilbur runs alongside to steady the wing. The first flight date: December 17, 1903.

By 1918 their mood had changed again and they elected Herbert Hoover, not the progressive President and an admirer of both Theodore Roosevelt and Woodrow Wilson.

"We want the vote!" Suffragettes parade through Washington, D.C. The Nineteenth Amendment to the Constitution gave women the franchise in 1920.

The Pole at Last!" Robert E. Peary, with a "Gunspeed" from Theodore Roosevelt, became the first to reach the North Pole, on April 6, 1909. The explorer planted the Stars and Stripes, then photographed Matthew A. Henson, center, his Negro assistant, and the four Eskimos who shared in the achievement.

Hoover was a man of great energy and vision. He was a strong advocate of the League of Nations and a supporter of the Nation's economic policies.

Like his progressive predecessors in the White House, Hoover believed the Government should intervene in the affairs of the economy only enough to guarantee a free market. He hoped for a voluntary rather than compulsory way to efficiency. It was his misfortune to be President when the Great Depression struck. Although in time he

was able to bring about a recovery, his administration was not able to prevent the economic crisis. Hoover's policies were not enough to prevent the economic crisis.

Facing deep economic problems abroad, where the League of Nations was struggling, Hoover and his administration were not able to prevent the economic crisis. Hoover's policies were not enough to prevent the economic crisis. Hoover's policies were not enough to prevent the economic crisis.

The New Roosevelt

TWENTY SIX HOURS IN

THEODORE ROOSEVELT brought Presidency vigorously he led Congress and the public toward progressive reforms and a strong foreign policy, taking the view that he was a steward of the people, united only by specific constitutional restrictions. In the popular eye he was the "buster of trusts" and wielder of a "big stick."

"I did not usurp power," he later wrote. "but I did greatly broaden the use of executive power."

Roosevelt's youth differed sharply from that of the log-cabin Presidents. He was born to a well-to-do family in New York City in 1858, his brownstone home on East 20th Street is a national historic shrine. But Roosevelt, too, had to struggle—against ill health. When his father told him he had the right to do nothing, the boy to sustain a worthwhile career, he replied "I'll make my body."

From early childhood Roosevelt was a naturalist, and he learned to ride, hunt, and thrive in the wilderness. He eventually did build a strong body and became a notable advocate of physical and moral excellence.

While a senior at Harvard University, he began work on *The Naval War of 1812*, published two years later in 1882—the first of some 40 books. Using his earnings from writing to supplement his income, he decided to devote himself to public service.

Backed by a reputation as a club in New York City, Theodore Roosevelt, at 23, won election to the New York State Assembly. The colorful, energetic way he fought for clean government projected him into the headlines.

Sorrow Sends T. R. to Dakota

In 1884 his first wife, Alice Lee Roosevelt, and his mother died within a few hours of each other. Roosevelt left New York for the badlands of Dakota Territory, and there in the next two years he mastered his sorrow as he lived in the saddle driving cattle, hunting, and capturing three thieves. The Theodore Roosevelt National Memorial Park in North Dakota, which includes T. R.'s ranch, was created in his memory.

In all his adventures, both in his youth and as a man, he showed utter fearlessness.

There were all kinds of things at which

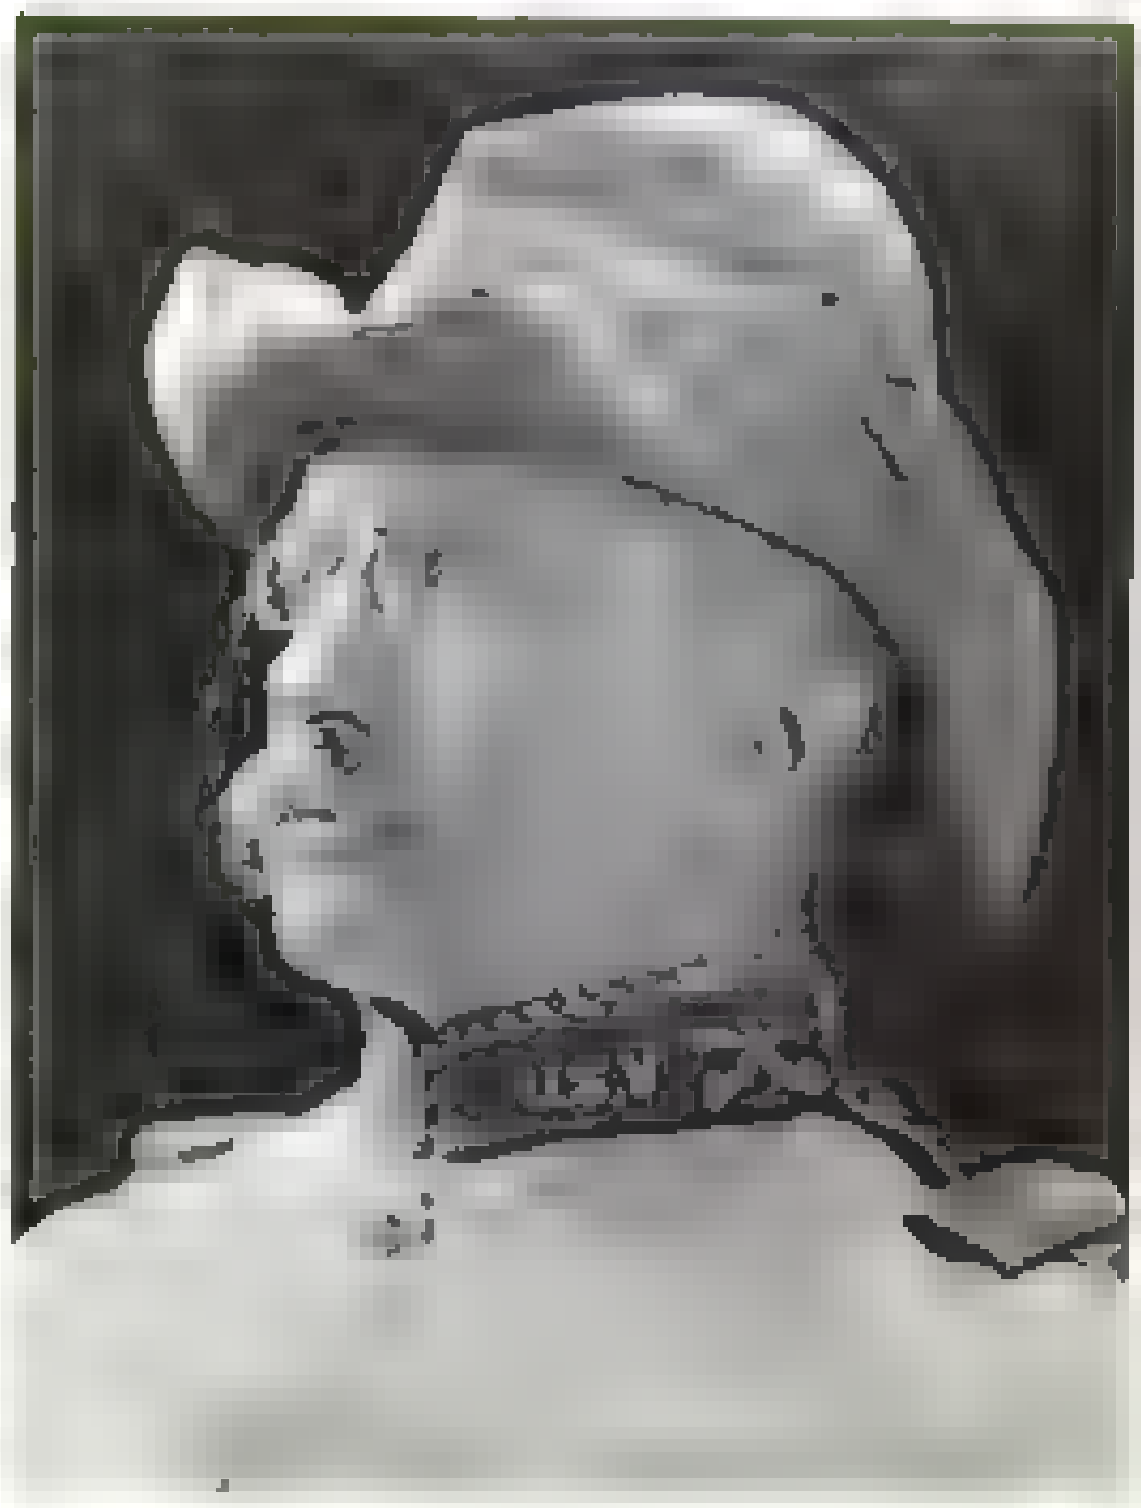

Unyielded man—was being written
renewed public spirit. Theodore Roosevelt
at 42 became the Nation's youngest
Chief Executive, succeeding the assassinated President McKinley on September 14, 1901. He had served as McKinley's Assistant Secretary of the Navy and the governorship of New York in 1896, and two years later was elected Vice President. Entering the White House, he declared:

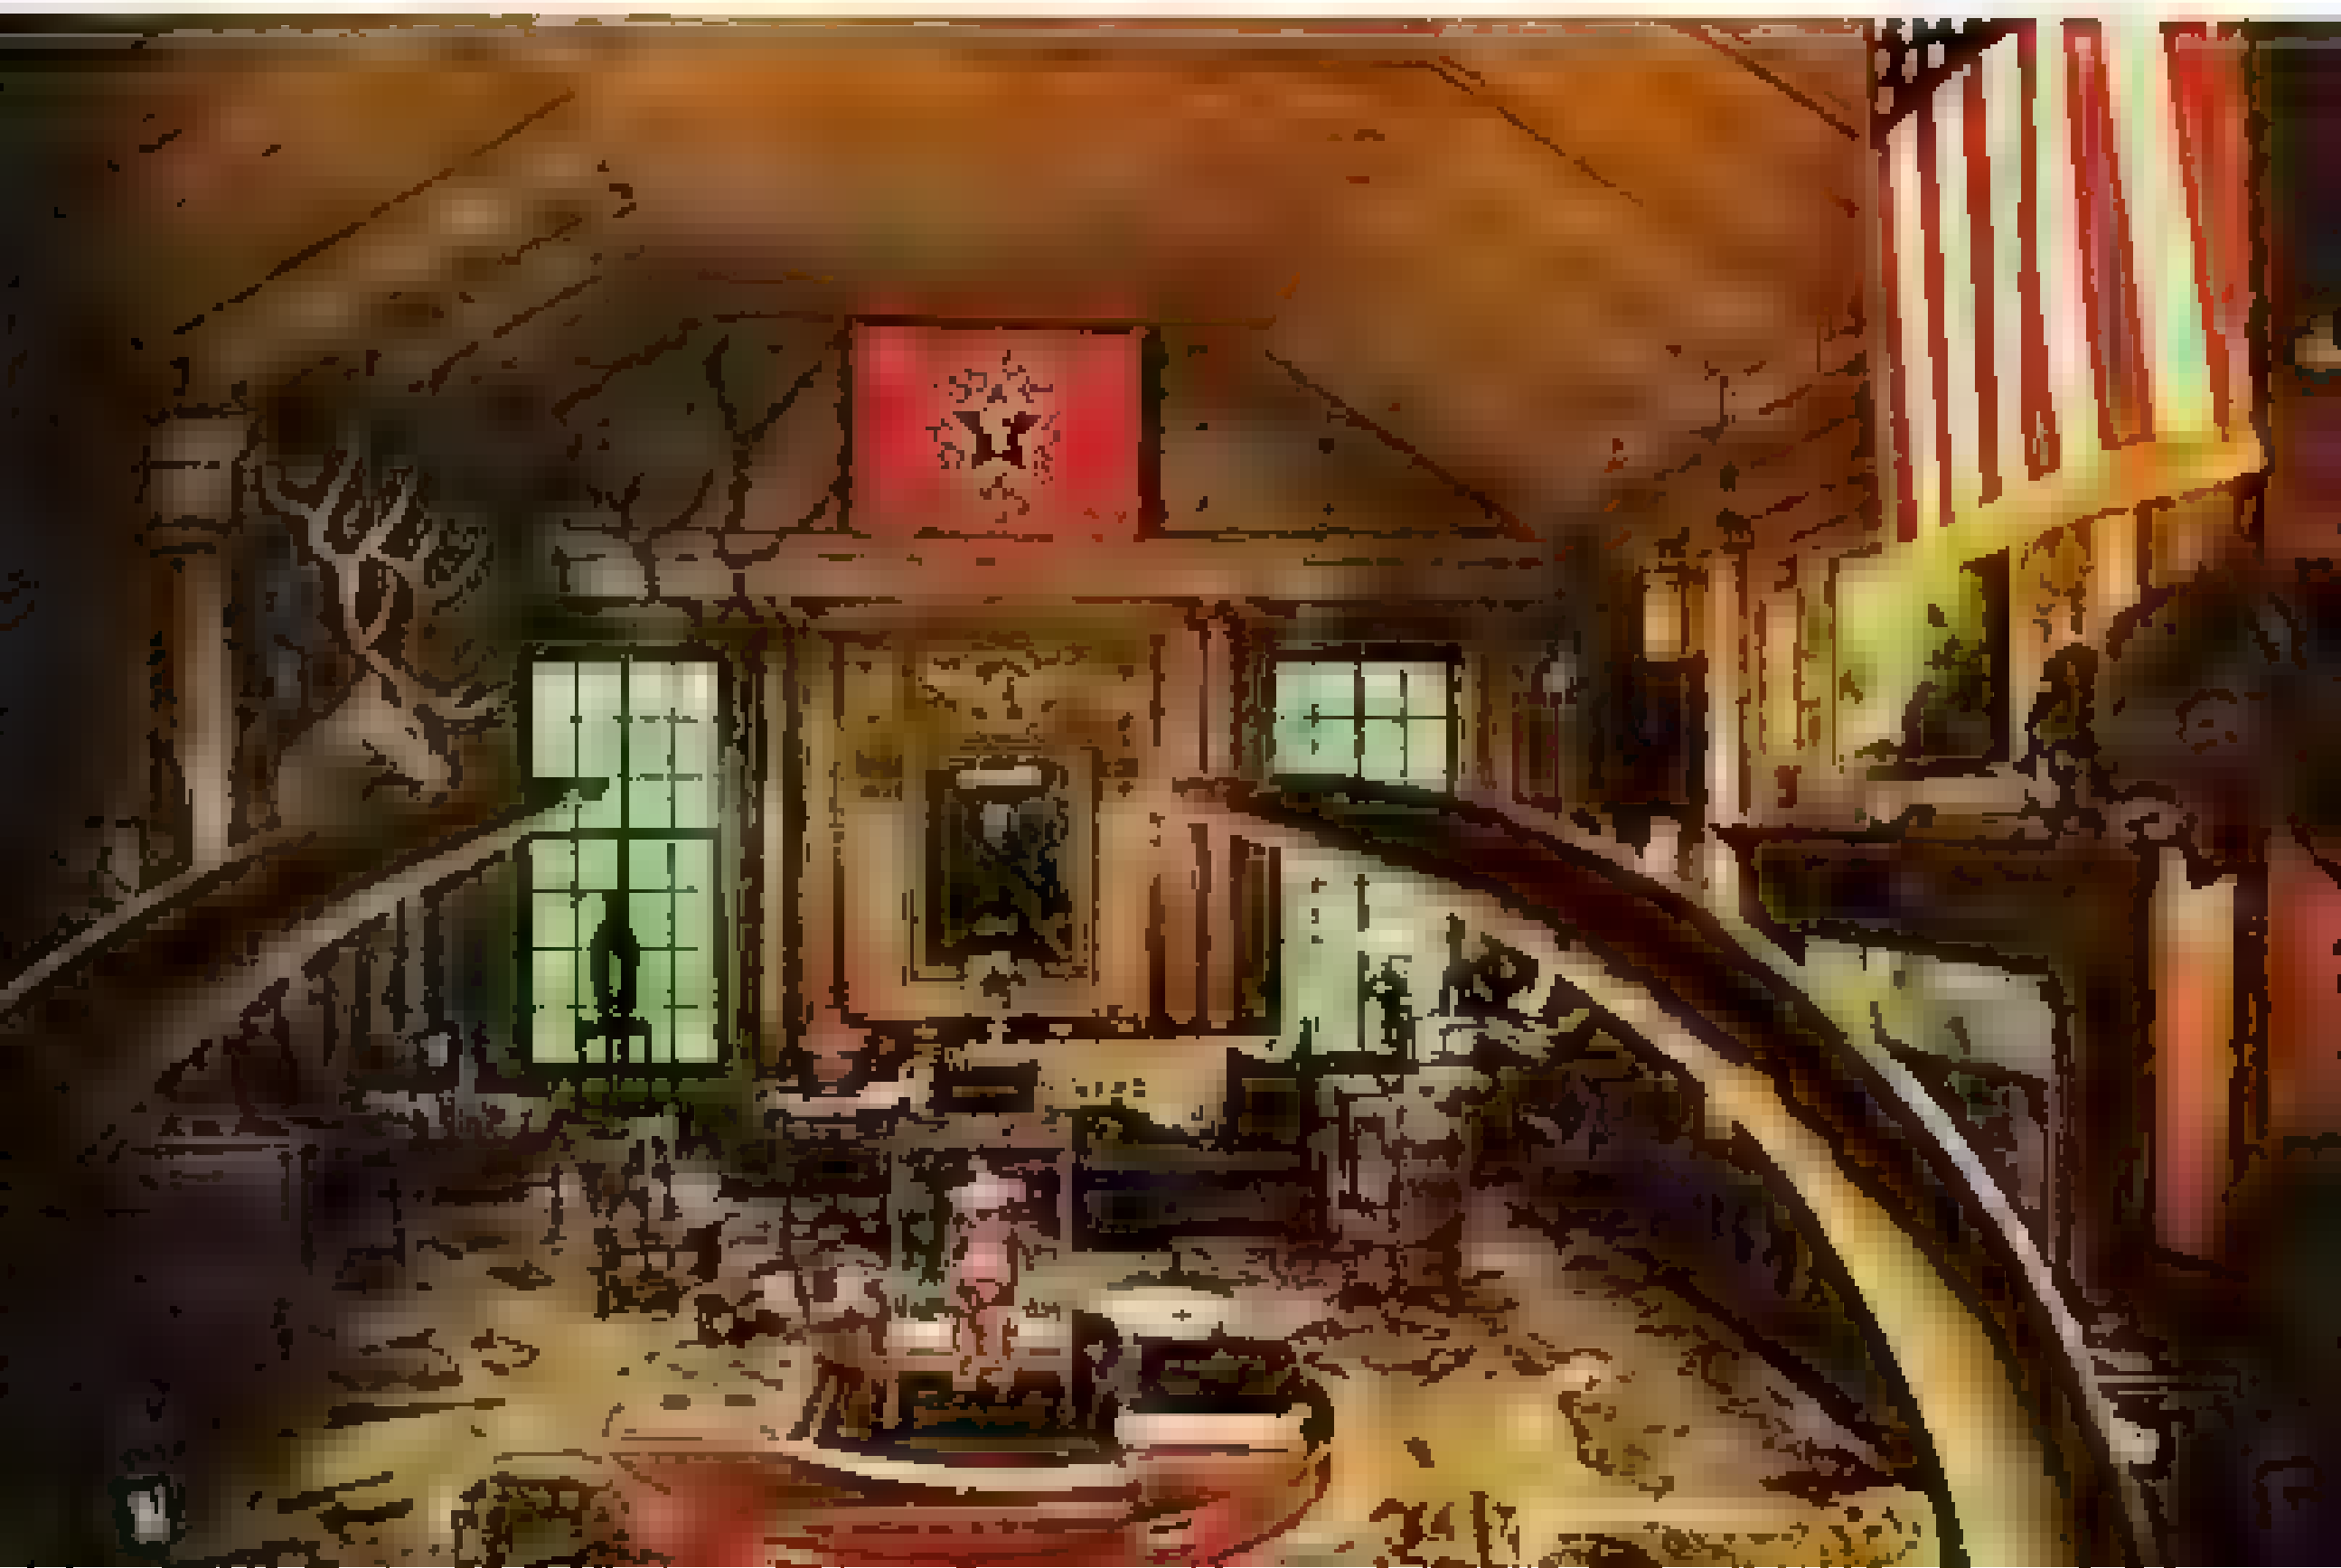

"It is my own right."

Trust busting Teddy—was never not
missing much opportunities in American business. A New York City cartoonist captured T. R.'s courage and courage on "that acres of great wealth." He worried William Hearst but won support on Wall Street. U.S.A. Roosevelt and a man for awakening and interest in the problems of the day.

[illegible][illegible][illegible]

Staunch advocate of a strong Navy, Roosevelt dispatched 16 American battleships on a 14-month world cruise in 1907. The President used the spectacle of voyage of the Great White Fleet to impress potential enemies with United States naval might and to persuade Congress to authorize two dreadnoughts. Here, aboard the Presidential yacht *Mayflower*, Roosevelt reviews the fleet at Hampton Roads, Virginia.

"Last chance to be a boy." The cork Finn in T.R. took him down rapids on Brazil's River of Doubt in 1914. Three months later, Brazilian Colonel Cândido Rondon (center), co-leader with Roosevelt, lost a son, and T.R. shortened his life with an abscess and jungle fever.

Camping conservationist, the President visits Yosemite National Park in 1903. Left: Although he was not a conservationist for his own sake, it was Roosevelt who set aside the first 51 wildlife refuges in the United States.

river of Doubt in the Amazon with a party of 10. Of the trip he wrote "No less than six weeks were spent in slowly and with periodic exhausting labor forcing our way down through what seemed a literally endless succession of rapids and cataracts."

He did not realize that he himself had been "killed" by malaria, at one perhaps point he even suggested that the others leave him behind to die. In a voice still weak with jungle fever, Roosevelt gave his first public account of his Amazon trip in a lecture to the National Geographic Society.

T.R. was proud of having put the River of Doubt (later named the Theodore Roosevelt) on the map," as he phrased it. "I had to go. It was my last chance to be a boy."

But he had not ignored politics. By 1910, Roosevelt was back in the White House.

When he returned to the Progressive program "and for the square deal," he asserted in 1912 he ran for President on a Progressive ticket, splitting off from the Republican Party, which nominated Taft. To reporters he remarked that he felt as fit as a fiddle and the new party became known as the Bull Moose Party.

Fanatic's Bullet Fails to Halt Speech

While campaigning in Milwaukee, a bullet was shot in the chest by an anarchist, but Roosevelt kept speaking before being taken to the hospital.

"The bullet is in me now," he told his audience. "So that I cannot make a very long speech. I am ahead of the game anyway. No man has had a happier life than I have led, a happier life in every way."

Roosevelt recovered, but lost to Wilson in the election and was never able to resume fully the strenuous life he loved. He died in 1919 and was buried at Youngs' Memorial Cemetery, Oyster Bay, Long Island.

TWENTY SEVENTH PRESIDENT 1933-1945

W H I T E H O U S E

he direction of the Supreme Court rather than the Presidency. He achieved his long desire in eight years after he left the White House becoming Chief Justice of the United States in 1921.

His four years in the White House were extremely uneventful—primarily because he was caught in the middle of an insupportable battle between progressives and conservatives. Taft disliked resorting to political maneuvering for his worthy ends. He once ex-

pressed his feelings: "Political considerations have never weighed heavily with me. I have tried to consider each case what seemed to me the wisest thing to do."

As a result, Taft received criticism from the conservative and the progressive sides of the nation. In four years he achieved little to remember and Taft said that had he been President, Roosevelt's seven years in office would have been the greatest in American history. As a conservative, he reserved federal lands, established a Department of the Interior,

and created the Federal Reserve Bank, the Federal Bureau of Investigation, the Federal Reserve Board, and a Commerce Court. He also signed the Antitrust Law, the Federal Reserve Act, and the Federal Reserve Bank Act.

He was a great supporter of the arts and letters. He was the first President to receive the Nobel Prize in Literature. He was the first President to receive the Pulitzer Prize in Literature. He was the first President to receive the Nobel Prize in Peace.

Cultured Education in Taft

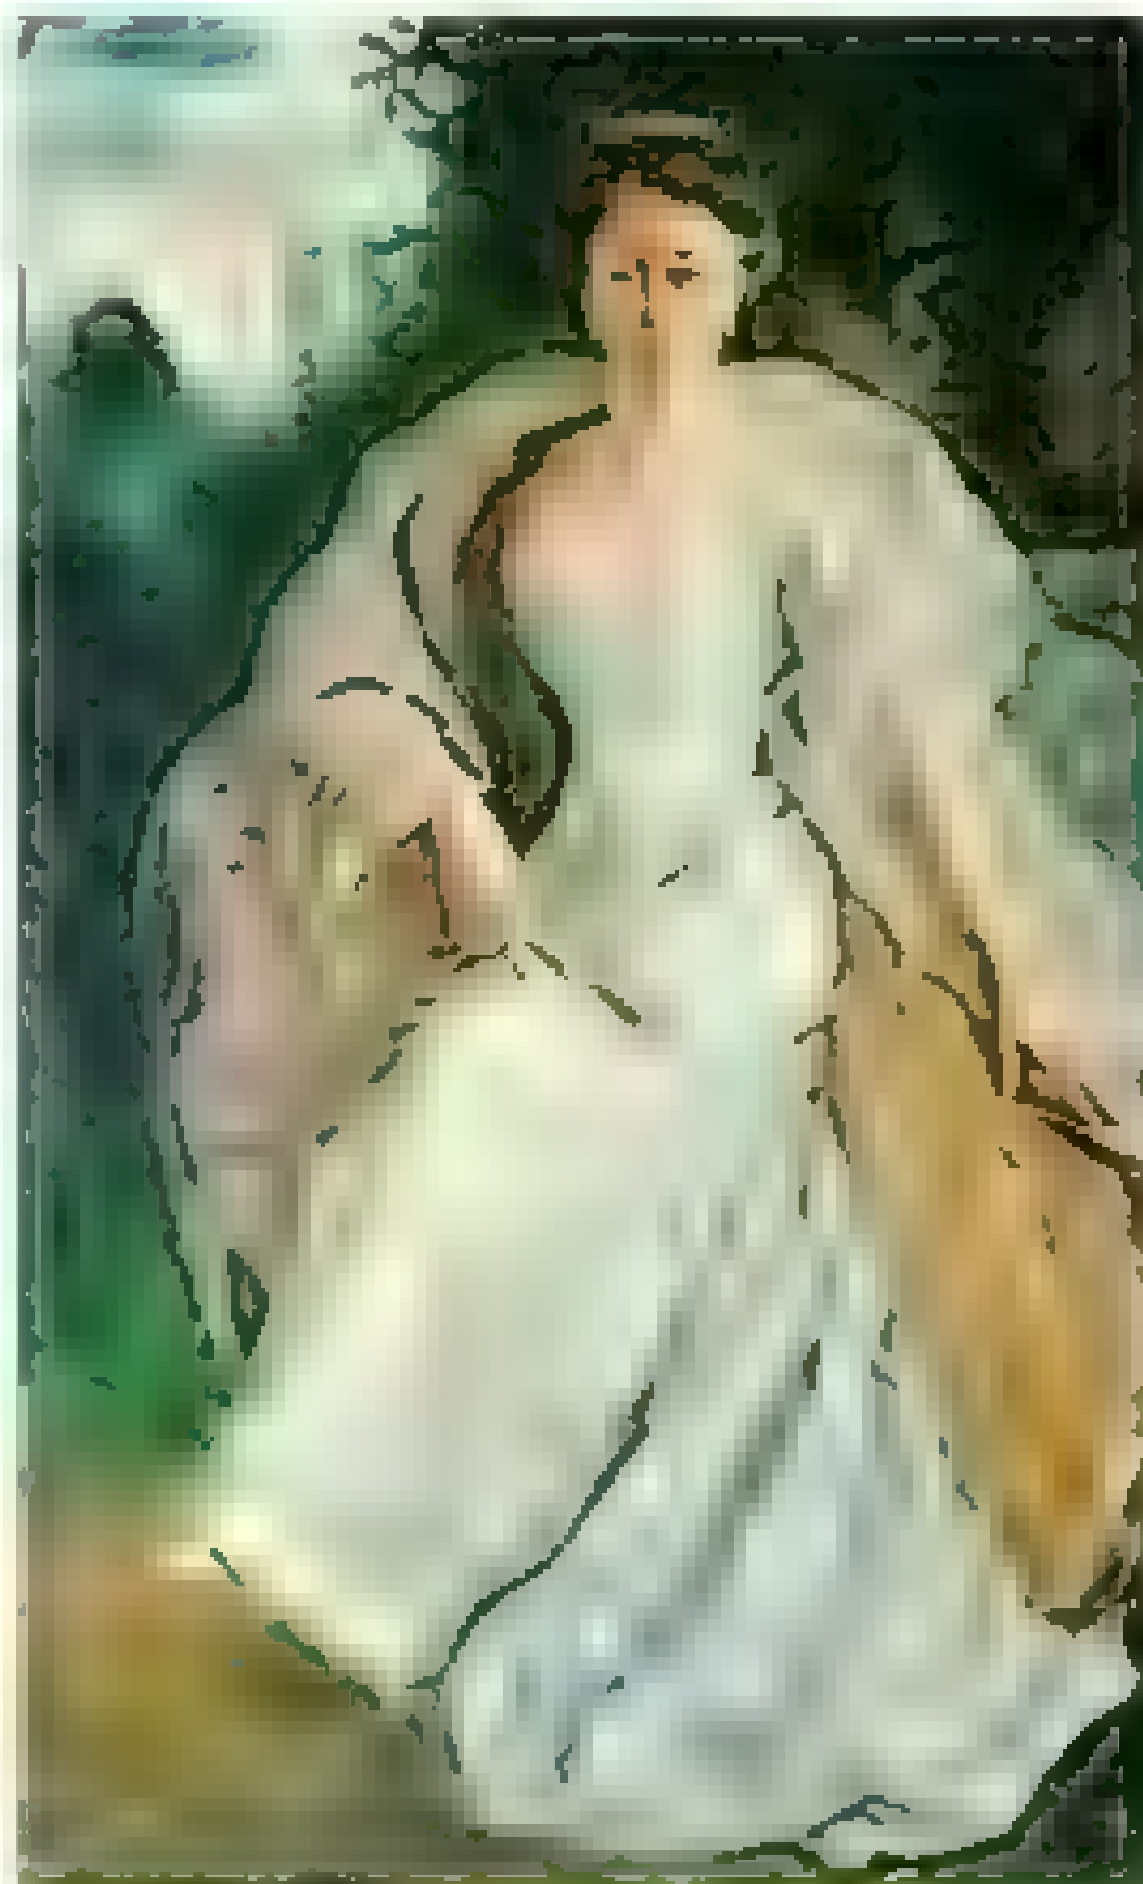

First As First Lady, she received from the Mayor of Tokyo 6000 Japanese Yen for the National Academy of Arts.

tax and for payment of the National Academy of Arts. He had a substantial record, but progressives demanding far more for his services.

President Defended Fledgling Society

La Taft, the National Geographic Society, and the National Geographic Society. He lectured before the Society ten times. He published 15 articles in the Society's journal, the National Geographic Magazine. He was the first ex-President to become a Trustee of the Society, serving on the Board from 1917 until his death in 1930.

Taft was born in 1857 in Cincinnati, Ohio. He was a well-to-do Ohioan who had a successful career in law.

Respect and affection toward Filicides to Taft's four year tour of duty. Appointed first Chief Justice of the United States in 1901, Taft was a proponent of sound morals, a basis and standard of

Domestic Delegates, headed by Secretary of War Taft, take a flat-car to Port of the Panama Canal. During 1914, as a Secretary, Taft championed the project. The "big push" opened for business during World War.

and because, as he once wrote facetiously, he always had his "plate" of food. Taft was a man of many talents, a statesman, a scholar, and a man of letters. He was a member of the Supreme Court, and his wife, Helen Herron Taft, held other appointments for him.

His route to the White House was via the Supreme Court, but his wife, Helen Herron Taft, held other appointments for him.

Versatile helpmate, dark-eyed Edith Bolling Wilson married the widowed Wilson in 1905. Her confidence during the 18-hour workdays of the war, she became both nurse and executive secretary after a stroke crippled the President in the fall of 1919.

In gratitude for Edith's loan, Belgian refugees embroidered this flour sack from a Wheatburg Washington, Md. and sent it to Wilson.

In 1911 an editorial in *The Atlantic Monthly* as well as personal newsmen's look-up details of the President. Mooser regretted the copy exercise of Federal Reserve Act. New bills were now to read child labor laws in the Nation—a law later voided after Supreme Court in a decision subsequently overruled. Another law limited non-ferrous metal workers to a maximum in the industry. By a vote of 135 domestic legislation and the Democratic majority in the Senate. "He kept a cool head of war." Wilson narrowly won re-election over Charles Evans Hughes.

Wilson was both great happiness and sorrow in the White House. During the early months, surrounded by the wife he met, his three grown daughters, and often his Southern relatives, he would find within the circle, since he at the plan, happy moments. Among the guests were the Roosevelts, including one of fist-shaking Theodore Roosevelt. But in August, 1914, Mrs. Wilson fell, and Wilson was broken water.

Edith Calt Helps Relieve the Burden

Without his wife he seemed lost until he met a charming widow, Edith Bolling. They were married in December, 1905.

He believed that Edith brought to him "a companion, strength, and joy," Woodrow's biographer, Arthur S. Link, has written. Her love made him what he was.

Throughout his years in the White House Wilson worked a 16-hour workday, day and night. He drafted his own speeches, prepared his own correspondence, and even wrote his own letters.

As the war in Europe impinged upon the United States, Wilson's burden became heavier and heavier. He had to lead the American people through a difficult time.

Wilson's goal was to maintain the Nation's neutrality on the high seas. In 1916, against the opposition of the Navy, he had a prepared program, enlarging the Army and greatly increasing the size of the Navy.

From the war's beginning Wilson hoped for a just peace, and as late as January, 1918, he called for "peace without victory." But when any peace seemed unlikely, he broke his career pledges by announcing that the United States would enter the war.

Knowing this act would bring America into the war, Wilson reluctantly conceded that Germany was flouting American

Warren G. Harding

TWENTY-NINTH PRESIDENT

WARREN GABRIEL HARDING, a well-meaning man, promised a Nation troubled by the inflationary excursions following World War I that he would take it back to "normalcy." But there was to be no turning back from the profound economic and social changes that the war had wrought. Harding, likewise in some of his appointments, was betrayed by corrupt friends and alien boardwalk and disfigured before the end of his term.

He was born in the Ohio village of Blooming Grove in 1875, the son of a farmer who owned horses, cattle and a farm. After graduation from Ohio Central College, Harding became at 19 the publisher and co-owner of the Marion Ohio Star. As the little town of 4,000 steadily grew and prospered, so did the Star and Warren Harding. In 1899 he married Florence Kling De Wolfe, a local girl who was richer than he.

Comment on Deadlock Leads to Presidency

Law, journalism, and oratory, Harding was ideally suited to the most prominent Ohio politician. His understating Republicanism and vibrant speaking voice, together with more political skill than has been generally recognized, carried him far. He served in the state Senate and in 1912 became Lieutenant Governor of Ohio. He delivered the nominating address for President Taft at the 1912 Republican Convention, and in 1914 he was elected to the United States Senate, which he found to be "a very pleasant place."

An Ohio admirer, Harry Daugherty, began to promote Harding for the 1920 Republican

nomination because, as he said, "He looked like a President."

When the principal candidates of the 1920 Republican Convention deliberated, Harding won the nomination. The return to "normalcy" became the theme of his campaign. He declared, "America's present need is not heroes, but healing; not nostrums, but normalcy; not revolution, but restoration; not agitation, but adjustment; not surgery, but serenity; not the dramatic, but the distressing; not experiment, but response; not submergence in internationality, but sustenance in the significant nationality."

At once the very plainness of such statements was effective. With the Democratic nominees, Governor James M. Cox of Ohio and Sen. Hiram B. Roosevelt, running for the League of Nations, both opponents and proponents of American entrance into the League could find in Harding's speeches reasons to vote for him. Most voters, however, were chiefly interested in preventing a resumption of living conditions. Harding was elected President, and he won the approval of the popular vote.

"He looked like a President," wrote at the time said of Warren Harding, who had sold newspapers around the West when he had been a boy. He gained a national reputation as a politician after 2 1/2 years in office.

"I have only one real hobby - my husband," said Florence Kling De Wolfe Harding. And thus, enthusiastic, she helped him in the campaign. Her frequent garden parties gave the White House a country air during

Congress has been debating the role of Government as a business for years. The House has passed a bill to make it the business of America's business.

Benjamin Plimouth, Vermont, on July 4, 1872, the day was the son of a hard-working village storekeeper. Part of the house in which he was born, and his father's adobe shop are now transformed as a museum. "My father was a very shy and quiet man and never put himself forward," his father later reminisced. "Children could get more soap out of him than any of the other boys were and here

Cumbridge was graduated from Amherst College with honors, and entered law and politics in Northampton, Massachusetts. It was here that he met Grace Goodhue, who became his wife in 1865. "She has kept me running for public office ever since I married her." Cumbridge rested in two years. In truth, as Mrs. Cumbridge wrote, she had, at times, protested against further advancement in the political arena. "I hope the years he won a nation's honor as an office carrying leader will be enough in Northampton to Governor of Massachusetts. For while he became thus a good conservative

Strike Stand Leads to White House

London merchant Frank W. Brown explained it vividly to me. He told me once that when he first went to the Legation here he supposed he was doing even a fair job. Then he was told that he was in favor of social betterment. There came a time when he had to use his legislative experience when he came to the Legation. He found that previous ideas were wrong but that the social needs, as a rule, was going the right way. As he put it, he gave up the ability to administer. He felt that unless a man had been through a hell that was a half-century ago, he could not be

...and I took the same view of the Federal Government as I had before. I had been educated and that it was not to jump to a high level.

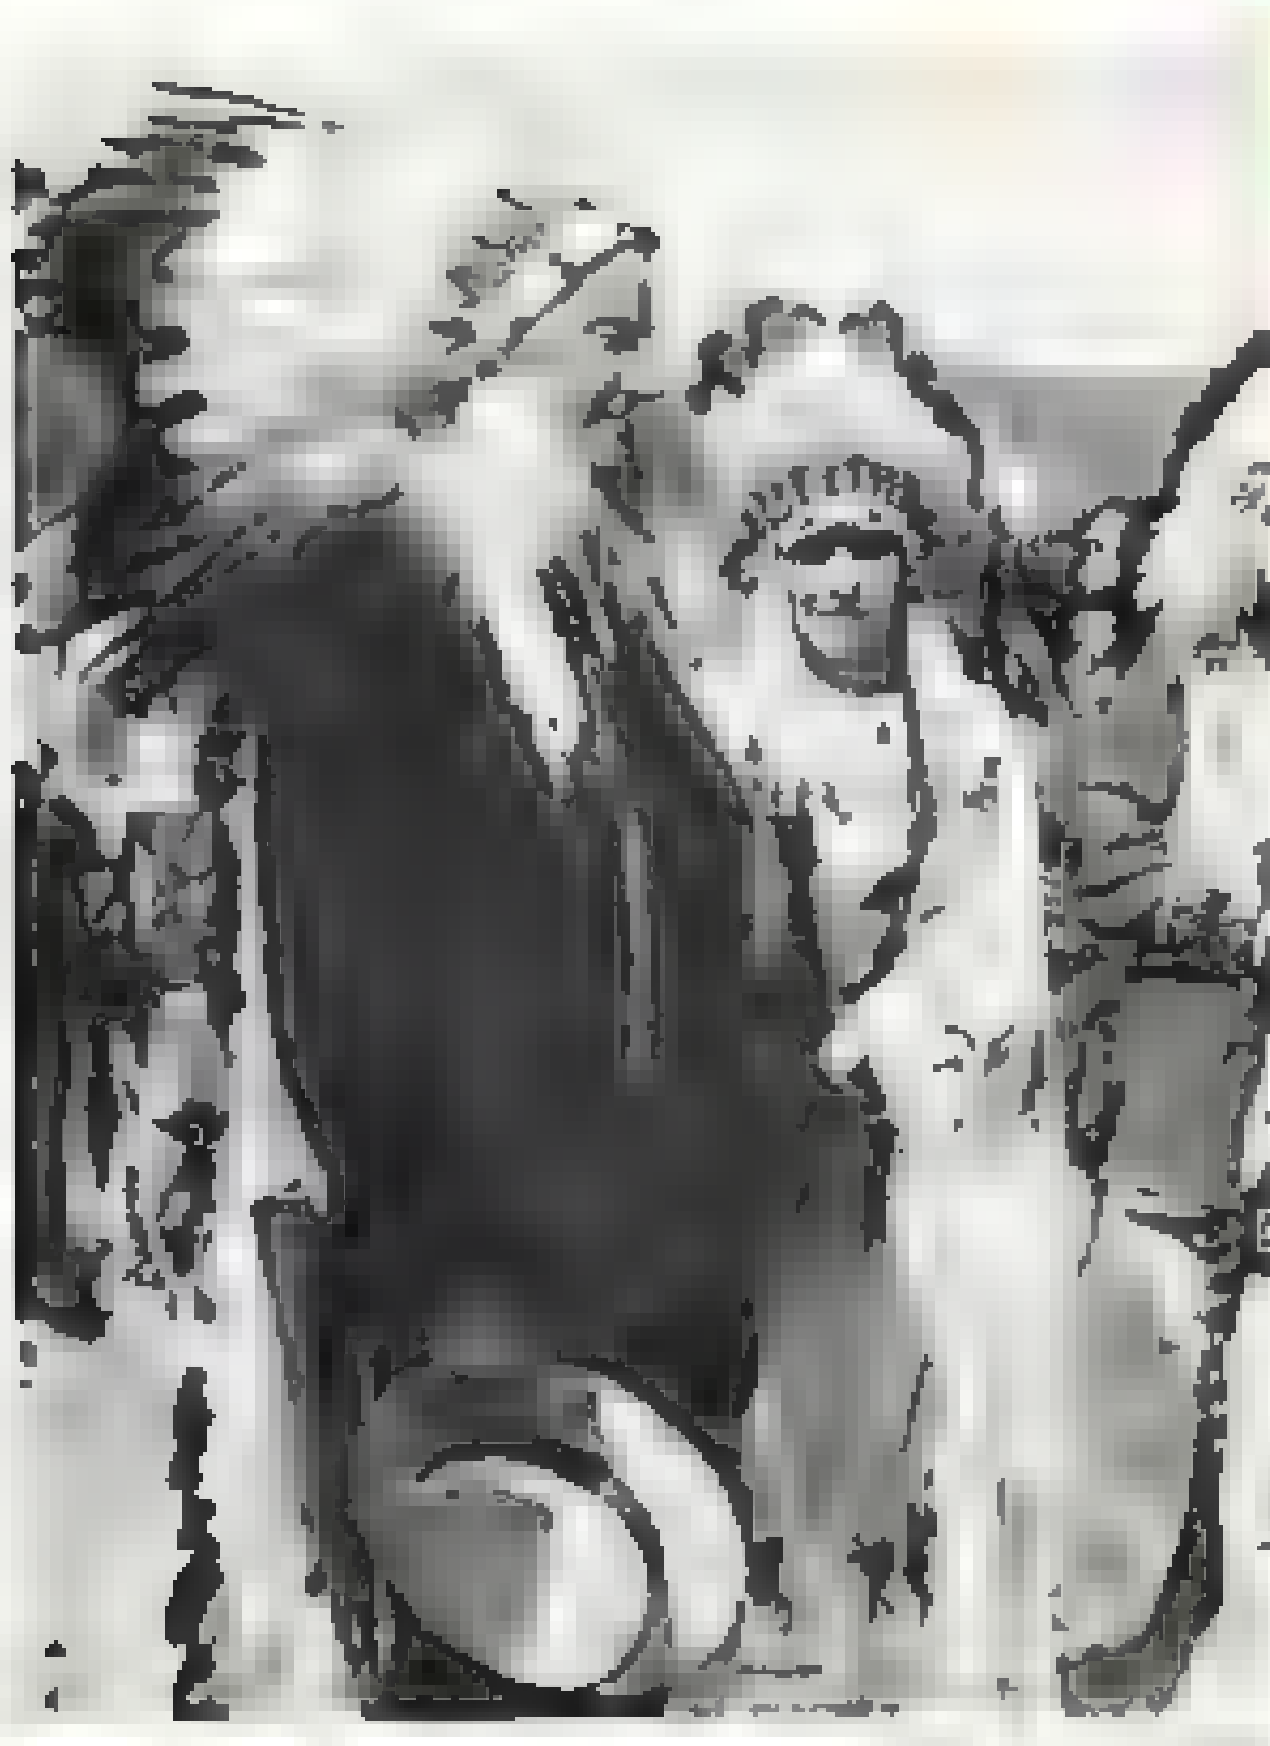

Coolidge first became a salaried legislator in 1907 at the state level. He was elected to the Massachusetts House of Representatives in 1907 and served until 1910. In 1910, he was elected to the United States House of Representatives and served until 1913. During his time in Congress, Coolidge was known for his conservative views and his opposition to the Progressive Era reforms. He was particularly vocal in his opposition to the Federal Reserve Act of 1913 and the Clayton Antitrust Act of 1914. After leaving Congress, Coolidge returned to private life and worked as a lawyer and businessman. He was also involved in politics at the local level, serving as mayor of Northampton from 1915 to 1916. In 1919, he was elected Governor of Massachusetts and served until 1921. During his tenure as Governor, Coolidge was known for his fiscal conservatism and his efforts to reduce government spending. He was also instrumental in the passage of the State Police Bill of 1920, which created the Massachusetts State Police. In 1923, Coolidge was elected Vice President of the United States under Calvin Coolidge. He served in this position until 1929, when he was elected President of the United States.

In the early morning hours of 4, 1933, while visiting his father in Plymouth Cottage received word that

Herbert Hoover

THIRTY-FIRST PRESIDENT

HERBERT HOOVER was forced as President to cope with a severe war-torn depression. Unlike earlier depressed Presidents, he used Government resources to help the economy, but his popularity had evaporated and he was defeated in 1932. In later years he was again hailed as an outstanding American leader.

Few men have lived such long, exciting lives. The son of a Quaker blacksmith, Herbert Hoover was born in West Branch, Iowa, on August 10, 1874. His father died when Herbert was six, his mother, two years later. He went to live with an uncle in Oregon, where he learned not only how to clear forest, but also how to type and keep books. He was one of the first students to enroll at Stanford University when it opened in 1891, and at 23 in the midst of a depression he was graduated with a degree in geology.

He quickly demonstrated his analytical and organizing talents and at 23 took charge of some geologists in the Australian desert. He developed one of the richest of all, the Sons of Cow Dam mine.

Public Career Begins at 40

In 1899 he became the expert miner-explorer for the Chinese Government. En route to China, he stopped at Canton to marry his Stanford sweetheart, Lou Henry. In June 1900, the Boxer Rebellion raided the couple in Tianjin. Hoover assumed responsibility for the civil engineering and for clearing flood water in the holes caused by rebel settlement.

By the early 1900s, Hoover had become an expert in the mining industry. He developed great mines in Australia and Britain, and rehabilitated others in Russia. When the chief accountant for a firm of British mining consultants, in which he was a partner, embezzled a two hundred dollars, Hoover, in the absence of his senior partners, decided that the firm would make good the loss even though it was under no legal obligation. He personally assumed a substantial share of the loss, wiping out the greater part of his life's savings. The firm's reputation—as well as Hoover's personal standing—were greatly enhanced, and the incident became a legend in international business circles.

A week before Hoover celebrated his fortieth birthday in London, Germany declared war on France and the American Congress General asked his belated farewell tour home.

"I did not realize it at the moment," Hoover later

recalled. Training engineer Herbert Clark Hoover had amassed a considerable fortune when he died; he bequeathed the money to his wife and the couple served in World War I. Hoover served without wages as U.S. War Administrator and then, after the war, as Coal Age as Secretary of Commerce. As an administrator, Hoover was a Quaker at heart and hated the idleness and suffering attendant on accepting the Presidency. In 1928, he declared, "I think I may say that I have witnessed as much horror and suffering of war as any other American. I could have driven a deep passion for peace."

Lou Henry Hoover spoke her language and was loved by millions who loved her. She filled the White House with books and objects of art. Yes, Hoover was a member of the National Geographic Society; her name appeared among its 243 members as early as the January

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research. It also provides a brief overview of the methodology used in the study.

2. The second part of the report is a detailed description of the data collected during the study. It includes a table showing the results of the data analysis. The table shows that the majority of the respondents are male and that the majority of the respondents are in the age group of 18-25.

3. The third part of the report is a discussion of the results of the study. It discusses the implications of the findings and the limitations of the study. It also provides some suggestions for further research.

4. The fourth part of the report is a conclusion. It summarizes the main findings of the study and provides a final statement on the importance of the study.

5. The fifth part of the report is a list of references. It includes a list of the books, articles, and other sources used in the study.

6. The sixth part of the report is a list of appendices. It includes a list of the tables, figures, and other materials that are included in the report.

7. The seventh part of the report is a list of footnotes. It includes a list of the footnotes that are included in the report.

8. The eighth part of the report is a list of acknowledgments. It includes a list of the people and organizations that have provided support for the study.

9. The ninth part of the report is a list of the authors. It includes a list of the names of the authors of the report.

10. The tenth part of the report is a list of the titles of the chapters. It includes a list of the titles of the chapters that are included in the report.

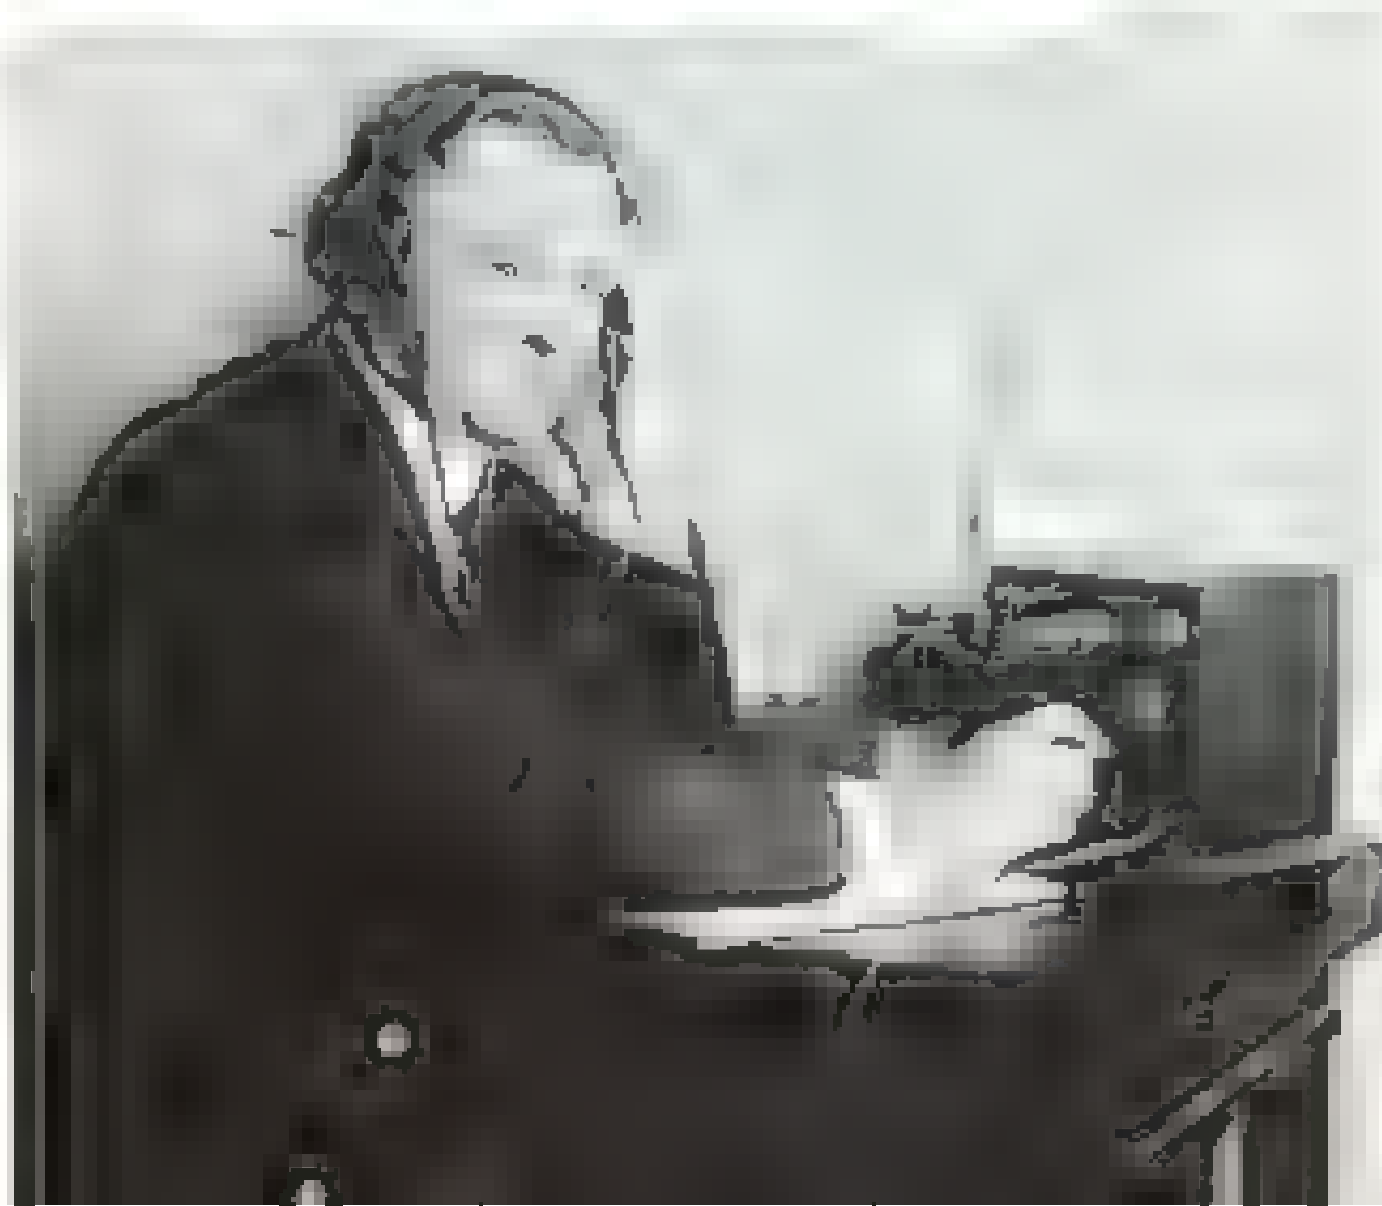

America's help to the hungry Europeans
 A group of people standing in front of a large sign that reads "EUROPEAN RELIEF COMMISSION". The sign is mounted on a wall. Several people are standing in front of the sign, some looking at it and others looking towards the camera. The scene appears to be an outdoor gathering or a public display.

Chief of Police in London
 A group of people standing in front of a large sign that reads "EUROPEAN RELIEF COMMISSION". The sign is mounted on a wall. Several people are standing in front of the sign, some looking at it and others looking towards the camera. The scene appears to be an outdoor gathering or a public display.

Introduction of a new type of
 A group of people standing in front of a large sign that reads "EUROPEAN RELIEF COMMISSION". The sign is mounted on a wall. Several people are standing in front of the sign, some looking at it and others looking towards the camera. The scene appears to be an outdoor gathering or a public display.

The man in the photograph is standing next to a large, dark, irregularly shaped object, possibly a piece of machinery or a large bag. The man is wearing a dark suit, a white shirt, and a dark hat. He is looking towards the camera. The background is a light, textured surface, possibly a wall or a large piece of fabric.

The following information is provided for the purpose of the investigation:

Name	Herbert Hoover
Address	1000 Pennsylvania Avenue, N.W., Washington, D.C.
Occupation	Director, Federal Bureau of Investigation
Birth Date	January 1, 1874
Birth Place	Washington, D.C.
Education	University of Virginia, University of Michigan
Marital Status	Married
Spouse's Name	Josephine Holmes
Children	Three
Religion	Methodist
Political Party	Republican
Other Information	Member of the American Bar Association, American Society of Criminal Justice, etc.

1. The first part of the book is a history of the region, from the early days of settlement to the present. It covers the various tribes and their customs, and the way they have changed over time. The second part is a description of the land and its resources, and the third part is a collection of stories and legends.

The book is written in a simple, straightforward style, and is easy to read. It is a good introduction to the history and culture of the region, and is worth reading for anyone interested in the area.

Color Words in English Measure on Arched Ground

Hearts of moon, born like a flower + etc.

TIME HANGS FROZEN in medieval Lǎo Montong.
The king still owns serfs who till his lands
and may not leave their master, just as when the
warlord Ana Lal founded the kingdom in
the 1380's. At night torches on close a single gate
in the Lǎo, ancient walls to keep out marauders.

— *THE MOUNTAIN KING* —

Wang's story

1. The first part of the text discusses the importance of maintaining accurate records of all transactions and activities within the organization. It emphasizes the need for transparency and accountability, particularly in financial matters. The text also highlights the role of technology in streamlining record-keeping processes and reducing the risk of errors.

2. The second part of the text focuses on the importance of effective communication and collaboration among team members. It stresses the need for clear, concise, and timely communication to ensure that everyone is on the same page and working towards common goals. The text also discusses the benefits of regular team meetings and open lines of communication.

3. The third part of the text addresses the importance of continuous learning and professional development. It encourages employees to stay up-to-date on industry trends and best practices through ongoing education and training. The text also discusses the benefits of mentorship programs and cross-functional collaboration for skill development.

4. The fourth part of the text discusses the importance of maintaining a positive and inclusive work environment. It emphasizes the need for respect, diversity, and inclusion in all aspects of the organization's culture. The text also highlights the role of leadership in fostering a positive work environment and promoting employee well-being.

5. The fifth part of the text discusses the importance of effective time management and prioritization. It provides practical tips and strategies for managing time efficiently and avoiding procrastination. The text also emphasizes the importance of setting realistic goals and deadlines to ensure that tasks are completed on time.

6. The sixth part of the text discusses the importance of effective risk management. It emphasizes the need to identify potential risks and develop strategies to mitigate them. The text also discusses the importance of regular risk assessments and updates to risk management plans. The text also highlights the role of insurance and other risk management tools in protecting the organization's assets.

7. The seventh part of the text discusses the importance of effective project management. It provides a framework for planning, executing, and monitoring projects. The text also discusses the importance of clear communication, collaboration, and accountability in project management. The text also highlights the role of project management tools and software in streamlining project workflows.

8. The eighth part of the text discusses the importance of effective customer service. It emphasizes the need to understand customer needs and expectations and to provide high-quality service. The text also discusses the importance of feedback loops and continuous improvement in customer service. The text also highlights the role of customer service training and support in ensuring excellent customer experiences.

9. The ninth part of the text discusses the importance of effective marketing and sales strategies. It provides a framework for developing and implementing marketing and sales plans. The text also discusses the importance of understanding the target market and using data-driven decision-making in marketing and sales. The text also highlights the role of marketing and sales automation tools in streamlining marketing and sales processes.

10. The tenth part of the text discusses the importance of effective financial management. It emphasizes the need to maintain accurate financial records and to use financial data to inform decision-making. The text also discusses the importance of budgeting and financial forecasting. The text also highlights the role of financial management tools and software in streamlining financial processes.

Is France near Lhasa," asked the king, "or is it a part of America?" I was then I learned he was mistaken but the error is pardonable.

The king asked innumerable questions, especially the history of your kingdom and its customs, to see its books and visit its monasteries.

Taken aback, I answered "I do not think there is a government there." I was sure the Chinese will honor the agreement that reaffirmed Mustang's inclusion within Nepal."

I said my people are afraid of the king said we hear great exploits from Tibet that the old crushing.

I later learned that the words of a Chinese man could be seen he felt some of the late marks—just beyond the border. The king may not know

that he won't find but he is well aware that he may be thrown into today's world.

As our audience passed its end, the king continued to ask questions.

Coming forward, he reached his knee then the ground, and finally prostrated himself.

He began to write on a large piece of hand-made brown paper as he knelt.

"I request that these two foreigners, I and I, who are one person, should

stand and their questions be answered every day of my reign.

The king, with a small object, affixed his seal to the bottom of the page. He then pointed to his son, seated opposite me, and said "This is my son. His name is

He had just returned from Kathmandu. Beyond that he had thought of going.

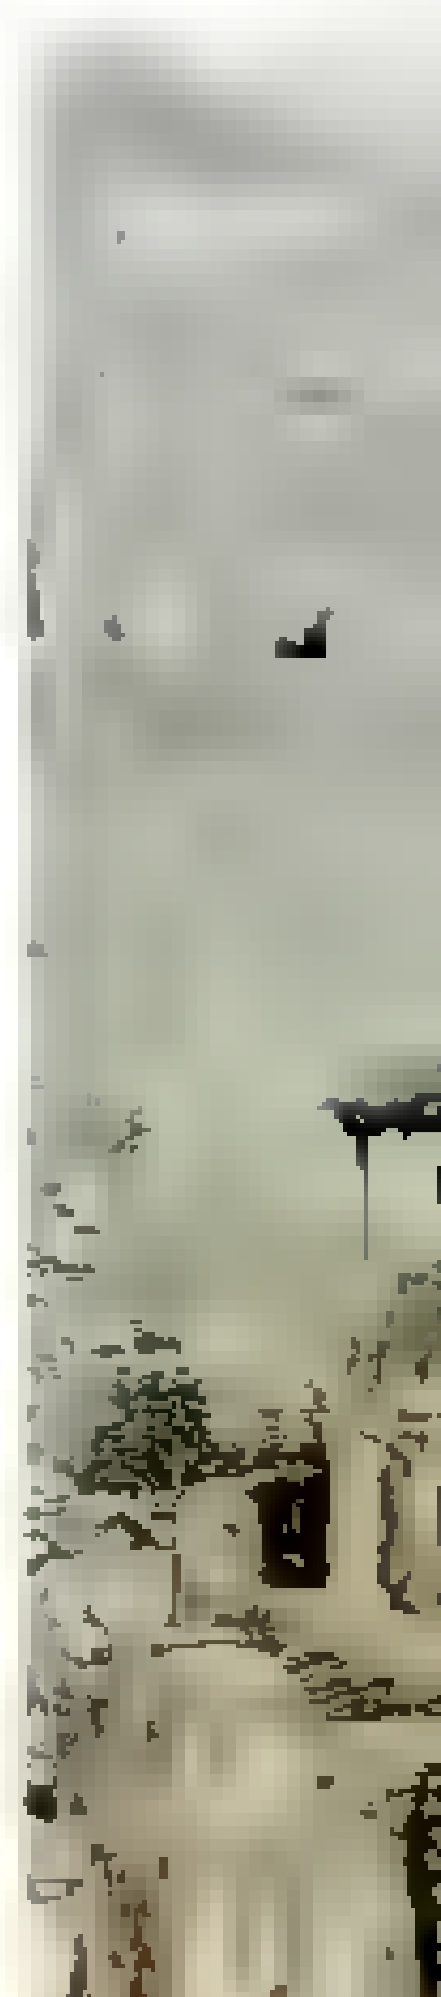

Staw-stuffed pit of a snow leopards, a form of wall as a wall for the hunter. The

measured one for the other.

... King of M... ..
... the

According to the old treaty, Mustang was under the Nepalese authority.

[illegible]

15 Women spin and weave goods. Women quacks 500-600 while men—especially in the winter months—spin the yak wool into thick strands to make their knee-high boots.

Wherever I went I was escorted by citizens and monks—many of whom met never before in a foreigner. As marvelous as my accommodations and parts, even the texture of my tent, growlups would fight over the empty air cans I threw away. Most are unknown; everybody has his own flat and stool.

Mustang, I discovered, is almost all a salt red sand. The very name is derived from the words *a Mon Thang*, meaning "the plain of prayer." Some 600 of the land's 8,000 inhabitants are monks. The state religion is Lantia Buddhism of the *tsa-kya-pa-sek*, very similar to the Buddhism of the Tibetan Lama.

In Mustang stand some of the most remarkable monasteries left on this Tibet. At least two had been served in the past by as many as 1,000 monks. Three of the monasteries were cut into vertical cliffs, accessible only by a ladder or a tunnel hewn in the rock.

Demons Haunt the Mountain Kingdom

Two six-colored monks, 152 families and eight practicing witches sleep every night within the great's sheltering walls of Lo Mantang. With the town's well-earned reputation, I expected that everybody would sleep quietly. This is not so. The entire population goes to bed in fear.

It is neither the Chinese soldiers nor the Khambhas that worry the townspeople, but the evil demons of land, sky, fire, and water.

Thousands of expedients have been employed to fend off these evil spirits that cause the 168 known diseases as well as the five forms of violent death. But for years burn before altars in the private chapel of every residence monks, monks, and peasants recite prayers throughout the day, thousands of prayer flags flutter on poles, prayer wheels and prayer wheels chatter every seven minutes.

But still the spirits growl, especially at night. Even the intricate demon traps set in every house (page 390), and the horse's skulls secretly buried below each monastery, cannot stop them. When the sun sets behind the eternal snows to the west, no resident is truly safe.

On the first day of the fourth lunar month of the Tibetan calendar (May 13, 1964), I was awakened by the shrill sound of a whistle. The noise came from a flute made of a human leg bone—an instrument frequently used by monks. From the flat roof of my house, I gazed down upon a ceremony unfolding in the town

square. It was to last three full days, lifting human with both long sound or even silence and the marked or unmarked drums were made from human skulls. This was the annual "casting of the demons" usually held at the beginning of the New Year, but delayed for some reason (see next pages 386-9).

The square had the appearance of a monastery. Monks sat on red carpets, and more than 60 of them assisted the High Lama of Lo Mantang, who officiated dressed in a vivid brocade gown with a hat representing two dragons and human skulls. A sturdy "peacock-man" monk patrolled the crowd of onlookers. In his hand, instead of a peacock stick, he carried a sheaf of peacock feathers.

On the third day the ceremony reached its climax. A mighty shriek assailed the onlookers dressed as devils brandishing swords. They cast their swords aloft at the assembly.

Suddenly, as if pain-stricken, everybody rose and rushed screaming for the tower gate. Outside the walls, the lama shot a sacred arrow into a symbolic offering representing one of the evil demons. The crowd cheered as the arrow hit its mark, and away ran one of the demon dancers. The operation was repeated at half past one and again another demon fled. Then 15 men with old muzzled long black horses shot the third offering, and the last of the demons disappeared.

Shoring a Room With a Corpse

If I had been Mustang, I would have a closer front gate a variety of funeral services. Following Tibetan Buddhist custom, I could either have been cremated, thrown into a river, buried, or I might have been chopped up into small squares and fed to the vultures, thus disappearing into the air. In this manner the human body is believed to return to the four elements of which it is composed: fire, water, earth, and air.

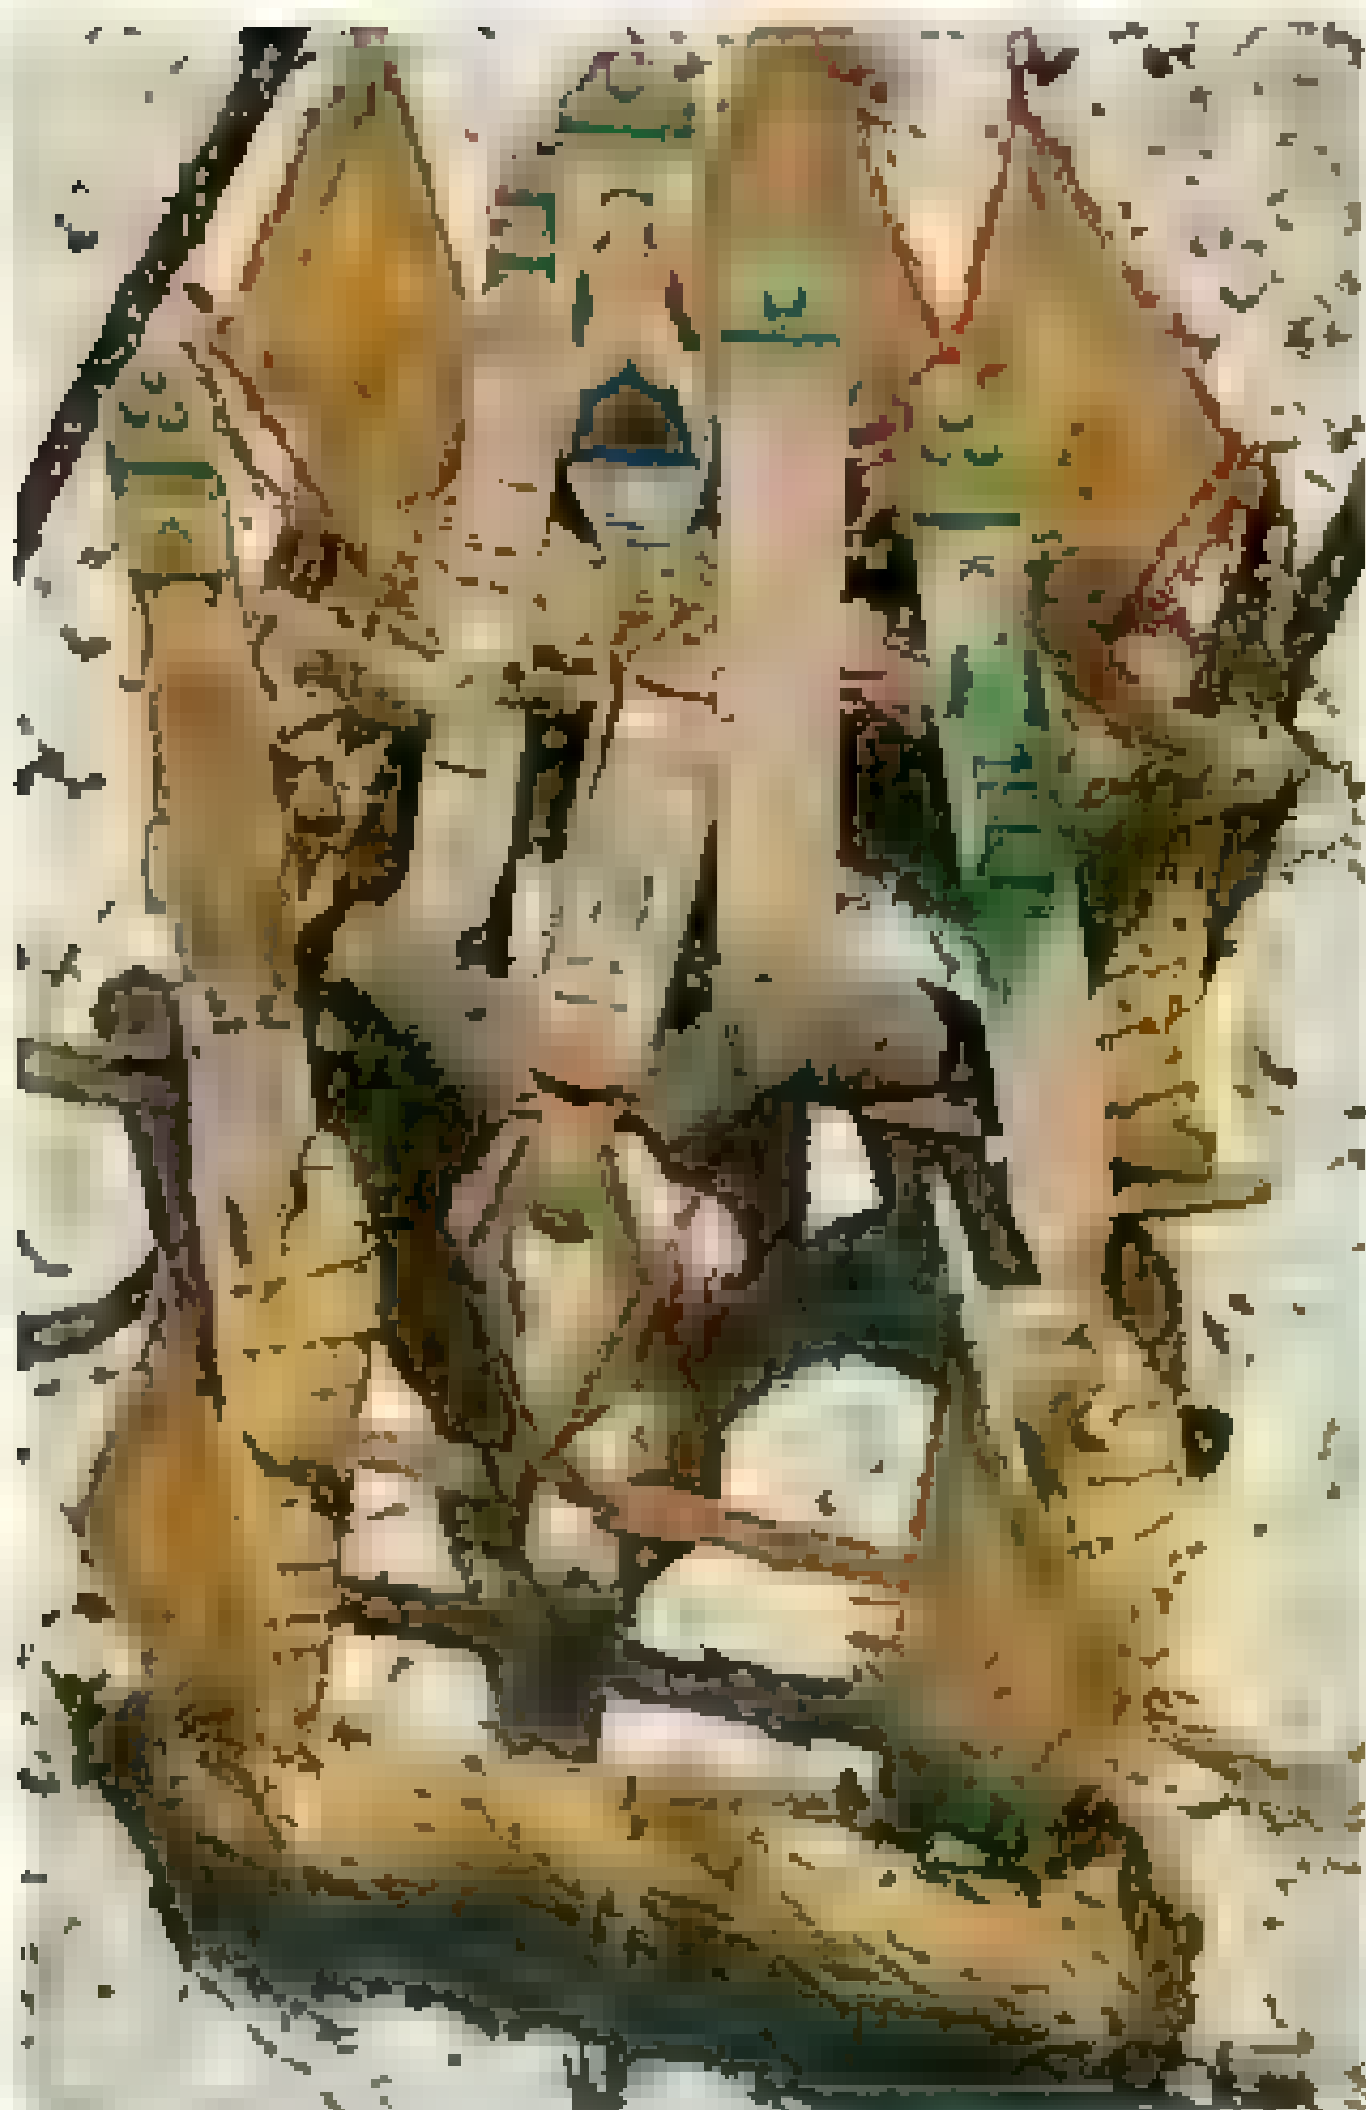

To these traditional ways of disposing of the dead, Mustang adds a fifth method reserved for a man who dies leaving neither son nor grandsons. His body is preserved in salt and then enclosed in the walls of his house. When finally, in the third generation or beyond, a boy is born, the dead body is taken out at night and secretly carried to a nearby hill, where the corpse is "traced" to the evil demons guards, a guarantee of long life to the newborn male heir.

To my amazement, I learned one day that a body lay within the walls of the private chapel in which I had been sleeping as the honored guest of a noble family in Lo Mantang.

Nature's Wonders

1. The first thing I noticed when I stepped out of the plane was the crisp, cool air. It felt like a fresh embrace after a long journey. The landscape below was a patchwork of green fields and small villages, each with its own unique charm. The sun was just rising, painting the sky in soft, golden hues. It was a perfect start to a new adventure.

My Journey

2. As I walked through the forest, I noticed the way the light filtered through the trees. It created a magical atmosphere, with rays of sunlight hitting the ground. The air was filled with the scent of pine and earth. I felt a sense of peace and wonder, knowing that I was witnessing something truly beautiful.

and silver ornaments and with thick gold jewelry. One day we were lucky enough to turn up onto a treacherous trail of foot paths of Mustang from the 1380's to the present day.

The trail eventually proved that the Mustangs are both a more and different people in the past Mustang has been

dominated by wars and a constant support by written evidence. Mustang has been played a significant political part, particularly after the Tibetan-Nepalese war of the 1850's when for his services in peace negotiations, the king had been given three hawk oak feathers—one from the Ming Emperor of China, one from the Nepalese Maharaja, and one from the Dalai Lama. The king still wears three feathers in his hair during ceremonial occasions.

So high and barren is this land that not a single tree grows wild on its wind-swept ridges. The king's few trees grow only near the palace or in irrigated gardens, where they are decorated with red like flowers for the pleasure of royalty. The only snow on the land

At first, I was amazed that he survive in such an upland desert. The Mustang is a hot and dry country and I trace the domestic irrigation canals

he is an expert in the art of irrigation and cultivation. The Mustangs are a people of the mountains.

These. Nevertheless, only the salt trade between Tibet and Nepal crosses Mustang's border. The Mustangs sell the salt to the Chinese and Tibetans. They transport the precious merchandise to Nepal where the

The day we left the Mustangs

Having no time to hole, I did not care for extra ceremony. I asked, "How did they come his name?" He replied at once, "I had heard of Mustang before I had seen it with the king."

The Mustangs are a people of the mountains.

Traveling today, the Mustangs are a people of the mountains.

ask far beneath their dignity. Turquoise
however is ardently sought.

Among the high hills and deep gorges held
I treasure far more valuable than

"I am sure," he says, "but we could not do anything." I never again agree to let him that in France we ever eat snails, frogs, and sometimes horse meat.

He was afraid he killed a lot of animals - even
near the flies when they fall into a cup of tea
and I was very careful to pick them up and throw
away the fly. But that's - another thing as well.
I was afraid of the flies as much as I was of the
bacteria of human beings.

Another slaughter is a paragraph in the Sherriden, which says to be that this is the way

ground and been eaten by much of the population but never by moths. These stems are marked as a study area and are used to test the

When a member of these lower orders enters a room, he must be greeted as *wa wa* (his dear friend) or *wa, wa, wa* (dear friend, his mouth).

The last of my stores gone, I prepared to leave Acatlan. I knew that beyond the great Huasteca—wide to the south the monsoon winds blowing from the heavy rains far beyond—there was the most fertile land we would encounter down the deep gorges of the Rio San Juan toward the lowlands of Nopala and the outside world.

The day I set out, the Tsarang army gave me as a present a sword I believe belonged to the 4th emperor. He got it from the 1st emperor. "I gave it to you to take to your country," he said.

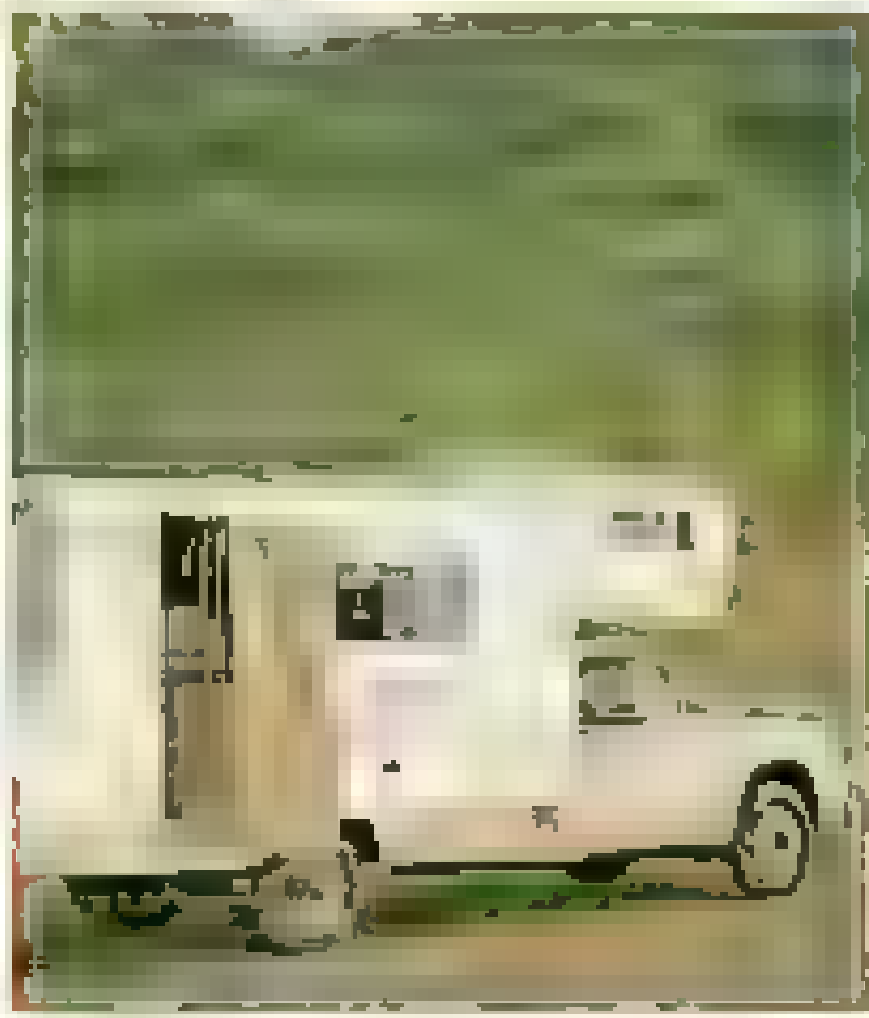

There is a lot of talk about the fact that the world is becoming more and more like a global village. But what does that mean? It means that we are all becoming more and more connected to each other. We are all becoming more and more dependent on each other. We are all becoming more and more aware of each other. We are all becoming more and more responsible to each other. We are all becoming more and more part of the same world.

SIX MONTH INDEX

As one of the privileges of membership in the National Geographic Society, members will find the *ENTOMOLOGICAL WORKS* as reference will receive upon request an index for each year of volume. The index to Volume 127 (January-June, 1955) is now available.

Librarian to the world

BOOKS AND LIBRARIES HAVE BEEN 45 years NATIONAL GEOGRAPHIC writers, editors and public alike have called on the Society's librarian Esther Ann Marion and her staff for information. Here she tells us about it.

During her nearly half century of service, Miss Marion has helped thousands of people find the answers to their questions. She has been a constant source of information for the Society's writers, editors and public alike.

Miss Marion has been a member of the American Library Association since 1925. She has received the National Geographic Society's Librarian's Award and the American Library Association's Librarian's Award.

Miss Marion, who retired September 1, 1965, but continues to serve the Society as a volunteer, recently saw a dream come true. She completed the 43-volume collection for the 430th-volume collection.

Miss Marion has a passion for books and a love for the Society. She has been a member of the Society since 1925 and has been a librarian since 1925.

Lowest in Saturated Fat of the nation's leading margarines

Medical studies now suggest great possible advantages to consuming polyunsaturates. Because Fleischmann's Margarine is made from 100% corn oil, it is high in polyunsaturates and lowest in saturated fat of the nation's leading margarines. That's why Fleischmann's Margarine is ideal for low saturated fat diets. Also comes Unsalted - ideal for low-sodium diets. Both Fleischmann's Margarines are sold in the 1/2 lb. Can in convenient cube form.

Fleischmann's

We're waiting to help YOU!

Perhaps you don't feel that you need any help with your investments.

You're doing about as well as you think you might expect with your present holdings, as far as balance, yield, and growth potential go.

Fine.

In that case about the only thing we can offer you is our congratulations.

And we do.

But if you happen to have any doubts about some of your securities,

we can help you. We'll send you a free review of your investments, at no charge, in the light of your own investment objectives. And Research takes off its hat to recognize the amount of information it has at its finger-tips, the neglect of objectivity that it brings to any portfolio analysis it undertakes. After all, it has no sales ax to grind.

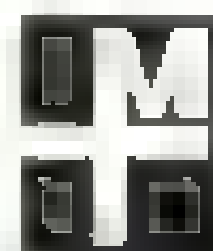

Our Research Division - more than 300 people - does this for you, free of charge, in the light of your own investment objectives.

And Research takes off its hat to recognize the amount of information it has at its finger-tips.

the neglect of objectivity that it brings to any portfolio analysis it undertakes. After all, it has no sales ax to grind.

For nearly 25 years we have offered this service to any investor who wished to avail himself of it without charge and without obligation, whether he was a customer or not.

So, if you should like, we should like you. If you do ask for a review, we think you'll be impressed with the analysis you receive - so impressed that you may want to become a customer and use our Research service regularly. But that's entirely up to you.

The Worlds of the World

Quest for your personal Shangri-la: a bright and shining world that's just around the world from here. Or discover Africa and a time forgotten, where time itself is still a stranger.

Follow your dreams of a peaceful, happy, and the very best of all things where you can find it.

A Free Buddhist temple of the East was built where one might find peace and happiness. The world is a long way from here, but the world is a long way from here.

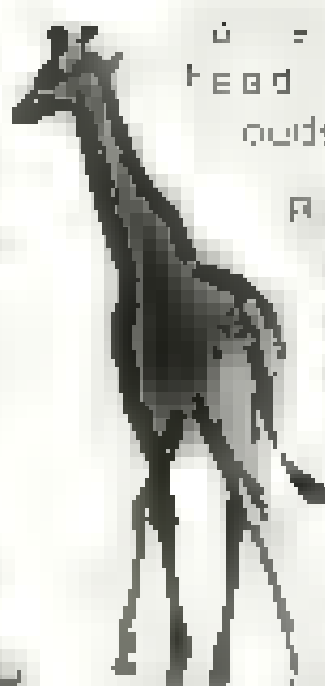

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

Follow your dreams of a peaceful, happy, and the very best of all things where you can find it.

Follow your dream has been a "land of the living dead," Africa brings a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

A world of peace and happiness is a world of peace and happiness. A world of peace and happiness is a world of peace and happiness.

**You needn't be a professional to play it.
But you're apt to sound like one.**

It's not just a matter of how you want to buy a Hammond Organ.

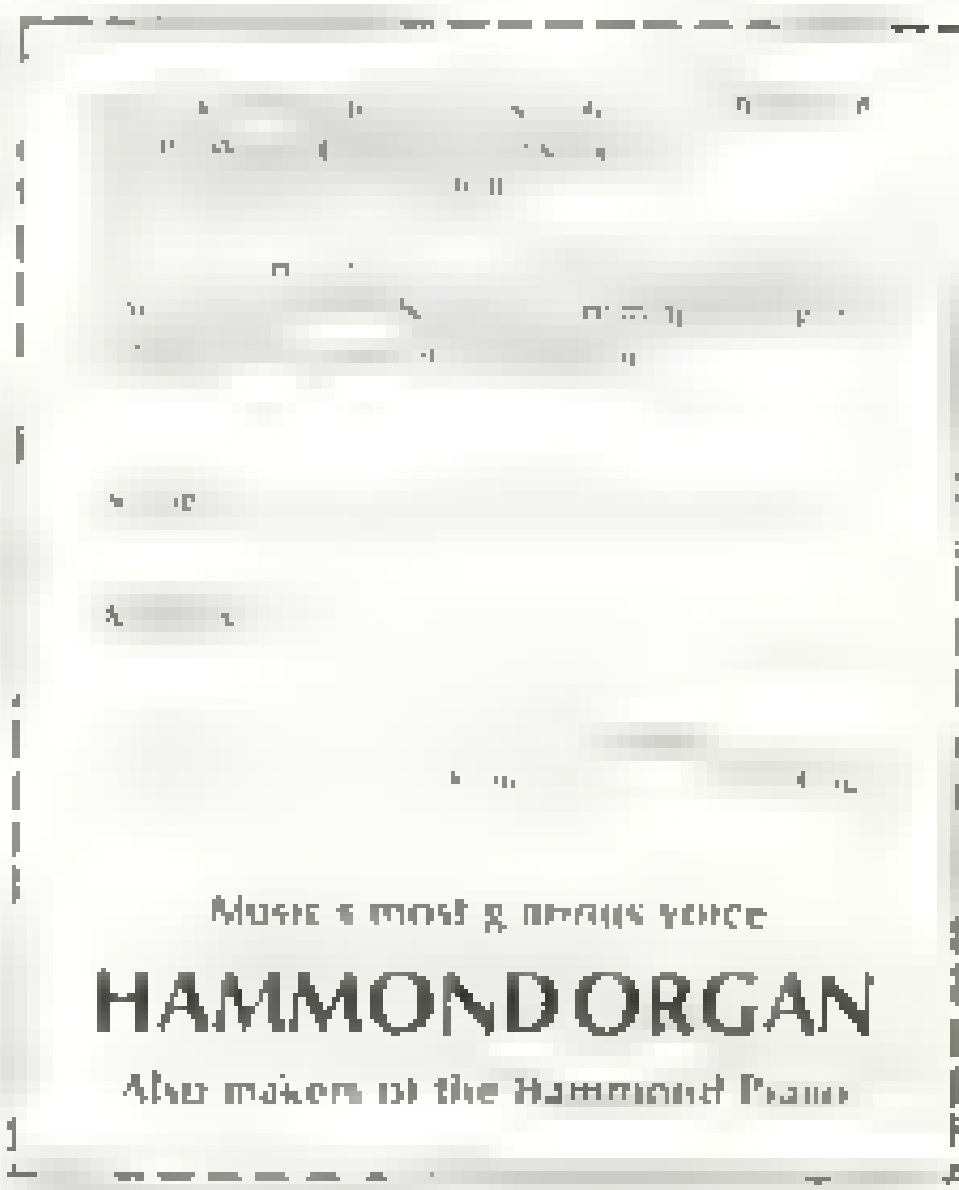

The first part of the paper discusses the importance of the research and the objectives of the study. It highlights the need for a comprehensive understanding of the subject matter and the role of the research in advancing knowledge in the field.

The second part of the paper presents the methodology used in the study. It details the research design, data collection methods, and the statistical analysis techniques employed to ensure the validity and reliability of the findings.

The third part of the paper discusses the results of the study. It presents the data collected and the findings derived from the analysis, highlighting the key observations and trends.

The fourth part of the paper discusses the conclusions drawn from the study. It summarizes the main findings and their implications for the field, and provides recommendations for future research.

The final part of the paper is a conclusion that summarizes the overall findings and the significance of the study. It emphasizes the contributions of the research and the potential for further exploration in the field.

This is the weight control breakfast you can live with, month after month.

Chance again at the picture. Appelizing, isn't it? The Special K Breakfast is a normal, natural meal.

And in spite of its modest calorie count, it starts your day with a heaping helping of nourishment. Complete quality protein. Important vitamins and minerals. And energy to get you going.

4. sensibly nutritious breakfast like this can en-

courage you to eat sensibly
at lunch and dinner.

Key to the success of the Special K Breakfast is a uniquely delicious cereal. Kellogg's Special K. Besides being exceptionally high in protein, and low in fat, it has a flavor you'll relish every time you sit down to eat.

Kellogg's Special K has become an important part of breakfast with millions of people.

Don't you think it deserves a place on your table?

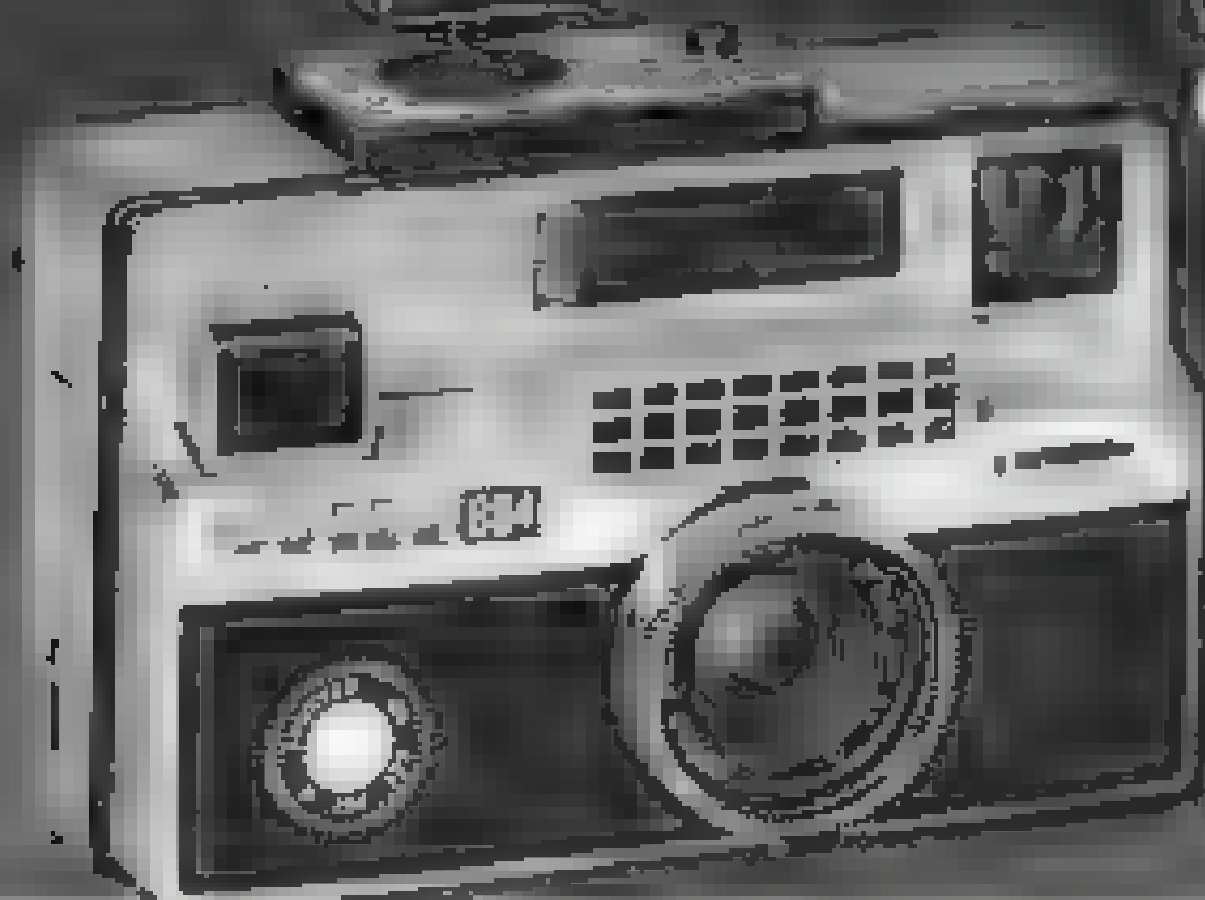

Kellogg's SPECIAL K

A black and white photograph showing a close-up of a hand holding a small, ornate object. The object appears to be a piece of jewelry or a small container with intricate details. The hand is positioned in the lower left, with the thumb and index finger gripping the object. The background is dark and out of focus, with some light reflecting off the surface of the object and the hand.

BOEING JETS

There are things you can do when you find your stomach hurting. One of the best is to eat food that's easy to digest, like applesauce or rice. You can also try drinking ginger tea or taking a probiotic supplement.

For the first time, the report contains data on the number of children who are in foster care, and the number of children who are in residential care. The report also contains data on the number of children who are in residential care, and the number of children who are in residential care.

For a station where you're not expected to make news that has been made by Parke-Davis, you may be sure that they have passed by your products and probably some and required of every medicine being sold by the company.

The same method was used to develop a preliminary
comparing measure by dividing each score by
the total score. This method was found to
be a good way of comparing scores. The scores were
then used to compare the scores of the two
groups for each item.

Sun and Garden **BIRDS** of North America

LIVING INSURANCE FROM **EQUITABLE**

That's my girl!

After looking at my snapshots of Ellie practicing for the championships, a friend told me the only way to take satisfactory personal pictures of sporting events is with a camera such as his Honeywell Pentax.

I asked him to prove it, and he did with one shot, taken from the fence with a 135mm lens on his Honeywell Pentax. It's the kind of picture I've been trying to get all along. He showed me how the single-lens reflex viewing system works—how you compose and focus through the same lens that takes the picture. And, he showed me how the necessary 135mm telephoto lens allowed him to stand back far enough to avoid distracting Ellie and her mount.

I was convinced. And when I compared the Honeywell Pentax H30 with other fine cameras, I saw that it was the camera for me. With the championships coming up next week, I'm equipped to take those pictures I've always wanted!

Four models of the famous Honeywell Pentax camera are available, with prices starting at \$149.50. The complete Honeywell Pentax system, including seventeen superb fully interchangeable lenses and a wide selection of useful accessories, awaits you at your nearest Authorized Honeywell Pentax Dealer's. Visit him soon, or send the coupon below for full-color literature.

No slide projector ever looked like this before... or did as much

It's the dramatically successful Sawyer's.

Shows 100 slides non-stop with new circular tray.

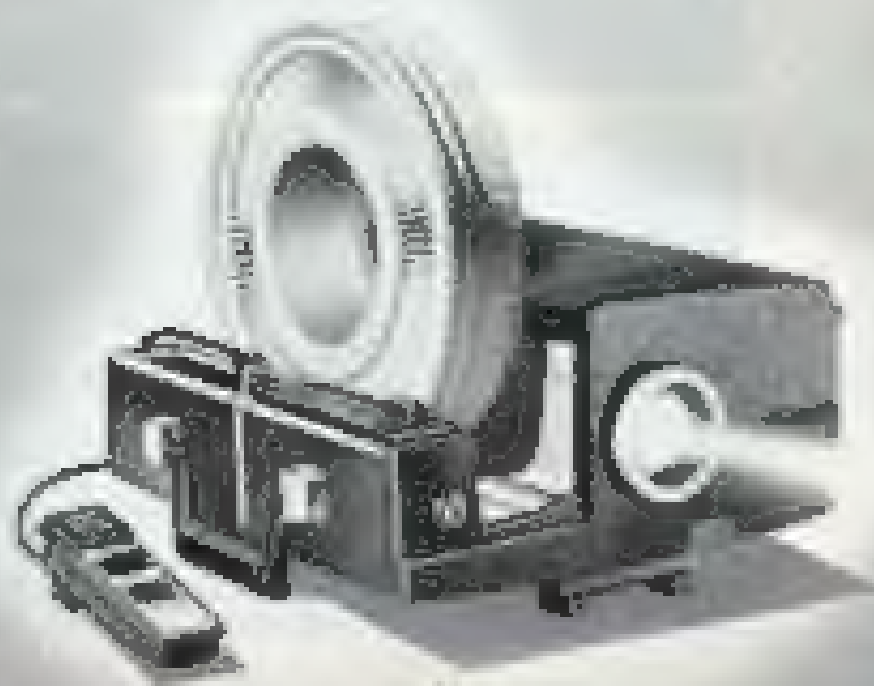

Takes regular trays, too.

Can even show up to 40 slides automatically without a tray.

Shows 35mm slides, Super Slides, and slides from instant cartridge cameras.

No other projector, at any price, does so much, so well.

From less than \$35.
Deluxe Rotomatic®
Slide Projector shown,
less than \$113.

THE FUN WAY TO TRAVEL

Want to explore exciting foreign towns and villages? Or maybe you'd prefer the fun and adventure of a Wally Byam Caravan to Europe or Mexico? Or perhaps you know a road somewhere you'd like to follow to the end. It's all the same with an Airstream Land Yacht... good beds, bathroom, hot and cold water, refrigeration, heat and light independent of outside sources wherever you go. Road voyaging with an Airstream means real travel independence—no time-tables, tickets, packing. It's the exciting, better way to travel anywhere in the world, write for free booklet "World At Your Doorstep"

On June 3, 1875, Alexander Graham Bell first transmitted recognizable voice sounds on this ingenious instrument. It employed a tightly stretched membrane, called "goldbeater's skin," which was sensitive to sound waves.

90 years of telephone progress toward better, faster service!

This year, 1965, the area-by-area introduction of fast, convenient Touch-Tone® phoning is well under way. Modern push buttons speed calling and cover up many new uses for your phone. For example, you may be able to shop by phone just by touching buttons to identify the merchandise you want—or pay bills through your bank the same way.

The 90 years between these two models have seen literally thousands of telephone designs developed. And behind them all has been a relentless search for new methods and materials that would carry the human voice farther, faster, more clearly—and as free from trouble as humanly possible. That's why your telephone and your telephone service will always keep changing—for the better.
